Finding God Beyond Harvard Nov 07 2020 Engaging narrative and provocative content come together in this mind-stretching and heart-challenging journey. Come with Kelly Monroe Kullberg on an intellectual road trip as The Veritas Forum explores the deepest questions of the university world and the culture at large. Discover that Veritas transcends philosophy or religion and instead brings us to true life.

A Plea for Harvard: showing that "The University at Cambridge" was not the name established for this seminary by the Constitution of Massachusetts, but that

the name authorized by that instrument was "Harvard University." By an Alumnus [i.e. Josiah Quincy]. Dec 21 2021

That Book about Harvard Sep 17 2021 "Eric Kester has written the kind of book I wish I had the courage and insight to write. His illuminations on everything from Larry Summers to the Harvard football team to cheating, tourists, and competitiveness are dead-on. His writing has also provided me with some of the best laugh-out-loud moments I've had in recent years. God knows Harvard could use some humor!" —PETER OLSON, FORMER CEO OF RANDOM

HOUSE, HARVARD GRADUATE, AND CURRENT HARVARD PROFESSOR One of the most thrilling and terrifying days of your life is the first day of college, when you step onto campus filled with the excitement of all the possibilities ahead—and panic about if you'll make it and how you'll fit in. Now imagine that same feeling, but you're in the middle of the lawn at the world's most prestigious university. In your underwear. Thus begins one of the craziest years ever at Harvard, in which Eric Kester finds himself in a cheating scheme, trying to join a prestigious Finals Club, and falling for a stunning type-A brunette...who happened to be standing there in shock that first day when he made his red-faced stroll across the Harvard Yard. That Book about Harvard is the hilarious and heartwarming story of trying to find your place in a new world, the unending quest to fit in, and how the moments that change your life often happen in the most unexpected ways. Eric Kester graduated from Harvard in 2008, where he wrote a popular column for the undergraduate newspaper, the Crimson. Now a featured writer for CollegeHumor.com, Eric has also contributed to the Boston Globe, someEcards.com, and Dorkly.com.

Harvard A to Z Aug 17 2021 Open this book and step into the storied corridors of the nation's oldest university; encounter the historic landmarks and curiosities; and among them, meet the famous dropouts and former students, the world-class scholars, eccentrics, and prodigies who have given the institution its incomparable character. An alphabetical compendium of short but substantial essays about Harvard University--its undergraduate college and nine

professional schools--this volume traverses the gamut of Harvardiana from Aab and Admissions to X Cage and Z Closet. In between are some two hundred entries written by three Harvard veterans who bring to the task over 125 years of experience within the university. The entries range from essential facts to no less interesting ephemera, from the Arnold Arboretum designed by Frederick Law Olmsted to the peculiar medical specimens of the Warren Museum; from Arts and Athletics to Towers and Tuition: from the very real environs (Cambridge, Charles River, and Quincy Street) to the Harvard of Hollywood and fiction. Harvard A to Z is a browser's delight, offering readers the chance to dip into the history and lore, the character and culture of America's foremost institution of higher learning. *Catalogue of Irish Manuscripts in Houghton Library, Harvard University May
26 2022 The first full account of North America's largest collection of traditional
Irish-language manuscripts. Harvard University has the largest collection of
Irish-language codices in North America, held in Houghton Library, its rare
book repository. The manuscripts are a part of the age-old heritage of Irish book
production, dating to the early Middle Ages. Handwritten works in Houghton
contain versions of medieval poetry and sagas, recopied in the eighteenth and
nineteenth centuries, to which period most of the library's documents belong.
Contemporary writings from that time, as well as ones by the post-Famine Irish
immigrant community in the United States are included. This catalogue describes
the collection in full for the first time and will be an invaluable aid to research on
Irish and Irish American cultural and literary output. The author's introduction
examines how the collection was formed. This untold story is an important
chapter in America's intellectual history, reflecting a phase of unprecedented
expansion in Harvard University's scholarship and teaching during the early*

twentieth century when the institution's program of studies began to accommodate an increasing range of European languages and literatures and their sources. This indispensable guide to a major repository's records of the Irish past, and of America's Irish diaspora, will interest specialists in early and post-medieval codices. It should prove of relevance as well to scholars and students of comparative literature, cultural studies, and Irish and Irish American history.

Transcendence and Non-Naturalism in Early Chinese Thought Feb 20 2022

Contemporary scholars of Chinese philosophy often presuppose that early China possessed a naturalistic worldview, devoid of any non-natural concepts, such as transcendence. Challenging this presupposition head-on, Joshua R. Brown and Alexis McLeod argue that non-naturalism and transcendence have a robust and significant place in early Chinese thought. This book reveals that non-naturalist positions can be found in early Chinese texts, in topics including conceptions of the divine, cosmogony, and apophatic philosophy. Moreover, by closely examining a range of early Chinese texts, and providing comparative readings of a number of Western texts and thinkers, the book offers a way of reading early Chinese Philosophy as consistent with the religious philosophy of the East and West, including the Abrahamic and the Brahmanistic religions. Co-written by a philosopher and theologian, this book draws out unique insights into early Chinese thought, highlighting in particular new ways to consider a range of Chinese concepts, including tian, dao, li, and you/wu.

