Bedside Approach to Autonomic Disorders Nov 03 2020 This book is a guide to the everyday clinical management of disorders of the autonomic nervous system, from identification of the key symptoms of autonomic involvement and comprehensive history taking to choice of treatment. The book will assist the reader in determining the anatomic distribution of the disease, as well as underlying autonomic syndromes, and in transforming the clinical picture into a coherent explanation of the patient's autonomic problem. In addition, guidelines are provided on selection of the most appropriate autonomic and laboratory tests and formulation of appropriate non-pharmacological and pharmacological management strategies. With cases drawn from clinical experience and a list of available online resources, *Bedside Approach to Autonomic Disorders* will aid the reader in acquiring the skills that are mandatory in order to put patients on the right clinical track. It will be a valuable guide for trainees and young doctors interested in autonomic disorders from the fields of neurology, internal medicine, cardiology, diabetology, and urology.

Manual of Grammatical Interfaces in Romance Dec 28 2022 Different components of grammar interact in non-trivial ways. It has been under debate what the actual range of interaction is and how we can most appropriately represent this in grammatical theory. The volume provides a general overview of various topics in the linguistics of Romance languages by examining them

through the interaction of grammatical components and functions as a state-of-the-art report, but at the same time as a manual of Romance languages.

Approaches to the Analysis of Production Activity at Archaeological Sites May 09 2021 Proceedings of a workshop held in Berlin, 2018, focusing on manufacturing activities identified at archaeological sites. New excavation techniques, ethnographic research, archaeometric approaches, GIS, experimental archaeology, and theoretical issues associated with how researchers understand production in the past, are presented here.

The Help-Yourself City Apr 20 2022 When local governments neglect public services or community priorities, how do concerned citizens respond? In *The Help-Yourself City*, Gordon Douglas looks closely at people who take urban planning into their own hands with homemade signs and benches, guerrilla bike lanes and more. Douglas explores the frustration, creativity, and technical expertise behind these interventions, but also the position of privilege from which they often come. Presenting a needed analysis of this growing trend from vacant lots to city planning offices, *The Help-Yourself City* tells a street-level story of people's relationships to their urban surroundings and the individualization of democratic responsibility.

Manual of Romance Phonetics and Phonology Jul 23 2022

This handbook is structured in two parts: it provides, on the one hand, a comprehensive (synchronic) overview of the phonetics and phonology (including prosody) of a breadth of Romance languages and focuses, on the other hand, on central topics of research in Romance segmental and suprasegmental phonology, including comparative and

diachronic perspectives. Phonetics and phonology have always been a core discipline in Romance linguistics: the wide synchronic variety of languages and dialects derived from spoken Latin is extensively explored in numerous corpus and atlas projects, and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages. This rich empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into (incipient, ongoing, or concluded) processes of phonological change. The volume can be read both as a state-of-the-art report of research in the field and as a manual of Romance languages with special emphasis on the key topics of phonetics and phonology.

Handbook of Neuro-Oncology Neuroimaging Sep 01 2020  
Remarkable progress in neuro-oncology due to increased utilization of advanced imaging in clinical practice continues to accelerate in recent years. Refinements in magnetic resonance imaging (MRI) and computed tomography (CT) technology, and the addition of newer anatomical, functional, and metabolic imaging methods, such as MRS, fMRI, diffusion MRI, and DTI MRI have allowed brain tumor patients to be diagnosed much earlier and to be followed more carefully during treatment. With treatment approaches and the field of neuro-oncology neuroimaging changing rapidly, this second edition of the Handbook of Neuro-Oncology Neuroimaging is so relevant to those in the field, providing a single-source, comprehensive, reference handbook of the most up-to-date clinical and technical information regarding the application of neuro-imaging techniques to brain tumor and neuro-oncology patients. This new volume will have updates on all of the material from the first edition, and in addition will feature several new important chapters covering diverse topics such as advanced imaging techniques in

radiation therapy, therapeutic treatment fields, response assessment in clinical trials, surgical planning of neoplastic disease of the spine, and more. It will also serve as a resource of background information to neuroimaging researchers and basic scientists with an interest in brain tumors and neuro-oncology. Provides a background to translational research and the use of brain imaging for brain tumors. Contains critical discussions on the potential and limitations of neuroimaging as a translational tool for the diagnosis and treatment of brain tumor and neuro-oncology patients. Presents an up-to-date reference on advanced imaging technologies, including computed tomography (CT), magnetic resonance imaging (MRI), and positron emission tomography (PET), as well as the recent refinements in these techniques.

