Measuring Alternative Work Arrangements for Research and Policy Apr 09 2021 Business structures, employment relationships, job characteristics, and worker outcomes have changed in the United States over the last few decades—in some ways unpredictably. A high level of interest exists among policy makers and researchers in addressing concerns about the future of work in the United States. These concerns are heightened by the perceived fracturing of relationships between workers and employers, the loss of safety net protections and benefits to workers, the growing importance of access to skills and education as the impacts of new technologies and automation are felt, and the market-based pressure that companies face to produce short-term profits, sometimes at the expense of long-term value. These issues, as well as related ones such as wage stagnation and job quality, are often associated with alternative work arrangements (AWAs)—which include independent-contractor and other nonemployee jobs, work through intermediaries such as temporary help agencies and other contract companies, and work with unpredictable schedules—although they also pertain to many standard jobs. A better understanding of the magnitude of and trends in AWAs, along with the implications for job quality, is needed to develop appropriate policies in response to the changing nature of work. *Measuring Alternative Work Arrangements for Research and Policy* reviews the Contingent Worker Supplement (CWS) of the Current Population Survey (CPS) for the Bureau of Labor Statistics (BLS) in the U.S. Department of Labor. The CWS provides key measures of temporary (contingent) work, alternative work arrangements, and the "gig" economy. Disagreements, however, exist among researchers, policy makers, and other stakeholders about the definitions and measures of these concepts and priorities for future data collection. The report also reviews measures of employment, earnings, and worker well-being in temporary and alternative work arrangements that can be estimated using household survey data, such as those generated by the CWS, as well as measures that can be produced using administrative, commercial, and combined data sources. The comparative advantages and complementarities of different data sources will be assessed, as well as methodological issues underpinning BLS's measurement objectives.

Principles of Economics in Context Sep 21 2019 *Principles of Economics in Context* lays out the principles of micro- and macroeconomics in a manner that is thorough, up to date, and relevant to students, attuned to the economic realities of the world around them. It offers engaging treatment of important current topics such as new thinking in behavioral economics, financial instability and market bubbles, debt and deficits, and policy responses to the problems of unemployment, inequality, and environmental sustainability. This new, affordable edition combines the widely acclaimed *Microeconomics in Context* and *Macroeconomics in Context* to provide an integrated full-year text covering all aspects of both micro and macro analysis and application, with many up-to-date examples and extensive supporting web resources for instructors and students.

Measuring Respirator Use in the Workplace Jan 06 2021 Respirators are used in a variety of workplaces including emergency response, mining operations, construction, manufacturing, and hospitals. In 2001, National Institute of Occupational Safety and Health (NIOSH) and Bureau of Labor Statistics commissioned a nationwide survey of respirator use in the workplace, the results of which were published in the 2003 report *Respirator Usage in Private Sector Firms*. The purpose of the survey was to evaluate respirator use and practices, including training practices and the value of respirator manufacturer's instruction, in order to help guide NIOSH respirator certification and research. This National Research Council (NRC) report evaluates the survey in terms of several measures such as the adequacy and appropriateness of the survey instrument, the survey methodology, data analysis, and the conclusions drawn from the data. The NRC report finds that the survey was an important first step in collecting respiratory protection data from a probability sample but that several improvements could be made in survey design and analysis. Based on the review of the survey, the NRC report concludes that data on respirator use would be best provided by employers and employees in the context of the work setting.

Foundations of Nursing in the Community - E-Book Feb 07 2021 With concise, focused coverage of community health nursing, *Foundations of Nursing in the Community: Community-Oriented Practice*, 4th Edition provides essential information for community practice — from nursing roles and care settings to vulnerable population groups. The book uses a practical, community-oriented approach and places an emphasis on health promotion and disease prevention. Practical application of concepts is highlighted

throughout the text in case studies, critical thinking activities, QSEN competencies, and Healthy People 2020 objectives. Evidence-Based Practice boxes highlight current research findings, their application to practice, and how community/public health nurses can apply the study results. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels, to reinforce the concept of prevention as it pertains to community and public health care. Focus on health promotion throughout the text emphasizes initiatives, strategies, and interventions that promote the health of the community. Clinical Application scenarios offer realistic situations with questions and answers to help you apply chapter concepts to practice in the community. Case Studies provide client scenarios within the community/public health setting to help you develop assessment and critical thinking skills. What Would You Do? boxes present problem-solving challenges that encourage both independent and collaborative thinking required in community settings. How To boxes offer specific instructions on nursing interventions. NEW! QSEN boxes illustrate how quality and safety goals, competencies, objectives, knowledge, skills, and attitudes can be applied in nursing practice in the community. NEW! Feature box on Linking Content to Practice highlights how chapter content is applied in the role of public/community health nursing. NEW! Healthy People 2020 objectives in every chapter address the health priorities and emerging health issues expected in the next decade.

Macroeconomics in Context Sep 02 2020 Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Teacher Preparation for Bilingual Student Populations Dec 25 2019 The growing number of bilingual students in public schools coupled with a critical shortage of teachers specially prepared to serve this population calls for a critical examination of policies and practices in bilingual and ESL teacher preparation. This volume focuses on understanding the structural, substantive, and contextual elements of preparation programs, and provides transformative guidelines for creating Educator signature programs. Designed to improve the practice of teacher preparation by promoting dialogic conversations and applications of praxis in the preparation of bilingual/ESL teacher candidates, it emphasizes that exemplary teacher preparation requires transformative teacher educators. Simultaneously organizing the scholarship in the field and advancing new understandings, this book is must-have resource for current and future teacher educators. Contributors include Maria Brisk, Sylvia Celédon-Pattichis, Lourdes Diaz-Soto, Eugene García, Virginia Gonzáles, Guillermo Solano-Flores, Maria Torres-Guzman, Carmen Mercado, Bertha Pérez, Mari Riojas-Cortez, Francisco Rios, Concepción Valadez, and Angela Valenzuela.
