(PRODUCT ID 23958336). All about Geography Introduction to Human Geography The Study of Local Geography (for Nigeria Secondary Schools)

Geography as Inquiry invites teachers and learners to explore geography in exciting ways, across key concepts, connected to history and the social sciences, reestablishing its place in the social studies and history curriculum.

Powerful Primary Geography: A Toolkit for 21st-Century Learning explores the need for children to understand the modern world and their place in it. Dedicated to helping teachers inspire children's love of place, nature and geographical adventures through facilitating children's voice and developing their agency, this book explores the way playful opportunities can be created for children to learn how to think geographically, to solve real-life problems and to apply their learning in meaningful ways to the world around them. Based on the very latest research, Powerful Primary Geography helps children understand change, conflict and contemporary issues influencing their current and future lives and covers topics such as: • Weather and climate change • Sustainability • Engaging in their local and global community • Graphicacy, map work and visual literacy • Understanding geography through the arts. Including several case studies from primary schools in Ireland, this book will help aid teachers, student teachers and education enthusiasts in preparing children for dealing with the complex nature of our contemporary world through artistic and thoughtful geography. Facilitating children's engagement as local, national and global citizens ensures geography can be taught in a powerful and meaningful manner. This book discuss topics that are mandatory in the teaching of local geography at the (SS1) secondary school and TC levels in Nigeria. The book is written within the confines of WAEC and NECO examinations. Mentoring Geography Teachers in the Secondary School supports both new and experienced mentors in developing their knowledge and skills in mentoring in geography education. Within the book, chapter authors critically consider how mentoring has been conceptualised and represented in policy and academic debate, as well as examining how mentoring in geography education has been

experienced and perceived in practice. Chapters in the book explore a range of perspectives, experiences and aspects of mentoring geography teachers, including:

- Critical engagement with educational policy and practice
- Perspectives from beginning geography teachers
- Mentoring as a professional development opportunity
- The value of engaging with the geography education community in teacher education
- How mentoring meetings and conversations can support beginning geography teachers in their growth and development

This book is a vital source of support and inspiration for all those involved in developing the next generation of geography teachers. The themes of justice, agency and voice - raised and engaged with implicitly and explicitly throughout this edited collection - are of critical importance to mentors, beginning teachers and geography education more broadly in developing and enacting a progressive vision of mentoring. Mentoring Geography Teachers in the Secondary School supports both new and experienced mentors in developing their knowledge and skills in mentoring in geography education. This series

brings together a range of articles, extracts from books and reports that inform an understanding of secondary schools in today's educational climate. Gaining a better sense of how pupils conceive school geography is crucial if we are to understand the ways in which their ideas and values mediate learning processes. Geography in Secondary Schools explores how pupils experience geography lessons, what they think geography as a school subject is about, and what it means to them. School geography aims to help young people think about the world and their place in it in a distinctive - geographical - way. However very little is known about the kinds of thinking and values they associate with the subject. Researchers are increasingly taking young people's ideas seriously as important and worthy of investigation in their own right. In this book, Nick Hopwood takes such an approach to explore the relationships between pupils and geography as a school subject. He follows six pupils through their geography lessons for a period of three months, discussing their learning experiences in depth with them. Their participation in class, written work, and comments made in interviews form the basis for a detailed investigation of their ideas. This book informs an international audience of teachers, scholars and policymakers about the development of learning progressions for primary and secondary geography education in various countries and regions of the world. The book represents an important contribution to learning progressions research and practice. The different chapters explore how curriculum standards and frameworks in different countries portray progress and sophistication in the learning of geography. The book compares educational systems and how teachers and curriculum developers use the concept of "learning progression" to guide educational practices. As an approach to educational research, learning progressions offer considerable potential for understanding how children develop understanding of geographic concepts and practices across grade bands and in relation to national geography standards. The book analyzes the general conditions of learning progressions within the context of a globalized world. Important themes are addressed such as: knowledge acquisition in formal education;

