*Key Duties of International Investment
Arbitrators* May 15 2021 This book critically
analyses how arbitration cases, institutional
rules and emerging codes of conduct in the
international arbitration sector have dealt with

a series of key arbitrator duties to date. In
addition, it offers a range of feasible and well-
grounded proposals regarding investment
arbitrators' duties in the future. The following
aspects are examined in depth: the duty of
disclosure the duty to investigate the duty of
diligence and integrity, which in turn may be
divided into temporal availability, a non-
delegation of responsibilities, and adhering to
appropriate behaviour the duty of
confidentiality, and other duties such as
monitoring arbitration costs, or continuous
training. Investment arbitration is currently
undergoing sweeping changes. The EU
proposal to create a Multilateral Investment
Court incorporates a number of ground-
breaking developments with regard to
arbitrators. Whether this new model of
permanent "members of the court" will ever
become a reality, or whether the classical ex-
parte arbitrator system will manage to retain
its dominance in the investment arbitration
milieu, this book is based on the assumption
that there is a current need to re-examine and
rethink the main duties of investment
arbitrators. Apart from being the first
monograph to analyse these duties in detail, the

book will spark a crucial debate among international scholars and practitioners. It is essential to identify arbitrators' duties and find consensus on how they should be reshaped in the near future, so that these central figures in investment arbitration can reinforce the legitimacy of a system that is currently in crisis.

[The Impact of Regulation on International Investment in Finland](#) Jan 29 2020 The Impact of Regulation on International Investment in Finland examines what drives FDI into Finland and which domestic regulatory aspects may discourage foreign investment. The report analyses trends in FDI flows towards Finland and other Nordic-Baltic countries and discusses the benefits of foreign investment for the Finnish economy.

[Advance\\$ in International Investment\\$](#) Sep 30 2022 To better understand the full range of international investments available (which, with China and India opening up to foreign investors, is greater than ever), this book identifies different asset classes and current hot topics such as new financial instruments in a changing global environment.

The Geography of International Investment Mar 25 2022 Multinationals have become increasingly important to the world economy. Overseas production by U.S. affiliates is three times U.S. exports, for example. Who is investing where, for sales where?

[Reconceptualizing International Investment Law from the Global South](#) Aug 30 2022 This book shows how the reform in investment

regulation contributes to a broader attempt to transform the international economic order.

Due Diligence in the International Legal Order Dec 30 2019 This book provides a comprehensive analysis of the content, scope, and function of due diligence across various areas of international law. Looking at current tendencies towards proceduralisation and more proactive risk management, it reveals the promises and limits of due diligence as a concept for enhancing accountability and compliance.

International Investment Strategies in the People's Republic of China May 03 2020 First published in 1998, this volume explores international investment strategies as mainly antecedent decisions about what, when, where, and how a transnational investor should invest in the pursuit of its sustained competitive advantages in the global marketplace. The objective of this book is to provide international managers with conceptual frameworks, general guidelines, governmental policies, and insightful evidence useful for their strategic investment decisions involving the People's Republic of China, a country which is now the largest emerging economy and the biggest foreign direct investment absorption developing country in the world.

International Investment Law and Policy in Africa Nov 08 2020 This book studies the international investment law regime in Africa and provides a comprehensive analysis of the current treaty practices in Africa from global,

regional and domestic perspectives. It develops a public interest regulation theory to highlight the role of investment regulation in sustainable development and the protection of human rights. In doing so, the book identifies seven factors that should be considered by arbitrators in resolving international investment disputes that affect the public interest. It considers how corporations can be held accountable through investment treaties in the absence of a global treaty on business and human rights while protecting the rights of investors and their investments. Furthermore, the book explores the current objectives and features of investor-state dispute settlement (ISDS) as well as the deficiencies and its intersection with the rule of law. It identifies alternatives for ISDS and the extent to which these alternatives address the objectives of attracting investment, depoliticise investment disputes, promote the rule of law and offer remedies to investors. These solutions are offered in relation to the protection of human rights, the promotion of sustainable development and the right of states to introduce domestic public interest regulation. Finally, the book takes a prospective stance and discusses future trends for dispute settlement and investment rulemaking in Africa.

