**MCP Mathematics** Dec 15 2021 MCP Mathematics promotes mathematical success for all students, especially those who struggle with their core math program. This trusted, targeted program uses a traditional drill and practice format with a predictable, easy-to-use lesson format. MCP Math is flexible and adaptable to fit a variety of intervention settings including after school, summer school, and additional math instruction during the regular school day. By teaching with MCP Math, you can: Provide targeted intervention through a complete alternative program to core math textbooks. Help students learn and retain new concepts and skills with extensive practice. Prepare students at a wide range of ability levels for success on standardized tests of math proficiency.

Mental Math in the Primary Grades Jul 30 2020 36 lessons and answer key to practice mental math.

Mathematics Feb 05 2021

**Question of the Week** May 08 2021 SUMMARY: Designed to foster the development of science comprehension and basic science thinking skills in grades 5-8.

**Geometric Design** Jun 21 2022 Students construct more than 80 designs based on triangles, squares, pentagons, and other shapes. Each design starts with a simple circle, then a polygon is inscribed in it. By adding, deleting, and connecting diagonals, students achieve the final design. Adaptable to compass and ruler or computer use.

Includes templates, six basic constructions, and a review of geometric terms.

Developing Skills in Estimation Jul 22 2022 Grade level: 6, 7, 8, 9, e, i, s.

Introduction to Tessellations Aug 11 2021 Presents an introduction to tessellations and geometric design, including polygons, Islamic art designs, Escher-type tessellations, and tessellating letters, along with step-by-step instructions for creating tessellations.

Getting Smarter Every Day Dec 27 2022

Mathematicians are People, Too Aug 23 2022 Looks at the history of mathematical discoveries and the lives of great mathematicians.

**Nimble with Numbers** Jun 28 2020

Exploring Attributes Jan 24 2020 Creates a sound basis in logic for primary students and increases logical understanding in intermediate and middle school students.

**Visual Patterns in Pascal's Triangle** Mar 06 2021 Ulysses Harrison developed a geometry lesson that focuses on the visual and number patterns found in the sequence of numbers that make up Pascal's Triangle. Harrison lists the required materials and highlights the lesson procedures. This lesson is best suited for use with high school classes. The Illinois Institute of Technology in Chicago, Illinois, provides the lesson online as part of the Science and Mathematics Initiative for Learning Enhancement (SMILE) program.

Line Designs Jan 04 2021

**Critical Thinking Activities in Patterns, Imagery, Logic** Jan 16 2022 Too often, thinking skills have been overlooked or considered extra, something above and beyond the basic that must be taught. Teachers need to recognize that thinking skills are basic and critical thinking activities should be considered indispensable to the education of every child. These books present activities to help students develop their thinking and problem-solving skills using strategies that can help solve non-routine math problems. Students will use more than one strategy to arrive at a solution, and some of these strategies require that students use skills such as thinking visually, recognizing patterns, using logical reasoning, and doing organized counting--all of which are elements of critical thinking in mathematics. Critical Thinking Activities can be used as a supplement to an existing math curriculum to introduce, reinforce, and elaborate on specific critical thinking skills. The pages are designed to be reproduced for students to use as individual worksheets or problem cards. To view sample lessons and pages, click on the appropriate ISBN # below.

Eye Cue Puzzles Feb 23 2020

**Graph Paper Masters** Apr 19 2022 Create your own graphs with 168 blackline masters, ready to be photocopied. Square, triangular, hexagonal, and polar coordinate grids; faint-line sketching grids and dot pattern paper; standard measure paper with divisions from 1" to .0625"; and metric measure paper with divisions from 2 cm to 0.2 cm.

Grids and Charts May 28 2020 Hundreds of black-and-white drawings for photocopying or computer use. Rectangular and isometric: increments of 1/8" to 1" and 1/2 cm to 2 cm, including heavy line, shadow line, and dots.

**Pictograms** Jul 10 2021 Hundreds of pictures that fit into the 3" squares on Graphing Grids: how we get to school, our pets, the weather, birthdays, and more.

**Super Problems** Dec 23 2019 Grade level: 7, 8, 9, e, i, s.

01344 When Are We Ever Gonna Have to Use This? Poster Oct 21 2019 Now you have the answer to your students' question, "When are we ever gonna have to use this?" After interviewing working people--from dentists to firefighters to carpet cleaners--the author formulated more than 350 "real-life" work problems. Students explore 60 different math topics in the problems, which are arranged by occupation and math content in three levels of difficulty. A wall chart summarizes the results, showing 100 occupations and the 71 kinds of math they require each day! Includes answers.

Problem Parade Oct 13 2021 SUMMARY: 16 sets of maths problems for grades 4-6.

