**The End of College** Nov 29 2022 From a renowned education writer comes a paradigm-shifting examination of the rapidly changing world of college that every parent, student, educator, and investor needs to understand. Over the span of just nine months in 2011 and 2012, the world's most famous universities and high-powered technology entrepreneurs began a race to revolutionize higher education. College courses that had been kept for centuries from all but an elite few were released to millions of students throughout the world—for free. Exploding college prices and a flagging global economy, combined with the derring-do of a few intrepid innovators, have created a dynamic climate for a total rethinking of an industry that has remained virtually unchanged for a hundred years. In *The End of College*, Kevin Carey, an education researcher and writer, draws on years of in-depth reporting and cutting-edge research to paint a vivid and surprising portrait of the future of education. Carey explains how two trends—the skyrocketing cost of college and the revolution in information technology—are converging in ways that will radically alter the college experience, upend the traditional meritocracy, and emancipate hundreds of millions of people around the world. Insightful, innovative, and accessible, *The End of College* is a must-read, and an important contribution to the developing conversation about education in this country.

Huxley and Education: Address at the Opening of the College Year, Columbia University, September 28, 1910 Jul 13 2021 How would my old master, Huxley, address you if he were to find you in this felicitous frame of mind, sharpening your wits and your pencils for the contest which will begin to-morrow morning in every hall and laboratory of this great University? May I speak for him as I heard him during the winter of 1879-80 from his lecture desk and as he kindly in conversation gave me of his stores of wisdom and experience? May I add from his truly brilliant essays entitled "Science and Education," delivered between 1874 and 1887? May I contribute also from my own thirty-seven years of life as a student and teacher, beginning in 1873 and reaching a turning point in 1910 when Columbia enrolled me among its research professors? It was Huxley's life, his example, the tone of his writings, rather than his actual precepts which most influenced me, for in 1879 he was so intensely absorbed in public work and administration, as well as in research and teaching, that little opportunity remained for laboratory conferences with his students. How I happened to go to him was as follows: UnluckyÑas they appeared to me at the time, but lucky as I look back upon themÑwere my own early floundering and blundering in seeking the true method of education. Huxley has observed of his "Voyage of the Rattlesnake" that it is a good thing to get down to the bare bones of existence. The same is true of self-education. As compared with the hosts of to-day, few men in 1877 knew how to guide the graduate youth; the Johns Hopkins was still nascent; the creative force of Louis Agassiz had spent itself in producing the first school of naturalists, including the genius, William James. One learnt one's errors through falling into pitfalls. With two companions I was guided by a sort of blind instinct to feel that the most important thing in life was to make a discovery of some kind. On consulting one of our most forceful and genial professors his advice was negative and discouraging: "Young men," he said, "go on with your studies for ten or twelve years until you have covered the whole subject; you will then be ready for research of your own." There appeared to be something wrong about this, although we did not know exactly what. We disregarded the advice, left the laboratory of this professor, and at the end of the year did succeed in writing a paper which subsequently attracted the attention of Huxley and was the indirect means of an introduction to Darwin.

Working with Students in Community Colleges Nov 24 2019 This timely volume addresses the urgent need for new strategies and better ways to serve community colleges' present and future students at a time of rapid diversification, not just racially and ethnically, but including such groups as the undocumented, international students, older adult learners and veterans, all of whom come with varied levels of academic and technical skills The contributing researchers, higher education faculty, college presidents, and community college administrators provide a thorough understanding of student groups who have received scant attention in the higher education literature. They address the often unconscious barriers to access our institutions have erected and describe emerging strategies, frameworks, and pilot projects that can ease students' transition into college and through the maze of the college experience to completion. They offer advice on organizational culture, on defining institutional outcomes, on aligning shifting demographics with the multiple missions of the community college, on strengthening the collaboration of student and academic

affairs to leverage their respective roles and resources, and on engaging with the opportunities afforded by technology. Divided into three parts - understanding today's community college campuses; supporting today's community college learners; and specialized populations and communities - this book offers a vision and solutions that should inform the work of faculty, administrators, presidents, and board members. *Unacceptable* Dec 06 2020 FORBES TOP 10 HIGHER EDUCATION BOOKS OF 2020 The riveting true story behind the Varsity Blues college admissions scandal, a cautionary tale of parenting gone wrong, the system that enabled families to veer so far off course, and the mastermind who made it all happen. When federal prosecutors dropped the bombshell of Operation Varsity Blues, it broke open the crimes of exclusive universities and wealthy families all over the country, shattering the myth of American meritocracy. In *Unacceptable*, veteran Wall Street Journal reporters Melissa Korn and Jennifer Levitz dig deep into how otherwise smart, loving parents became caught up in scandal, led through the side door by one man: college whisperer Rick Singer.