Globalization and International Investment Jul 05 2020 This volume brings together a broad range of articles on international law and foreign investment which together provide a contemporary overview of the diverse range of issues and perspectives which continue to

exercise policy-makers and scholars alike.

Central to this collection is the tension between market-oriented reforms on the one hand, raising issues of market access and protection of investors, and corporate social responsibility discourses on the other, raising concerns about environmental protection and respect for human and labour rights. Regional perspectives on these issues reveal differing priorities and approaches.

The International Law on Foreign Investment Feb 21 2022 This book is a thought-provoking and authoritative text on this fast moving field of international law.

Public Health in International Investment Law and Arbitration Jun 03 2020 As a wide variety of state regulations allegedly aimed at protecting public health may interfere with foreign investments, a tension exists between the public health policies of the host state and investment treaty provisions. Under most investment treaties, States have waived their sovereign immunity, and have agreed to give arbitrators a comprehensive jurisdiction over what are essentially regulatory disputes. Some scholars and practitioners have expressed concern regarding the magnitude of decision-making power allocated to investment treaty tribunals. This book contributes to the current understanding of international investment law and arbitration, addressing the fundamental question of whether public health has and/or should have any relevance in contemporary international investment law and policy.

Integrating Sustainable Development in International Investment Law Feb 09 2021 The current international investment law system is insufficiently compatible with sustainable development. To better address sustainable development concerns associated with transnational investment activities, international investment agreements should be made more compatible with sustainable development. *Integrating Sustainable Development in International Investment Law* presents an important systematic study of the issue of sustainable development in the international investment law system, using conceptual, normative and governance perspectives to explore the challenges and possible solutions for making international investment law more compatible with sustainable development. Chi suggests that to effectively address the sustainable development concerns associated with transnational investment activities, the international investment agreements system should be reformed. Such reform should feature redesigning the provisions of the agreements, improving the structure of international investment agreements, strengthening the function of soft law, engaging non-state actors and enhancing the dispute settlement mechanism. The book is primarily aimed at national and international treaty and policy-makers, lawyers and scholars. It is also suitable for graduate students studying international law and policy-making.

The Evolving International Investment Regime Oct 20 2021 With the growth of the global economy over the past two decades, foreign direct investment (FDI) laws, at both the national and international levels, have undergone rapid development in order to strengthen the protection standards for foreign investors. In terms of international investment law, a network of international investment agreements has arisen as a way to address FDI growth. FDI backlash, reflective of more restrictive regulation, has also emerged. *The Evolving International Investment Regime* analyzes the existing challenges to the international investment regime, and addresses these challenges going forward. It also examines the dynamics of the international regime, as well as a broader view of the changing global economic reality both in the United States and in other countries. The content for the book is a compendium of articles by leading thinkers, originating from the International Investment Conference "What's New in International Investment Law and Policy?"

International Protection of Investments Jul 29 2022 This book outlines the protection standards typically contained in international investment agreements as they are actually applied and interpreted by investment tribunals. It thus provides a basis for analysis, criticism, and stocktaking of the existing system of investment arbitration. It covers all main protection standards, such as

expropriation, fair and equitable treatment, full protection and security, the non-discrimination standards of national treatment and MFN, the prohibition of unreasonable and discriminatory measures, umbrella clauses and transfer guarantees. These standards are covered in separate chapters providing an overview of textual variations, explaining the origin of the standards and analysing the main conceptual issues as developed by investment tribunals. Relevant cases with quotations that illustrate how tribunals have relied upon the standards are presented in depth. An extensive bibliography guides the reader to more specific aspects of each investment standard permitting the book's use as a commentary of the main investment protection standards.

