In the urgency to respond to the challenges posed by diversity in contemporary societies, the discussion of normative foundations is often overlooked. This book takes that important first step, and offers new ways of thinking about diversity. Its contribution to an ongoing dialogue in this field lies in the construction of a normative framework which endeavours to better understand the challenges of justice in diverse societies. By applying this normative framework to specific and broader examples of injustices in the spheres of religion, culture, race, ethnicity, gender and nationality, the book demonstrates how constitutional pluralist discourses can contribute both to new and legal responses to diversity. The book will be of interest to legal professionals, policy makers, law students and scholars concerned with exploring diversity in the 21st century. The 21st century is marked by the intensive movement of people across international borders. While languages are used as a means of interaction across the globe, the nuances of communication vary from culture to culture. This book explores how the misperception of cultural values and norms may result in misapprehension and communication breakdowns in various settings. Firsthand sources are brought together to illuminate the diversity of American history in a unique way—by sharing the perspectives of people of color who participated in landmark events. • Highlights the history and experience of people of color in the United States through 450 important documents and firsthand accounts • Introduces readers to multiple viewpoints about landmark events • Provides a unique and helpful "Guide to Why and How to Use Primary Documents" Organizations committed to diversity issues cannot afford to be without this valuable collection of tools. Organisations and institutions of higher education are more and more challenged by current economic, social and political conditions to react competitively and innovatively on new requirements, such as demographic change, globalisation or skilled labour shortage. In addition, universities and companies alike, have to compete for the most qualified staff. In order to produce more innovative solutions and to perform better, it is essential to integrate gender and diversity perspectives as important elements of organisational and human resources development. This anthology presents different theoretical and practical approaches, best practice examples and important aspects of gender and diversity management in organisations. Each of these exercises is a self-contained unit with clear instructions, handouts, discussion suggestions and a concise explanation of the research-base for each activity. They are designed as effective classroom learning tools. Science and technology culture is now more than ever at the very heart of the social project, and all countries, to varying degrees, participate in it: raising scientific literacy, improving the image of the sciences, involving the public in debates and encouraging the young to pursue careers in the sciences. Thus, the very destiny of any society is now entwined with its ability to develop a genuine science and technology culture, accessible for participation not only to the few who, by virtue of their training or trade, work in the science and technology fields, but to all, thereby creating occasions for society to debate and to foster a positive dialogue about the directions of change and future choices. This book organized on the theme of 'knowing, sharing, caring: new insights for a diverse world', which was derived from the observation that globalization rests upon diversity—diversity of contexts, publics, research, strategies and new innovating practices—and aims to stimulate exchanges, discussions and debates, to initiate a reflection conducive to decentring and to be an opportunity for enrichment by providing the reader with means to achieve the potentialities of that diversity through a comparison of the visions that underpin the attitudes of social actors, the challenges they perceive and the potential solutions they consider. Thus, this book aims first and foremost to raise questions in such a manner that readers so stimulated will feel compelled to contribute and will do so. In this spirit, however significant, the results presented and shared are less important than the questions they seek to answer: How are we to rethink the diffusion, the propagation and the sharing of scientific thought and knowledge in an ever more complex and diverse world? What to know? What to share? How do we do it when science is broken down across the whole spectrum of the world's diversity? The book is recommended for those who are interested in science communication and science cultures in the new media era, in contemporary social dynamics, and in the evolution of the role of the state and of institutions. It is also an excellent reference for researchers engaging in science communication, public understanding of science, cultural studies, science and technology museum, science–society relationship and other fields of humanities and social sciences. As neoliberalism has expanded from corporations to higher education, the notion of “diversity” is increasingly seen as the contribution of individuals to an organization. By focusing on one liberal arts college, author Bonnie Urciuoli shows how schools market themselves as “diverse” communities to which all members contribute. She explores how students of color are recruited, how their lives are institutionally organized, and how they provide the faces, numbers, and stories that represent schools as diverse. In doing so, she finds that unlike students' routine experiences of race or other social differences, neoliberal diversity is mainly about improving schools' images. "Published in conjunction with the University of the Basque Country." In this landmark book, Scott Page redefines the way we understand ourselves in relation to one another. The Difference is about how we think in groups—and how our collective wisdom exceeds the sum of its parts. Why can teams of people find better solutions than brilliant individuals working