Subject Headings Manual      May 21 2022

Textbook of Palliative Care Communication

Mar 07 2021

The Textbook of Palliative Care Communication is the authoritative text on communication in palliative care, providing a compilation of international and interdisciplinary perspectives. The volume was uniquely developed by an interdisciplinary editorial team to address an array of providers including physicians, nurses, social workers, and chaplains, and unites clinicians with academic researchers interested in the study of communication. By featuring practical conversation and curriculum tools stemming from research, this text integrates scholarship and inquiry into translatable content that others can use to improve their practice, teach skills to others, and engage in patient-centered communication. The volume begins by defining communication, explicating debatable issues in research, and highlighting specific approaches to studying communication in a palliative care context. Chapters focus on health literacy and cultural communication, patient and family communication,

barriers and approaches to discussing palliative care with specific patient populations, discussing pain, life support, advance care planning, and quality of life topics such as sexuality, spirituality, hope, and grief. Team communication in various care settings is outlined and current research and education for healthcare professionals are summarized. Unique to this volume are chapters on conducting communication research, both qualitatively and quantitatively, to promote further research in palliative care.

Library of Congress Subject Headings                      Nov 15 2021

The Mindful College Applicant                      Jan 05 2021 In a time when crossing guards are posted to prevent high schoolers from jumping in front of trains and parents shelling out \$100K for packaged college applications, education has become a mad race to grab the Ivy ring. Based on experience in admissions with the Ivy League and other highly competitive universities, emerging scientific evidence on the impact of emotional intelligence and mindfulness, and discussions with admissions officers, students, families, and high school counselors, this book is a guide on how to go through the existing, however brutish, college applications process with less stress and anxiety, and more joy and mindfulness. Equipped with the powerful tools of emotional intelligence and mindfulness, this work acknowledges the reality of what the process is, and challenges young people to reach for a more meaningful ideal for themselves. This book shares a look at the holistic admissions process and offers an alternative one to the current climate of untenable stress. This updated model aims to shift mindsets from treating the admissions process as a ruthless competition with one externally-prescribed definition of success, to a step in a lifelong journey of curiosity and wonder. By building self-awareness, compassion, resilience, it's possible to navigate the process with greater

authenticity, balance, and joy.

Psychopathology in Women Aug 20 2019 This book examines sex and gender differences in the causes and expression of medical conditions, including mental health disorders. Sex differences are variations attributable to individual reproductive organs and the XX or XY chromosomal complement. Gender differences are variations that result from biological sex as well as individual self-representation which include psychological, behavioural, and social consequences of an individual's perceived gender. Gender is still a neglected field in psychopathology, and gender differences is often incorrectly used as a synonym of sex differences. A reconsideration of the definition of gender, as the term that subsumes masculinity and femininity, could shed some light on this misperception and could have an effect in the study of health and disease. This second edition of Psychopathology clarifies the anthropological, cultural and social aspects of gender and their impact on mental health disorders. It focuses on gender perspective as a paradigm not only in psychopathology but also in mental health disorders. As such it promotes open mindedness in the definition and perception of symptoms, as well as assumptions about those symptoms, and raises awareness of mental health.

Manual of Discourse Traditions in Romance \_\_\_\_\_ Sep 25 2022  
Discourse Traditions are a key concept of diachronic Romance linguistics. The present manual aims to establish this approach at an international level by assembling contributions that introduce its theoretical foundations, discuss connections with alternative approaches of text and discourse analysis, show the relevance of Discourse Traditions for the history of Romance languages, and explore possibilities for future applications of the concept.

Air Pollution XXI Feb 24 2020 Containing papers

presented at the twenty-first in a successful series of conferences on the modelling, monitoring and management of air pollution, the book *Air Pollution XXI* covers what has become a widespread and growing challenge to the international community. Governments face a need to balance concern over its known impacts on local and global health and the environment with improving or maintaining economic development. The key to achieving that balance is to use science to identify the nature and scale of air pollution impacts and to formulate effective policies and regulations. As our knowledge and application of the science of air pollution improves, we are better able to predict, assess and mitigate the implications air pollution has for local, regional, national and international economic systems. The papers deal in the book treat advances in a wide variety of topics, including: Air pollution modelling; Monitoring and measuring; Air quality management; Indoor air pollution; Aerosols and particles; Emission Studies; Air pollution chemistry; Source identification; Global and regional studies; Exposure and health Effects; Economics of air pollution control; Policy and legislation; Case studies; Innovative technologies.