International Investment Management Dec 02 2022 International Investment Management: Theory, Practice, and Ethics synthesizes investment principles, Asian financial practice, and ethics reflecting the realities of modern international finance. These topics are studied within the Asian context, first through the medium of case studies and then via the particular conditions common in those markets including issues of religion and philosophy. This book has a three part structure beginning with the core principles behind the business of investments including securities analysis, asset allocation and a comprehensive analysis of modern finance theory. This gives students a comprehensive understanding of investment management by going through the theories,

ethics and practice of investment management. This text provides a detailed overview of International Banking Law and International Securities Regulation, alongside legal and ethics case studies which are located in the practice section of the book. This book is an essential text for business and law school students who wish to have a thorough understanding of investment management. It is also perfect as a core text for undergraduate finance majors and graduate business students pursuing a finance, and/or business ethics concentration, with particular focus on Asia.

Improving International Investment Agreements Nov 01 2022 This book presents the reflections of a group of researchers interested in assessing whether the law governing the promotion and protection of foreign investment reflects sound public policy. Whether it is the lack of "checks and balances" on investor rights or more broadly the lack of balance between public rights and private interests, the time is ripe for an in-depth discussions of current challenges facing the international investment law regime. Through a survey of the evolution in IIA treaty-making and an evaluation from different perspectives, the authors take stock of developments in international investment law and analyze potential solutions to some of the criticisms that plague IIAs. The book takes a multidisciplinary approach to the subject, with expert analysis from legal, political and economic scholars. The first part of the book

traces the evolution of IIA treaty-making whilst the other three parts are organised around the concepts of efficiency, legitimacy and sustainability. Each contributor analyzes one or more issues related to substance, treaty negotiation, or dispute resolution, with the ultimate aim of improving IIA treaty-making in these respects. Improving International Investment Agreements will be of particular interest to students and academics in the fields of International Investment Law, International Trade Law, Business and Economics.

Chinese International Investments Sep 26 2019 This book provides authoritative academic and professional insights into the strategies of Chinese Foreign Direct Investments in Europe, Asia, Africa and the Americas. Distinguished authors from across the world will make a contribution to the growing literature on OFDI (outward foreign direct investment) from China. [International Investment Law: Understanding Concepts and Tracking Innovations A Companion Volume to International Investment Perspectives](#) Apr 25 2022 A comprehensive source of information on four key issues: the definition of investor and investment; the interpretation of umbrella clauses in investment agreements; coverage of environmental, labour and anti-corruption issues; and the interaction between investment and services chapters in RTAs.

China and International Investment Law Jun 27 2022 The first volume in the Silk Road Studies in International Economic Law Series,

China and International Investment Law: Twenty Years of ICSID Membership examines cutting-edge issues of international investment law and arbitration in interaction with China, the second largest economy of the world. The Law of Investment Treaties Mar 13 2021 The rapid growth in investment treaties has led to a burgeoning number of international arbitration decisions that have applied and interpreted treaty provisions in disputes between investors and states concerning their respective rights. This flurry of treaties and arbitral decisions has seen the creation of a new branch of international law- the law of investment claims. In this revised edition, Jeswald Salacuse examines the law of international investment treaties, specifically in relation to its origins, structure, content, and effect, as well as their impact on international investors and investments, and the governments that are parties to them. Investment treaty law is a rapidly evolving field and since publication of the first edition, the law of international investment treaties has both experienced considerable growth and generated extensive controversy. 2011 saw the highest number of new treaty-based arbitration filed under international investment agreements to date, and in July 2014, the Yukos Universal Limited (Isle of Man) v The Russian Federation culminated with awards of over US\$50 billion; a historic record for any arbitration. Controversy in this field has primarily revolved around the investor-state