alone? And why are the best group decisions and predictions those that draw upon the very qualities that make each of us unique? The answers lie in diversity—not what we look like outside, but what we look like within, our distinct tools and abilities. The Difference reveals that progress and innovation may depend less on lone thinkers with enormous IQs than on diverse people working together and capitalizing on their individuality. Page shows how groups that display a range of perspectives outperform groups of like-minded experts. Diversity yields superior outcomes, and Page proves it using his own cutting-edge research. Moving beyond the politics that cloud standard debates about diversity, he explains why difference beats out homogeneity, whether you're talking about citizens in a democracy or scientists in the laboratory. He examines practical ways to apply diversity's logic to a host of problems, and along the way offers fascinating and surprising examples, from the redesign of the Chicago "El" to the truth about where we store our ketchup. Page changes the way we understand diversity—how to harness its untapped potential, how to understand and avoid its traps, and how we can leverage our differences for the benefit of all. Bringing together academics and private international lawyers from a wide range of jurisdictions and institutions, this volume explores how private international law can best contribute to the development of the global legal architecture needed to integrate our emerging multicultural world society. 'Kahanec and Zimmermann have put together a volume that destroys the myth that science and policy making cannot be bridged. In an accessible way, but deeply rooted in rigorous science, they provide a handbook for policy makers working in the field of inclusion and integration of ethnic minorities. They identify key policy challenges, address the question of what minorities want, and propose a policy agenda of how to get there.' - Prof. Dr. Dr. h.c. mult. Rita Süßmuth, Chair of the European Union's High Level Group on 'social Integration of Ethnic Minorities and their full Participation in the Labor Market' (2006 - 2007) Essays discussing women's psychological development examine the experiences of women from diverse backgrounds Looking beyond exclusively state-oriented solutions to the management of religious diversity, this book explores ways of fostering respectful, non-violent and welcoming social relations among religious communities. It examines the question of how to balance religious diversity, individual rights and freedoms with a common national identity and moral consensus. The essays discuss the interface between state and civil society in 'secular' countries and look at case studies from the West and India. They study themes such as religious education, religious diversity, pluralism, inter-religious relations and exchanges, dalits and religion, and issues arising from the lived experience of religious diversity in various countries. The volume asserts that if religious violence crosses borders, so do ideas about how to live together peacefully, theological reflection on pluralism, and lived practices of friendship across the boundaries of religious identity-groupings. Bringing together interdisciplinary scholarship from across the world, the book will interest scholars and students of philosophy, religious studies, political science, sociology and history. The Pocket Mentor series offers immediate solutions to the challenges managers face on the job every day. Many organizations encourage diversity because providing equal opportunity for everyone is the right thing to do. A diverse workforce can also yield such important competitive advantages as a higher level of profitable innovation, a better understanding of market opportunities, and stronger employee productivity and commitment. But as people with different backgrounds, beliefs, and values interact in the workplace, conflicts can arise. How can you foster diversity on your team and surmount the challenges that can come with it? This book teaches managers how to: - Recruit a diverse team - Foster an inclusive environment by replacing common misconceptions with facts - Handle diversity-related conflict - Tap the business value generated by the team's diversity Arguably the most transformative force in contemporary society is the commitment to justice through diversity. A prime example is the change justice through diversity has wrought on who enters, teaches and administers the university. It has changed the content of what is taught and the mission statements that define the purpose of higher education. What is rarely defined, however, is justice and how it is related to diversity. If justice is equality, are all differences equal? Are all differences in race, gender, sexual orientation, national origin, ethnicity, religion and culture equal? Should such differences be weighted differently and thus hierarchically? On what basis are those differences to be weighted and ranked to ensure equality? Justice Through Diversity brings together a Who's Who of contemporary scholars to explore these questions and others in an attempt to understand one of the central commitments in the modern world. This book suggests that religion, in its usual sense, can be replaced by something better, that the human spirit or subjectivity can be the subject of scientific study and that lack of purpose or design in the universe is not a handicap but a positive opportunity for intelligent beings to make of the universe and its contents what they reasonably can. The book breaks new ground in suggesting a radical alternative to religion. It offers a scientific and humanist alternative to religion which appeals to people's critical faculties rather than emotions or intuitions. It also challenges current views of causation and the principle of sufficient reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to an independent external reality. It develops and elaborates a notion of the 'noosphere' within a theoretical system, this enables the notion to assume a scientific importance which it currently lacks because it is treated as an