Student Activities Manual for Tognozzi/Cavatorta's Ponti, 3rd Oct 26 2022 Revised and streamlined, the SAM consists of workbook and lab manual activities with skill-based approach to vocabulary and grammar practice (single-response, semi-controlled, and open-ended). A video program is now included in the SAM as well, with activities written expressly to practice these skills. For the online environment, up to 80 percent single-response activities allow for independent practice of vocabulary and structures. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Mariology at the Beginning of the Third Millennium  
04 2020 Since the Second Vatican Council the place of

Dec

Mary in theology and generally in the life of the Church has been at times muted. This is perhaps understandable given the debates concerning Mary's "place" in the documents of Vatican II. In an ecumenical age, it was argued, the church needed a less triumphalist Mariology and piety with a greater focus on Mary as model disciple. In certain respects this has led to a dichotomy between the continued Marian piety of many faithful (and, truth be told, the piety of the post-conciliar popes) and a theological timidity concerning Mary. This collection of chapters seeks to address the current situation of Mariology. Taken as a whole these chapters represent a welcome call for renewal and reawakening in Mariology. The collection is also delightfully eclectic, both in terms of topics covered and in terms of the denominational and academic backgrounds of the authors.

MANUAL DU LIBRAIRE ET DE L'AMATEUR DE LIVRES      Jun 10  
2021

Pavement and Asset Management    Apr 27 2020 Pavement and Asset Management contains contributions from the World Conference on Pavement and Asset Management (WCPAM 2017, Baveno, Italy, 12-16 June 2017). For the first time, the European Pavement and Asset Management Conference (EPAM) and the International Conference on Managing Pavement Assets (ICMPA) were joining forces for a global event that aimed not only at academics and researchers, but also at practitioners, engineers and technicians dealing with everyday tasks and responsibilities related to transport infrastructures pavement and asset management. Pavement and Asset Management covers a wide range of topics, from emerging research to engineering practice, and is grouped under the following themes: - Data quality and monitoring - Economics, political and environmental management, strategies - Deterioration models - Key performance indicators - PMS-case studies - Design and materials - M&R treatments - LCA & LCCA -

Risk and safety - Bridge and tunnel management - Smart infrastructure and IT Pavement and Asset Management will be valuable to academics and professionals interested and/or involved in issues related to transport infrastructures pavement and asset management.

Fashion Communication in the Digital Age Jul 11 2021

This book represents a major milestone in the endeavour to understand how communication is impacting on the fashion industry and on societal fashion-related practices and values in the digital age. It presents the proceedings of FACTUM 19, the first in a series of fashion communication conferences that highlights important theoretical and empirical work in the field. Beyond documenting the latest scientific insights, the book is intended to foster the sharing of methodological approaches, expand the dialogue between communications' studies and fashion-related disciplines, help establish an international and interdisciplinary network of scholars, and offer encouragement and fresh ideas to junior researchers. It is of high value to academics and students in the fields of fashion communication, fashion marketing, visual studies in fashion, digital transformation of the fashion industry, and the cultural heritage dimension of fashion. In addition, it is a key resource for professionals seeking sound research on fashion communication and marketing.

Shadows of Doubt Feb 06 2021 Named a Book of the Year by History Today In a compelling examination of the hermeneutical and epistemological anxieties gripping both the early modern and our current world, Stefania Tutino shows that post-Reformation Catholicism did not simply usher in modernity, but postmodernity as well. This deft study provides new insight into and a fresh perspective on the context of the Protestant Reformation and the Catholic response to it. Shadows of Doubt provides a collection of case-studies centered on the relationship between language, the truth of men, and the