dispute settlement process, which as thus far involved at least 98 states as respondents. Salacuse captures these developments in this updated edition, examining not only the significant growth in treaties, but the trends that have followed, and their effect on the content and evolution of the law of investment treaties. Specific topics include conditions for the entry of foreign investment and general standards of treatment of foreign investments; monetary transfers; operational conditions; protection against expropriation; dispossession and compensation for losses; dispute settlement, including negotiation, arbitration, and conciliation; and judicial proceedings. *Fair and Equitable Treatment* Mar 01 2020 The concept of fair and equitable treatment, which has assumed prominence in investment relations between States, provides a yardstick by which relations between foreign direct investors and Governments of capital-importing countries may be assessed. In addition to discussing this issue, the publication also takes stock and analysis of: trends in the use of the standards; and models based on State practice. The publication also gives insight into the interaction of fair and equitable treatment standard with other issues and concepts that arise in investment practice. *Investment Law within International Law* Oct 27 2019 Developments within various sub-fields of international law influence international investment law, but changes in investment law also have an impact on the evolution of other

fields within international law. Through contributions from leading scholars and practitioners, this book analyses specific links between investment law and other sub-fields of international law such as the law on armed conflict, human rights, sustainable development, trade, development and EU law. In particular, this book scrutinises how concepts, principles and rules developed in the context of such sub-fields could inform the content of investment law. Solutions aimed at resolving problems in other settings may provide instructive examples for addressing current problems in the field of investment law, and vice versa. The underlying question is whether key sub-fields of public international law, notably international investment law, are open to cross-fertilisation, or, whether they are evolving further into self-contained regimes. **International Challenges in Investment Arbitration** Nov 20 2021 As the proverbial workhorse of international economic law, investment arbitration is heavily relied upon around the globe. It has to cope with the demands of increasingly complex proceedings. At the same time, investment arbitration has come under close public scrutiny in the midst of heated political debate. Both of these factors have led to the field of investment protection being subject to continuous changes. Therefore, it presents an abundance of challenges in its interpretation and application. While these challenges are often deeply rooted in the doctrinal foundations of international law, they

similarly surface during live arbitral proceedings. International Challenges in Investment Arbitration serves not only as a collection of recently debated issues in investment law; it also deals with the underlying fundamental questions at the intersection of investment arbitration and international law. The book is the product of the 1st Bucerius Law Journal Conference on International Investment Law & Arbitration. It combines the current state of knowledge, new perspectives on the topic as well as practical issues and will be of interest to researchers, academics and practitioners in the fields of international investment law, international economic law, regulation and comparative law.

[China's International Investment Strategy](#) Dec 22 2021 Since China adopted its 'open door' policy in 1978, which altered its development strategy from self-sufficiency to active participation in the world market, its goal has remained unchanged: to assist the readjustment of China's economy, to coordinate its modernization programs, and to improve its quality of life. With the 1997 launch of the 'Going Global' policy, an outward focus regarding foreign investment was added, to circumvent trade barriers and improve the competitiveness of Chinese firms. In order to accommodate inward and outward investment, China's participation in the international investment regime has underpinned its efforts to join multilateral investment-related legal instruments and conclude international

investment agreements. This collection, compiled by award-winning scholar Professor Julien Chaisse, explores the three distinct tracks of China's investment policy and strategy: bilateral agreements including those with the US and the EU; regional agreements including the Free Trade Area of the Asia Pacific; and global initiatives, spear-headed by China's presidency of the G20 and its 'Belt and Road initiative'. The book's overarching topic is whether these three tracks compete with each other, or whether they complement one another - a question of profound importance for the country's political and economic future and world investment governance.