*Unacceptable* traces how, over decades, the charismatic Singer easily reeled in parents hoping to guarantee top educations for their children, and exploited a system rigged against regular people. Exploring the status obsession that seduced entitled parents in search of an edge, Korn and Levitz unfurl a scheme that entangled more than fifty conspirators, from wealthy CEOs to famous actresses, leading to imprisonments, ruined careers, and terminated enrollments. An eye-opening account of corruption in America's most exclusive institutions, *Unacceptable* tells the story of helicopter parenting, coddled teens, and the man who thought he couldn't be caught. Detailing Singer's steady rise and dramatic fall, Korn and Levitz expose the ugly underbelly of elite college admissions, and the devastating consequences of buying success.

**The Hidden Curriculum** Apr 10 2021 A revealing look at the experiences of first generation students on elite campuses and the hidden curriculum they must master in order to succeed College has long been viewed as an opportunity for advancement and mobility for talented students regardless of background. Yet for first generation students, elite universities can often seem like bastions of privilege, with unspoken academic norms and social rules. *The Hidden Curriculum* draws on more than one hundred in-depth interviews with students at Harvard and Georgetown to offer vital lessons about the challenges of being the first in the family to go to college, while also providing invaluable insights into the hurdles that all undergraduates face. As Rachel Gable follows two cohorts of first generation students and their continuing generation peers, she discovers surprising similarities as well as striking differences in their college experiences. She reveals how the hidden curriculum at legacy universities often catches first generation students off guard, and poignantly describes the disorienting encounters on campus that confound them and threaten to derail their success. Gable shows how first-gens are as varied as any other demographic group, and urges universities to make the most of the diverse perspectives and insights these talented students have to offer. *The Hidden Curriculum* gives essential guidance on the critical questions that university leaders need to consider as they strive to support first generation students on campus, and demonstrates how universities can balance historical legacies and elite status with practices and policies that are equitable and inclusive for all students.

What the Best College Students Do May 11 2021 The author of the best-selling *What the Best College Teachers Do* is back with humane, doable, and inspiring help for students who want to get the most out of their education. **The Years That Matter Most** Mar 09 2021 What has gone wrong in our universities? And how do we make it right? When Amy applied to university, she thought she'd be judged purely on her merits. But she never thought that her family background would have as much impact on her future as her grades. When KiKi arrived at university, she knew she could be the only black woman in her class. But she didn't know how out of place she would feel, nor how unwelcoming her peers would be. When Orry graduated from university, he was told he'd probably land a six-figure salary. But he wasn't told he'd end up barely scraping a living wage, struggling to feed his children. Drawing on the stories of hundreds of American students, *The Years That Matters Most* is a revelatory account of a university system in crisis. Paul Tough, bestselling author of *How Children Succeed*, exposes a world where small-town colleges go bust, while the most prestigious raise billions every year; where overstretched admissions officers are forced to pick rich candidates over smart ones; where black and working-class students are left to sink or swim on uncaring campuses. Along the way, he uncovers cutting-edge research from the academics leading the way to a new kind of university – one where students succeed not because of their background, but because of the

quality of their minds. The result is a call-to-arms for universities that work for everyone, and a manual for how we can make it happen.

**How to College** Aug 26 2022 The first practical guide of its kind that helps students transition smoothly from high school to college The transition from high school—and home—to college can be stressful. Students and parents often arrive on campus unprepared for what college is really like. Academic standards and expectations are different from high school; families aren't present to serve as “scaffolding” for students; and first-years have to do what they call “adulting.” Nothing in the college admissions process prepares students for these new realities. As a result, first-year college students report higher stress, more mental health issues, and lower completion rates than in the past. In fact, up to one third of first-year college students will not return for their second year—and colleges are reporting an increase in underprepared first-year students. How to College is here to help. Professors Andrea Malkin Brenner and Lara Schwartz guide first-year students and their families through the transition process, during the summer after high school graduation and throughout the school year, preparing students to succeed and thrive as they transition and adapt to college. The book draws on the authors' experience teaching, writing curricula, and designing programs for thousands of first-year college students over decades.

*Aristotle in Coimbra* Aug 02 2020 Aristotle in Coimbra is the first book to cover the history of both the College of Arts in Coimbra and its most remarkable cultural product, the Cursus Conimbricensis, examining early Jesuit pedagogy as performed in one of the most important colleges run by the Society of Jesus in the sixteenth century. The first complete philosophical textbook published by a Jesuit college, the Cursus Conimbricensis (1592–1606) was created by some of the most renowned early Jesuit philosophers and comprised seven volumes of commentaries and disputations on Aristotle’s writings, which had formed the foundation of the university philosophy curriculum since the Middle Ages. In Aristotle in Coimbra, Cristiano Casalini demonstrates the connection between educational practices in a sixteenth-century college and the structure of a scholastic philosophical commentary, providing insight into this particular form of late-scholastic Aristotelianism through historiographical discourse. This book provides both a narrative of the historical background behind the publication of the Cursus and an analysis of the major philosophical and educational issues addressed by its seven volumes. It is valuable reading for all those interested in intellectual history, the history of education and the history of philosophy.