Truth of theology. Most of these case-studies illuminate little-known figures in the history of early modern Catholicism. While the militant aspects of post-Tridentine Catholicism can be appreciated by studying figures such as Robert Bellarmine or Cesare Baronio, who were the solid pillars of the intellectual and theological structure of the Church of Rome, an understanding of the more fragile and shadowy aspects of early modernity requires an exploration of the demimonde of post-Reformation Catholicism. Tutino examines the thinkers whom few scholars mention and fewer read, demonstrating that post-Reformation Catholicism was not simply a world of solid certainties to be opposed to the Protestant falsehoods, but also a world in which the stable Truth of theology existed alongside and contributed to a number of far less stable truths concerning the world of men. Post-Reformation Catholic culture was not only concerned with articulating and affirming absolute truths, but also with exploring and negotiating the complex links between certainty and uncertainty. By bringing to light this fascinating and hitherto largely unexamined side of post-Tridentine Catholicism, Tutino reveals that post-Reformation Catholic culture was a vibrant laboratory for many of the issues that we face today: it was a world of fractures and fractured truths which we, with a heightened sensitivity to discrepancies and discontinuities, are now well-suited to understand.

Reliability and Reproducibility in Functional Connectomics Jul 31 2020 Functional connectomics enables researchers to monitor interactions among thousands of units within the whole brain simultaneously by using various vivo imaging technologies. For example, resting-state functional magnetic resonance imaging can image low-frequency fluctuations in the spontaneous brain activities, representing a popular tool for macro-scale functional connectomics to characterize individual

differences in normal brain function, mind-brain associations, and the various disorders. Reliability and reproducibility represents the most fundamental and critical aspect for the human brain functional connectomics to both research and clinical practice. Unfortunately, lacking a data platform for researchers to rigorously explore the reliability and reproducibility of the functional connectome indices has been a bottleneck of further development of clinically oriented imaging markers in the field. Recent efforts on open neuroscience, such as Consortium for Reliability and Reproducibility, Human Connectome Project and OpenfMRI, provide the data for the field to refine and evaluate reliability and reproducibility of novel methods as well as those with widespread usage but without sufficient consideration of reliability. This Frontiers Research Topic aims at bringing together contributions from researchers in brain imaging, neuroscience, computer sciences, applied mathematics, psychology and related fields from an interdisciplinary perspective. By focusing on cutting-edge research across these fields, this topic will create new agenda on quantifying the reliability and reproducibility of the myriad connectomics-based measures and informing expectations regarding the potential of biomarker discovery.

Town and Infrastructure Planning for Safety and Urban Quality Jan 25 2020 Today, citizens advocate greater environmental sustainability, better services and the improvement of urban quality by promoting safer mobility, especially for the most vulnerable road users. Addressing these issues, Town and Infrastructure Planning for Safety and Urban Quality contains papers presented at the XXIII International Conference "Living and Walking in Cities" (Brescia, Italy, 15-16 June 2017). The contributions discuss town planning issues, look at best practices and research findings across the

broad spectrum of urban and transport planning, with particular attention to the safety of pedestrians in the city. The main topics of the book are: - Urban regeneration. A focus on walkability (vulnerable road users; boosting and planning soft mobility) - Road safety and urban planning - vulnerable road users: planning for safety (integrated land use and transport planning; methodological approaches and case studies; integrated tools for town and transport planning; shaping public spaces and walkability; transport solutions for tourism) - Innovative and traditional solutions for Italian cities - Extra-European approaches to town and infrastructure planning - Different perspectives in road safety: prevention, infrastructure, sharing - Advances in road safety

Town and Infrastructure Planning for Safety and Urban Quality is a powerful plea for a multi-disciplinary and comprehensive approach to urban mobility and planning, and will be of interest to academics, consultants and practitioners interested in these areas.

Handbook of Cultural Factors in Behavioral Health  
29 2020 Having the knowledge and capacity to deliver therapy to a diverse population is recognized as benefiting client-therapist relationships and producing positive clinical outcomes. In fact, the APA requires that psychologists be aware of and respect the cultural characteristics of their clients which includes psychologists being aware of any biases and prejudice they may hold. Being aware of cultural characteristics, which include age, gender, ethnicity, race, religion and other cultural factors, is important. In the United States, minority ethnic groups are growing substantially, with 28% of the U.S. population identifying as races other than white (U.S. Census, 2016). Additionally, approximately 65 million people in America speak a foreign language that is not English, with over 25 million people having limited English