International Investments Sep 06 2020

[International Investments in Private Equity](#) Jan 03 2023 How can private equity investors exploit investment opportunities in foreign markets? Peter Cornelius uses a proprietary database to investigate and describe private equity markets worldwide, revealing their levels of integration, their risks, and the ways that investors can mitigate those risks. In three major sections that concentrate on the risk and return profile of private equity, the growth dynamics of discrete markets and geographies, and opportunities for private equity investments, he offers hard-to-find analyses that fill knowledge gaps about foreign markets. Observing that despite the progressive dismantling of barriers investors are still home-biased, he demonstrates that a methodical approach to understanding foreign private

equity markets can take advantage of the macroeconomic and structural factors that drive supply and demand dynamics in individual markets. Foreword by Josh Lerner Teaches readers how to investigate and analyze foreign private equity markets Forecasts private equity investment opportunities via macroeconomic and structural factors in individual markets Draws on data from a proprietary database covering 250 buyout and VC funds and 7,000 portfolio companies.

[Public Actors in International Investment Law](#) Apr 13 2021 This open access book focuses on public actors with a role in the settlement of investment disputes. Traditional studies on actors in international investment law have tended to concentrate on arbitrators, claimant investors and respondent states. Yet this focus on the "principal" players in investment dispute settlement has allowed a number of other seminal actors to be neglected. This book seeks to redress this imbalance by turning the spotlight on the latter. From the investor's home state to domestic courts, from sub-national governments to international organisations, and from political risk insurance agencies to legal defence teams in national ministries, the book critically reviews these overlooked public actors in international investment law.

The Global Expatriate's Guide to Investing Dec 10 2020 Exploit your offshore status to build a robust investment portfolio Most of the world's 200 million expats float in stormy seas. Few can

contribute to their home country social programs. They're often forced to fend for themselves when they retire. The Global Expatriate's Guide to Investing is the world's only book showing expats how to build wealth overseas with index funds. Written by bestselling author, Andrew Hallam, it's a guide for everyone, no matter where they are from. Warren Buffett says you should buy index funds. Nobel prize winners agree. But dangers lurk. Financial advisors overseas can be hungry wolves. They don't play by the same set of rules. They would rather earn whopping commissions than follow solid financial principles. The Global Expatriate's Guide To Investing shows how to avoid these jokers. It explains how to find an honest financial advisor: one that invests with index funds instead of commission paying windfalls. You don't want an advisor? Fair enough. Hallam shows three cutting edge index fund strategies. He compares costs and services of different brokerages, whether in the U.S. or offshore. And he shows every nationality how to invest in the best products for them. Some people want stability. Some want strong growth. Others want a dash of both. This book also answers the following questions: How much money do I need to retire? How much should I be saving each month? What investments will give me both strong returns, and safety? The Global Expatriate's Guide To Investing also profiles real expats and their stories. It shows the mistakes and successes that they want others

to learn from. It's a humorous book. And it demonstrates how you can make the best of your hard-earned money.

International Investment Protection of Global Banking and Finance Aug 06 2020
Global banking and finance is a complex and specialized field with sector-specific investment forms, subject to distinctive legal and regulatory frameworks and unique types of political risk. This comprehensive guide to international investment protection in the finance and banking sector, written by acknowledged experts in the field of investor-State arbitration, provides the first in-depth discussion of how international investment law applies to investors and investments in the sector. Featuring expert guidance on the key legal protections for cross-border banking and finance investments, with complete and up-to-date coverage of investor-State cases, the analysis crystallizes a set of field-specific legal principles for the sector. In particular, the authors address the following practical aspects of investment protection in the banking and finance sector: how sector-specific forms of investment, such as loans and derivatives, impact the dispute resolution process; types of political risk that cross-border investments in the sector are likely to encounter; distinctive adverse sovereign measures that underlie disputes in the sector, including those from sovereign debt defaults and banking sector bailouts; specific treaty provisions, such as jurisdictional carve-outs and targeted

exclusions; remedies available for violations of international investment protections; how monetary damages may be assessed for injury to banking and finance sector investments; the scope of financial services chapters included in certain free trade agreements; the protections available under domestic foreign investment laws; and alternative sources of protection such as political risk insurance and investment contracts. International disputes practitioners and academics, in-house counsel in the finance and banking industries, and arbitrators addressing banking and finance disputes will welcome this book for its practical guidance. With strategies for investors as well as for sovereign States to navigate the intricacies of the investment protection system, the authors' comprehensive analysis will help ensure appropriate international protection for banking and finance sector investments, both when establishing investments and when resolving disputes. The book lays the groundwork for the future consolidation of international investment protection as a critical tool to manage the political risk confronting global banking and finance.