Authorship's Wake Apr 24 2022 Authorship's Wake examines the aftermath of the 1960s critique of the author, epitomized by Roland Barthes's essay, "The Death of the Author." This critique has given rise to a body of writing that confounds generic distinctions separating the literary and the theoretical. Its archive consists of texts by writers who either directly participated in this critique, as Barthes did, or whose intellectual formation took place in its immediate aftermath. These writers include some who are known primarily as theorists (Judith Butler), others known primarily as novelists (Zadie Smith, David Foster Wallace), and yet others whose texts are difficult to categorize (the autofiction of Chris Kraus, Sheila Heti, and Ben Lerner; the autotheory of Maggie Nelson). These writers share not only a central motivating question – how to move beyond the critique of the author-subject – but also a way of answering it: by writing texts that merge theoretical concerns with literary discourse. Authorship's Wake traces the responses their work offers in relation to four themes: communication,

intention, agency, and labor.

The History of Harvard University Oct 31 2022

Making Harvard Modern Sep 25 2019 Making Harvard Modern is a candid, richly detailed portrait of America's most prominent university from 1933 to the present: seven decades of dramatic change. Early twentieth century Harvard was the country's oldest and richest university, but not necessarily its outstanding one. By the century's end it was widely regarded as the nation's, and the world's, leading institution of higher education. With verve, humor, and insight, Morton and Phyllis Keller tell the story of that rise: a tale of compelling personalities, notable achievement and no less notable academic pratfalls. Their book is based on rich and revealing archival materials, interviews, and personal experience. Young, humbly born James Bryant Conant succeeded Boston Brahmin A. Lawrence Lowell as Harvard's president in 1933, and set out to change a Brahmin-dominated university into a meritocratic one. He hoped to recruit the nation's finest scholars and an outstanding national student body. But the lack of new money during the Depression and the distractions of World War Two kept Conant, and Harvard, from achieving this goal. In the 1950s and 1960s, during the presidency of Conant's successor Nathan Marsh Pusey, Harvard raised the money, recruited the faculty, and attracted the students that made it a great meritocratic institution: America's university. The authors provide the fullest account yet of this transformation, and of the wrenching campus crisis of the late 'sixties. During the last thirty years of the twentieth century, a new academic culture arose: meritocratic Harvard morphed into worldly Harvard. During the presidencies of Derek Bok and Neil Rudenstine the university opened its doors to growing numbers of foreign students, women, African- and Asian-Americans, and Hispanics. Its administration, faculty, and students became more deeply engaged in social issues; its scientists and professional schools were more ready to enter into shared commercial ventures. But worldliness brought its own conflicts: over affirmative action and political correctness, over commercialization, over the ever higher costs of higher education. This

fascinating account, the first comprehensive history of a modern American university, is essential reading for anyone with an interest in the present state and future course of higher education.

Healthy Buildings Aug 24 2019 A revised and updated edition of the landmark work the New York Times hailed as “a call to action for every developer, building owner, shareholder, chief executive, manager, teacher, worker and parent to start demanding healthy buildings with cleaner indoor air.” For too long we’ve designed buildings that haven’t focused on the people inside—their health, their ability to work effectively, and what that means for the bottom line. An authoritative introduction to a movement whose vital importance is now all too clear, Healthy Buildings breaks down the science and makes a compelling business case for creating healthier offices, schools, and homes. As the COVID-19 crisis brought into sharp focus, indoor spaces can make you sick—or keep you healthy. Fortunately, we now have the know-how and technology to keep people safe indoors. But there is more to securing your office, school, or home than wiping down surfaces. Levels of carbon dioxide, particulates, humidity, pollution, and a toxic soup of volatile organic compounds from everyday products can influence our health in ways people aren’t always aware of. This landmark book, revised and updated with the latest research since the COVID-19 pandemic, lays out a compelling case for more environmentally friendly and less toxic offices, schools, and homes. It features a concise explanation of disease transmission indoors, and provides tips for making buildings the first line of defense. Joe Allen and John Macomber dispel the myth that we can’t have both energy-efficient buildings and good indoor air quality. We can—and must—have both. At the center of the great convergence of green, smart, and safe buildings, healthy buildings are vital to the push for more sustainable urbanization that will shape our future.

Helgoland Oct 07 2020 Named a Best Book of 2021 by the Financial Times and a Best Science Book of 2021 by The Guardian “Rovelli is a genius and an amazing communicator... This is the place where science comes to life.” ?Neil

Gaiman “One of the warmest, most elegant and most lucid interpreters to the laity of the dazzling enigmas of his discipline...[a] momentous book” ?John Banville, The Wall Street Journal A startling new look at quantum theory, from the New York Times bestselling author of Seven Brief Lessons on Physics, The Order of Time, and Anaximander. One of the world's most renowned theoretical physicists, Carlo Rovelli has entranced millions of readers with his singular perspective on the cosmos. In Helgoland, he examines the enduring enigma of quantum theory. The quantum world Rovelli describes is as beautiful as it is unnerving. Helgoland is a treeless island in the North Sea where the twenty-three-year-old Werner Heisenberg made the crucial breakthrough for the creation of quantum mechanics, setting off a century of scientific revolution. Full of alarming ideas (ghost waves, distant objects that seem to be magically connected, cats that appear both dead and alive), quantum physics has led to countless discoveries and technological advancements. Today our understanding of the world is based on this theory, yet it is still profoundly mysterious. As scientists and philosophers continue to fiercely debate the meaning of the theory, Rovelli argues that its most unsettling contradictions can be explained by seeing the world as fundamentally made of relationships rather than substances. We and everything around us exist only in our interactions with one another. This bold idea suggests new directions for thinking about the structure of reality and even the nature of consciousness. Rovelli makes learning about quantum mechanics an almost psychedelic experience. Shifting our perspective once again, he takes us on a riveting journey through the universe so we can better comprehend our place in it.