May

language proficiency. With a diverse pool of clients, helping professionals should be better prepared to work with diverse clients. This handbook offers clinicians a comprehensive resource with which to work with diverse populations. The myriad discussions among the chapters include: Ethical guidelines for working with culturally diverse clients Cultural considerations in psychological assessment and evaluation Behavioral health service delivery with culturally diverse clients Cross-cultural factors in the treatment of trauma related disorders Cultural considerations in the assessment and behavioral treatment of substance use disorders Handbook of Cultural Factors in Behavioral Health expertly offers clinicians a comprehensive set of resources and tools that will assist them working with diverse clients. Clinicians working with culturally diverse clients, as well as researchers and students learning about how cultural factors are relevant to the helping profession will all find this volume an integral addition to their library.

Fiat Panda Owner's Workshop Manual      Jun 29 2020 This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can do the work.

Defining Authorship, Debating Authenticity      Dec 24 2019 This volume explores the themes of authorship and authenticity – and connected issues – from the Classical Antiquity to the Renaissance. Its reflection is constructed within a threefold framework. A first section includes topics dealing with dubious or uncertain attribution of ancient works, homonymous writers, and problems regarding the reliability of compilation literature. The middle section goes through several issues concerning authorship: the balance between the author's contribution to their own work and

the role of collaborators, pupils, circles, reviewers, scribes, and even older sources, but also the influence of different compositional stages on the concept of 'author', and the challenges presented by anonymous texts. Finally, a third crucial section on authenticity and forgeries concludes the book: it contains contributions dealing with spurious works – or sections of works – , mechanisms of interpolation, misattribution, and deliberate forgery. The aim of the book is therefore to exemplify the many nuances of the complex problems of authenticity and authorship of ancient texts.

Palliative Psychology \_\_\_\_\_ Jun 22 2022 Palliative Psychology provides clinical, evidence-based training in palliative and end of life care for clinical psychologists to accomplish specific therapeutic goals. Chapters provide a clear road map for approaching assessment and treatment by reviewing the use of psychotropic medications for patients with advanced and terminal illness, basic but important aspects of pain medication, in depth psychological and psychiatric assessment for patients with advanced illness and their caregivers, and assessment tools, highlighting the specific clinical contexts for their use. The volume also includes evidence-based psychotherapy models that have been shown effective in treating various manifestations of psychological distress in patients and caregivers. In addition to clinical topics, Palliative Psychology addresses crucial and often sensitive professional issues, including communication and collaboration with medical providers and issues of stress and burnout. Psychologists will learn how to best communicate the results of their assessments and treatment plan goals to other care providers in order to foster collaboration and better position themselves as advocates for their patients. Insight-oriented and practical suggestions will help clinicians manage the emotional intensity of

this work and channel the therapeutic potential of their emotional reactions into their work with patients and caregivers.

Moody's International Manual            Oct 14 2021

Geriatric Psychiatry Study Guide            Oct 02 2020 Trainees

in subspecialty of geriatric psychiatry and general psychiatry need to master core competencies in geriatric psychiatry in order to practice. This book is designed to provide short-answer question-based learning centering around the core curriculum topics in geriatric psychiatry and is primarily ideal not only for medical students, residents, and fellows, but also for psychiatrists preparing for re-certification. This book features approximately 300 short-answer questions on geriatric psychiatry topics, each comprising the stem of a brief clinical scenario or concise question with expected number of answers. The book also features detailed teaching notes, graphics, and the respective source references. The format is consistently structured from chapter to chapter, practical and concise, and designed to enhance the reader's diagnostic and management ability and clinical understanding. Each answer includes a concise discussion, pertinent illustrations, and source references. This text is a valuable reference and teaching tool that provides an opportunity for learning across a rapidly growing field. The material covered matches the existing postgraduate curricula in geriatric psychiatry and helps prepare candidates for their specialty and subspecialty certification examinations. The cases map well to both the American Geriatric Psychiatry Association and Canadian Academy of Geriatric Psychiatry as well as other international postgraduate curricula. The book covers main topics within geriatric psychiatry, some such as substance use disorders and sexuality and sexual dysfunction in later life. As the Baby Boomers age, this reference will continue to be a valuable staple in

geriatric workforce training. Geriatric Psychiatry Study Guide is the ultimate resource for students, residents, fellows, psychiatrists, psychologists, family practitioners, nurses, social workers, and all clinicians rising to the challenges of the mental health segment of the geriatric workforce.