isolated, eccentric and rather mystical idea. All the books in this series are thoroughly researched, frequently updated, and packed with relevant content that has been prepared by authors with more than a decade of experience in the field. The Interdisciplinary Research Seminar, developed by Professor Nicolas A. Nyiri of the Political Science Department, was initiated three years ago. The purpose has been to encourage and foster interdisciplinary research papers and colloquia which are now being published under the editorship of Professor N.A. Nyiri and Dr. Rod Preece. Contributors have been drawn from several centres and it is planned to expand the sources of papers in the future. The work that has been accomplished has served to bring scholars from diverse fields together and to encourage others to share in the exploration and expansion of critical thinking in a number of areas. It is expected that the publication of the first volume will open the way to an ever-widening interest in this core area of a university's life: critical thinking and dissemination of the knowledge gained. - From the foreword by Dr. Neale Tayler, Vice-President Academic, Wilfrid Laurier University This Handbook on Diversity and Inclusion Indices critically examines many of the popular and frequently cited indices related to DEI benchmarking and progress tracking. The goal is to provide a better understanding of the indices' construction, strengths and weaknesses, intended applications, contribution to research and progress towards diversity and equity goals. Explore a variety of approaches congregations have taken to embrace differences; identify leadership issues diversity creates in congregations; and discover programmatic suggestions drawn from the experience of multicultural congregations to address these issues. This book helps readers to understand their own experience with racial and cultural differences and is a guide for gathering diverse people into the life and mission of the congregation. JoAnn Moody shows majority campuses, faculty, and administrators how to dismantle the high barriers that block women and especially minorities from entry and advancement in the professoriate. Good practices for improving recruitment, evaluation, mentorship, and retention are offered. "Readers will find this volume a treasure trove of perspectives, answers, and provocations that should stimulate further the essential discussions we must have to create schools that can someday provide all children---and teachers---with the right to learn what they need and deserve."---Linda Darling-Hammond, from the Foreword -- Diversity at Work: The Practice of Inclusion How can organizations, their leaders, and their people benefit from diversity? The answer, according to this cutting-edge book, is the practice of inclusion. Diversity at Work: The Practice of Inclusion (a volume in SIOP's Professional Practice Series) presents detailed solutions for the challenge of inclusion—how to fully connect with, engage, and empower people across all types of differences. Its editors and chapter authors—all topic experts ranging from internal and external change agents to academics—effectively translate theories and research on diversity into the applied practice of inclusion. Readers will learn about the critical issues involved in framing, designing, and implementing inclusion initiatives in organizations and supporting individuals to develop competencies for inclusion. The authors' diverse voices combine to provide an innovative and expansive model of the practice of inclusion and to address its key aspects at the individual, group, and organizational levels. The book, designed to be a hands-on resource, provides case studies and illustrations to show how diversity and inclusion operate in a variety of settings, effectively highlighting the practices needed to benefit from diversity. This comprehensive handbook: Explains how to conceptualize, operationalize, and implement inclusion in organizations. Connects inclusion to multiple dimensions of diversity (including gender, race, ethnicity, nationality, social class, religion, profession, and many others) in integrative ways, incorporating specific and relevant examples. Includes models, illustrations, and cases showing how to apply the principles and practices of inclusion. Addresses international and multicultural perspectives throughout, including many examples. Provides practitioners with key perspectives and tools for thinking about and fostering inclusion in a variety of organizational contexts. Provides HR professionals, industrial-organizational psychologists, D&I practitioners, and those in related fields—as well as anyone interested in enhancing the workplace—with a one-stop resource on the latest knowledge regarding diversity and the practice of inclusion in organizations. This vital resource offers a clear understanding of and a way to navigate the challenges of creating and sustaining inclusion initiatives that truly work. This book offers a lively, engaging and potentially transformative introduction to the ideas, insights and practical know-how that a modern university teacher requires. Bringing together contributors with extensive practical teaching experience as well as pedagogical expertise, it uses accessible language and real cases to explore everyday teaching challenges and provide strategies and techniques for stimulating deep and satisfying learning. This book is for anyone with the ambition to teach well at degree level. The patriarchal approach to leadership in the African context is indeed an enigma, judging from the unpredictable outcomes and the quest for effective leadership. In many ways, the secularized big-man in the public square is no different from the sacralised great-man of God in the church. The Lord Jesus Christ calls his followers to servant leadership. The secular world has also established the efficacy of the servant leadership approach for cutting-edge leadership. This book looks at the nature of evangelical associations in their diversity and what it takes for leaders to build unity and harmony for effectiveness, especially in the African context.