OECD Benchmark Definition of Foreign Direct Investment Third Edition Oct 08 2020
This Third Edition of the OECD Benchmark Definition, fully consistent with the IMF Balance of Payments Manual, provides operational guidance on how FDI data should be compiled to meet internationally agreed standards.

Regulation of Foreign Investment Jan 23 2022 The main aim of this book is to assess the importance of international rules for foreign direct investment and the major challenges to international harmonization of those rules. Particular attention is paid to the most controversial and contentious issues with the view of appraising the prospects for establishing global rules. The book is divided into three parts; the first part includes papers assessing the role of national and international legislation with further distinction being made between bilateral, regional and multilateral legal frameworks. The second part addresses regulatory issues of technology transfer, labor, environment, subsidies and investment incentives, national security, public services and sovereign wealth funds. The final part looks at the experience of some international fora in addressing these issues and at some theoretical and conceptual problems of rule harmonization. The papers have been written by legal and economic scholars from leading universities. Contents: Introduction (Zdenek Drabek and Petros C Mavroidis) Regulation of Investment in the Trade Régime: From ITO to WTO (Petros C Mavroidis) Domestic, Regional and Multilateral Investment Liberalization (Jorge A Huerta Goldman) Mode 3 of the GATS: A Model for Disciplining Measures Affecting Investment Flows? (Bart De Meester and Dominic Coppens) Labor Standards and Human Rights: Implications for International Trade and Investment (Drusilla K Brown, Alan V Deardorff

and Robert M Stern) Interactions Between Subsidies Regulation and Foreign Investment, and the Primacy of the International Trade Regime (Tomer Broude) Environmental Protection (Daniel M Firger and Michael B Gerrard) Technology Transfer: Regulatory Issues and International Investment Agreements (Keith E Maskus) Sovereign Wealth Funds and Political Risk: New Challenges in the Regulation of Foreign Investment (Victoria Barbary and Bernardo Bortolotti) International Tribunals as Agents of Harmonization (Moshe Hirsch) Foreign Acquisitions and National Security: What are Genuine Threats? What are Implausible Worries? (Theodore H Moran) Public Services, Investment Liberalization and Protection (Federico Ortino) The EU Approach to Investment (Americo Beviglia Zampetti and Colin Brown) Harmonization of Rules on Foreign Investment (Zdenek Drabek) Readership: Policy makers, negotiators, business councils, NGOs, legal profession (international trade and investment law), economic profession (academics). Keywords: Harmonization; Regulation; Foreign Investment; International Economics Key Features: Treatment of "new generation" issues such as human rights or sovereign wealth funds Treatment of highly controversial issues of harmonization including subsidies, public services and technology transfer or the actual choice whether to harmonize or not Analysis provided by top international scholars Reviews:

"The remarkable collection of papers assembled by Drabek and Mavroidis succeeds both in identifying and explaining in clear terms the most salient questions in the regulation of foreign investment today... The diversity of themes covered in this book make it essential reading for anyone interested in an accessible overview of the latest developments in the regulation of foreign investment." J. World Trade Review
General Interests of Host States in International Investment Law Jun 15 2021 Analyses bilateral treaties and regional agreements on foreign investments, focussing particularly on measures taken in the context of economic crises.

The Complete Book of International Investing Jul 17 2021

Foreign Investment in the Energy Sector Apr 01 2020 Foreign Investment in the Energy Sector: Balancing Private and Public Interests, a comprehensive collection of essays from experts and practitioners, offers an important new resource to the field.

