The Jeu d'Adam Mar 29 2020 The Jeu d'Adam is an Anglo-Norman mid-twelfth-century representation of several biblical stories, including the temptation of Adam and Eve and the subsequent fall, Cain and Abel, and the prophets Isaiah and Daniel. Its framework builds on the Latin responses of the mass during the liturgical season of Septuagesima, from before Lent to Easter. This collection of essays explores whether this early play was monastic or secular, its Anglo-Norman character, and the text's musical provenance.

The History of Medical Informatics in the United States Apr 10 2021 This is a meticulously detailed chronological record of significant events in the history of medical informatics and their impact on direct patient care and clinical research, offering a representative sampling of published contributions to the field. The History of Medical Informatics in the United States has been restructured within this new edition, reflecting the transformation medical informatics has undergone in the years since 1990. The systems that were once exclusively institutionally driven - hospital, multihospital, and outpatient information systems - are today joined by systems that are driven by clinical subspecialties, nursing, pathology, clinical laboratory, pharmacy, imaging, and more. At the core is the person - not the clinician, not the institution - whose health all these systems are designed to serve. A group of world-renowned authors have joined forces with Dr Marion Ball to bring Dr Collen's incredible work to press. These recognized leaders in medical informatics, many of whom are recipients of the Morris F. Collen Award in Medical Informatics and were friends of or mentored by Dr Collen, carefully reviewed, editing and updating his draft chapters. This has resulted in the most thorough history of the subject imaginable, and also provides readers with a roadmap for the subject well into later in the century.