Student Activity Manual for Riga/Phillips' Ciao! 2022 You'll sharpen your ear for spoken Italian, practice listening to and speaking Italian in real-life situations, and expand your understanding of Italian culture with this practical Italian workbook and lab manual. It's a valuable companion to the CIAO! program. Filled with vocabulary-expansion activities, grammatical exercises, and illustration- and reality-based activities, this Student Activities Manual gives you the practice you need to succeed. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Nov 27

SAM for Sandstedt/Kite's Espacios Sep 13 2021 This essential study partner includes additional practice of grammar, vocabulary, and writing. Abundant listening comprehension practice with simulated conversations and pronunciation practice also is included. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The Helping Professional's Guide to End-of-Life Care Aug 24 2022 Nearly half of people at the end of life will receive hospice care, but few psychologists, nurses, physicians, chaplains, and hospice workers have been trained specifically to recognize and address the psychological, social, and emotional issues that may arise in patients who are dying. Patients in the midst of advanced terminal illness may experience a variety of distressing emotions, and may feel anxious, frightened, regretful, or desperate. This guide was created specifically to guide helping professionals of all kinds

through the process of working through patients' psychological issues to allow them peace and comfort in their final moments. *The Helping Professional's Guide to End-of-Life Care* clarifies the spiritual and emotional care that patients need and presents an evidence-based approach integrating cognitive behavioral therapy (CBT), transpersonal psychotherapy, hypnosis, mindfulness, and guided imagery to help patients manage emotional distress at the end of life. Through case conceptualizations and detailed treatment planning guidance, readers learn to formulate comprehensive assessment and treatment plans for patients and gain skills that will help them manage the emotional intensity of this work. This secular, professional treatment model can be applied to patients of any religious or spiritual background. The book also addresses integrating the patient's therapeutic team with the medical team, addressing the emotional needs of friends and family of the dying, crisis intervention for suicidal patients, working with clients on psychotropic medications, and how helping professionals can manage their own emotions to become more effective clinicians.

*Grief and Bereavement in the Adult Palliative Care Setting* Apr 08 2021 For patients and family caregivers the journey through illness and transitions of care is characterized by a series of progressive physical and emotional losses. Grief reactions represent the natural response to those losses. Grief is defined by a constellation of physical, cognitive, emotional and spiritual manifestations, varying in length and severity. While grief reactions are common and expected responses to loss, they have the potential to cause significant suffering. And, while grief is not a disease, it can develop into a pathological process warranting specialized treatment. Additionally, some aspects of grief overlap with the symptoms of clinical depression and anxiety, making diagnosis difficult.

Grief and Bereavement in the Adult Palliative Care Setting provides practical, evidence-based, and clinically effective approaches to understanding the multifaceted nature of grief and bereavement in patients with advanced illness and their caregivers. This handbook is an ideal tool for palliative care providers of various disciplines who provide direct clinical services to patients and family members. It assists clinicians in recognizing and identifying grief reactions as unique expressions of patients and caregivers' history and psychological functioning. Primary care physicians who provide care to patients and families will also find this practical assessment and treatment guide helpful. They will learn how to best support bereaved patients and caregivers when grief is uncomplicated, and when to choose more active interventions that may include appropriate referrals to mental health professionals.

Manual de istorie universal? modern? \_\_\_\_\_ Mar 27 2020

Getting to Zero Alcohol-Impaired Driving Fatalities  
22 2019 Alcohol-impaired driving is an important health and social issue as it remains a major risk to Americans' health today, surpassing deaths per year of certain cancers, HIV/AIDS, and drownings, among others, and contributing to long-term disabilities from head and spinal injuries. Progress has been made over the past decades towards reducing these trends, but that progress has been incremental and has stagnated more recently. Getting to Zero Alcohol-Impaired Driving Fatalities examines which interventions (programs, systems, and policies) are most promising to prevent injuries and death from alcohol-impaired driving, the barriers to action and approaches to overcome them, and which interventions need to be changed or adopted. This report makes broad-reaching recommendations that will serve as a blueprint for the nation to accelerate the progress in reducing alcohol-impaired driving fatalities.
