RAF and USAAF Airfields in the UK During the Second World War Aug 22 2022 Shortly after the end of the Second World War, the United Kingdom was described as one vast aircraft carrier anchored off the coast of Europe. During a seven year period 500

airfields were constructed to serve the needs first of the RAF and later the USAAF as they carried the war to German-occupied Europe. The airfields that were constructed took many different forms from training airfields and Advanced Landing Grounds to grass fighter airstrips and vast complexes used to accommodate heavy bombers. This book charts the history of each Second World War airfield in and around the UK providing a unique insight in to the construction, operational life and post-war history of each airfield. Alongside detailing the history of each airfield, this work comprehensively records the details of each unit that operated from airfields around the UK. The information provided in this meticulously researched book is supported by a wealth of 690 photographs providing an illustration into the life of each wartime station.