Quantitative Investing for the Global Markets Nov 28 2019 First Published in 1997. Routledge is an imprint of Taylor & Francis, an informa company.

Prospects in International Investment Law and Policy Jan 11 2021 Addresses the most central debates in contemporary investment law and policy.

International Investment Law Aug 25 2019 Increasing and intensified cross-border

economic exchange such as trade and investment is an important feature of globalization. In the past, a distinction could be made between capital importing and exporting countries, or host and home countries for foreign direct investment (FDI). Due to globalization, FDI is presently made by and in both developed and developing countries. Differences in political, economic and legal systems and culture are no longer obstacles for FDI, and to varying degrees the economic development of almost all countries is closely linked with the inflow of FDI. This book conducts critical assessments of aspects of current international law on FDI, focusing on cases decided by the tribunals of the International Centre for Settlement of Investment Disputes (ICSID) and other tribunals as well as decisions of annulment ad hoc committees of the ICSID. In examining such cases, Guiguo Wang takes into account the Chinese culture and China's practice in the related areas. The book explores topics including: the development and trend of international investment law; unilateral, bilateral and multilateral mechanisms for encouraging and protecting FDIs; determination of qualified investors and investments and consent as conditions for protection; relative and absolute standards of treatment; determination of expropriation in practice; assessment of compensation for expropriation; difficulties in enforcing investment arbitral awards; and alternatives for

improving the existing system. The book will be of great use and interest to scholars, practitioners and students of international investment law and international economic law, Asian law, and Chinese studies.

[International Equity Exchange-Traded Funds](#)
Aug 18 2021 This book presents the economic foundation of international equity investments providing a practical guide to invest in international equity exchange-traded funds (ETFs). It shows how to gain exposure to foreign stock markets through both theoretical foundations of international diversification and in-depth characteristics of global, regional, country-specific, and international sector/thematic ETFs. Unlike other books in the field which broadly discuss different aspects of the ETF market, this book explores one specific market segment, offering the first in-depth and state-of-the-art analysis of international equity ETFs and including, in particular, ETFs with global, regional, single-country, and international sector/thematic exposures. The number and variety of such financial instruments are constantly growing. Hence, it seems obvious that there is an urgent need for a book that will help investors who are willing to diversify their portfolios outside the domestic market—in both developed and emerging/frontier markets. [International Equity Exchange-Traded Funds](#) presents a comprehensive review of investment possibilities offered by international ETFs for stock market investors.

International Investment Law and Water Resources Management Sep 18 2021 In [International Investment Law and Water Resources Management](#), Daza-Clark offers an appraisal of indirect expropriation, including an analysis of the doctrine of police power.

[Foreign Investment, International Law and Common Concerns](#) May 27 2022 Increasingly, transnational corporations, developed countries and private actors are broadening the boundaries of their investments into new territories, in search of a higher return on capital. This growth in direct foreign investment involves serious concerns for both the investor and host state. Various exponents of international civil society and non-governmental organisations persuasively claim that such growth in foreign investments constitutes potential and serious hazards both to the environment and the fundamental rights and freedoms of local populations. This book explores from an international law perspective the complex relationship between foreign investments and common concerns, i.e. values that do not coincide, or do not necessarily coincide, with the interests of the investor and of the host state. It pays particular attention to the role of the main international development banks in reconciling the needs of foreign investors with the protection of common concerns, such as the environment, human rights and labour rights. Among its collection of essays, the volume asks how much "regulatory space" investment law leaves; whether

international investment law is an effective means of balancing contrasting interests, and whether investment arbitration currently constitutes a mechanism of global governance. In collecting the outlooks of various experts in

human rights, environmental and international economic law, this book breaks new ground in exploring how attention to its legal aspects may help in navigating the relationship between foreign investment and common concerns. In

doing so, the book provides valuable insights into the substantive issues and institutional aspects of international investment law.