**Guide to Math Materials** Sep 19 2019 Do the new math standards have you scrambling? Have you been searching for pattern blocks, multilink cubes, prisms, tangrams, or puzzles to use in your next lesson? Do you want to know where to find the best calculators, math books, games, reproducibles, toys, or other math materials? You'll find math resources quickly and easily with Perry's new guide! Organized by such topics as problem solving, estimation, number sense and numeration, and geometry and spatial relationships, this book shows you where to find the manipulatives and materials you need to support the new NCTM standards. Each product is briefly described along with its classroom applications. Materials of exceptional quality and value are indicated. Even the addresses of publishers and suppliers are given. If you're looking for ways to make the implementation of the standards easier, you'll want this book. It's a great resource and a real time-saver!

**Number Sense** Dec 03 2020 Reproducible pages with simple-to-use, 10-minute activities to help students learn to think about and use numbers in everyday situations.

**Fractions and Decimals** Apr 26 2020 Spark Student-Powered Learning Experiences. These visually appealing Teacher Resource Books have everything you need to motivate even the most reluctant learner. Each book covers key math topics using 100 innovative, real-life problems and engaging activities.

Active Learning for Twos Oct 25 2022 Provides games and activities designed to foster the physical, social, and intellectual growth of two-year-old infants

MCP Mathematics Mar 18 2022 MCP Mathematics promotes mathematical success for all students, especially those who struggle with their core math program. This trusted, targeted program uses a traditional drill and practice format with a predictable, easy-to-use lesson format. MCP Math is flexible and adaptable to fit a variety of intervention settings including after school, summer school, and additional math instruction during the regular school day. By teaching with MCP Math, you can: Provide targeted intervention through a complete alternative program to core math textbooks. Help students learn and retain new concepts and skills with extensive practice. Prepare students at a wide range of ability levels for success on standardized tests of math proficiency.

Fibonacci Numbers in Nature Jun 09 2021 Presents botanical and zoological drawings to demonstrate examples in nature of the Fibonacci sequence of numbers.

**Tangramath** Aug 31 2020 Tangram puzzle shapes and problems used to teach or revise concepts such as shape, size, congruence, similarity, properties of polyhedra, symmetry and area.

More Plexers Nov 14 2021 Gives word puzzles to encourage persons to think logically and decisively.

**Math Games and Activities** Nov 21 2019 Each volume features more than 300 reproducible games, activity worksheets, and instructional aids. Vol. 1 (grades K-5): whole number arithmetic, geometry, measurement. Vol. 2 (grades 4-8): fractions, whole numbers, decimals, percents, word problems. Answers included.

**Introduction to Line Designs** Aug 19 2019

**Filling and Wrapping** Sep 12 2021

**Writers in Training** Mar 26 2020

**Number Sense** Apr 07 2021 Reproducible pages with simple-to-use, 10-minute activities to help students learn to think about and use numbers in everyday situations.

**Mathematical Thinking at Grade 1** May 20 2022 Investigations in Number, Data, and Space ( 2006) components for Grade 1.

*Critical Thinking Activities in Patterns, Imagery, Logic* Sep 24 2022 Activities to help students develop three important elements of critical thinking in mathematics: recognizing patterns, using visual imagery, and logical reasoning.-- Pattern activities -- working as detectives to discern mystery numbers and numerical patterns-- Imagery activities -- using the imagination to explore symmetry, congruence, rotation, part-whole relations, similarity, mapping-- Logic problems -- finding winning strategies, applying deductive logic, solving number sentences, and classifying by attributesBlackline masters with answers keys.

Favorite Problems Nov 26 2022

*Dale Seymour Publications, Thinking Algebraically, Level D Student Edition 2003 C* Feb 17 2022 The word "algebra" is not commonly heard in elementary classrooms, but the mathematical investigations in these grades frequently include elements of algebraic thinking/reasoning, and building students' algebra skills.To address the call for "Algebra for All" from NCTM, this classroom-tested, standards-based program helps elementary students develop a strong foundation in algebra reasoning to build the skills necessary for success in Algebra in the secondary grades.

**Time and Money** Oct 01 2020 Hot Math Topics is the exciting new series from Dale Seymour Publications that offers hands-on activities to promote real-world math thinking. Included in the series are two attractively illustrated resource books for each grade level (grades 1-5) that cover key math topics with 100 innovative, real-world problems and tasks per book. The books can be used by children in class or at home with their families.

**Read It! Draw It! Solve It! - Grade 2** Nov 02 2020 Each book contains 180 problems, one for each day of the school year. Students have to read the word problem, which emphasizes a phonetic element, then solve it by drawing, and write down their response. For grades 1-3.