measuring learning progressions in informal settings; learning progressions for one curriculum standard or several standards; conditions to assess progression in the learning of facts, concepts, and skills; and multiple pathways for understanding or learning geography. The contributing authors are experienced scientists in the field from all around the world giving specific insights into the practices of their countries. The book appeals to K-12 teachers, school administrators, policymakers, researchers in geography education, professors and lecturers at universities around the world. Oxford International Primary Geography is a complete six year primary geography course that provides an engaging introduction to the subject. Using real life examples from around the globe, the course covers key aspects of both human and physical geography, from the basics of mapping to more complex topics such as the pros and cons of ecotourism and how to meet the resource needs of the world's growing population. Additional Workbooks provide students with the opportunity for further study in the classroom or at home, including suggested research topics and cross-curricular projects. For the teacher, the Teacher's Guide provides step-by-step guidance for each lesson, as well as background knowledge and geographical information for specialist and non-specialist teachers alike. Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps them acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and creative lessons. This fully revised and updated second edition takes account of new legislation and important developments in geography education, including literacy, numeracy, citizenship, and GIS. Brand new chapters in this edition provide essential guidance on fieldwork, and using ICT in the context of geography teaching and learning. Chapters on teaching strategies, learning styles and assessment place the learner at the centre stage, and direct advice and activities encourage successful practice. Designed for use as a core

textbook Learning to Teach Geography in the Secondary School is essential reading for all student teachers of geography who aspire to become effective, reflective teachers. Praise for the first edition of Learning to Teach Geography in the Secondary School: 'This is a practical and visionary book, as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative, conceptual framework.' - The Times Educational Supplement 'This is a modern, powerful, relevant and comprehensive work that is likely to become a standard reference for many beginning teachers on geography initial teacher training courses in England and Wales.' - Educational Review Oxford International Primary Geography is a complete six year primary geography course that provides an engaging introduction to the subject. Using real life examples from around the globe, the course covers key aspects of both human and physical geography, from the basics of mapping to more complex topics such as the pros and cons of ecotourism and how to meet the resource needs of the world's growing population. Additional Workbooks provide students with the opportunity for further study in the classroom or at home, including suggested research topics and cross-curricular projects. For the teacher, the Teacher's Guide provides step-by-step guidance for each lesson, as well as background knowledge and geographical information for specialist and non-specialist teachers alike. Learning to Teach Geography in the Secondary School provides intending and practising teachers of geography with the practical skills to design, teach and evaluate varied and exciting lessons. It also helps them to acquire a deeper understanding of geography's role, purpose and potential in secondary education. The book explores how teachers may use geography as a vehicle for preparing pupils for uncertain environmental, cultural, social and economic futures. Guided by the Australian Curriculum and the Professional Standards for Teaching School Geography (GEOGstandards), Teaching Secondary Geography provides a comprehensive introduction to both the theory and practice of

teaching Geography. Pearson Geography has been designed for ease of reading with double-page spreads and prominent images selected specifically to appeal to students. A literacy review of the student book was conducted to ensure a close connection between text and images was attained and sentence structure and language choice was appropriate. The Student Books also have small chunks of text with lots of headings for easy digestion, and many images, maps and illustrative material. The write-in Pearson Geography New South Wales Activity Books cater for a variety of learning styles, reinforcing and enriching geographical learning and skills. Motivate pupils to develop their geographical skills, knowledge and understanding as they become engaged and accomplished geographers, ready for the demands of GCSE. Specifically designed to provide a solid foundation for the 2016 GCSE specifications, this Student Book takes an enquiry-based approach to learning within each unit and lesson. - Easily and cost-effectively implement a new KS3 scheme of work: this coherent single-book course covers the latest National Curriculum content, providing 150 ready-made lessons that can be used flexibly for a two or three-year KS3 - Build and improve the geographical knowledge and skills that pupils need: every double-page spread represents a lesson, with rich geographical data and place contexts for pupils to interpret, analyse and evaluate - Lay firm foundations for GCSE: key vocabulary, command words and concepts are introduced gradually, preparing pupils for the content and question types they will encounter at GCSE, with a particular focus on analysis and evaluation questions - Effectively assess, measure and demonstrate progress: formative assessments throughout each lesson and summative end-of-unit reviews include questions that show whether pupils are 'working towards', 'meeting' or 'exceeding' expectations - Encourage pupils to check and drive their own progress: learning objectives and end-of-unit learning outcomes help pupils reflect on their learning and make connections between key concepts and skills throughout the course A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the

demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress. In recent years there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best-practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book, is that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student's knowledge and skills. Landscapes: Core Units and Human Elective guides students to top marks with relevant exam-focused content. This book comprises: Core Unit 1: Patterns and

Processes in the Physical Environment Core Unit 2: Regional Geography Core Unit 3: Geographical Investigation and Skills Elective Unit 5: Patterns and Processes in the Human Environment KEY FEATURES: Core and Human Elective in one book, allowing for relevant cross-referencing A detailed Examination Guide gives guidance on answering questions, sample answers, and SRP hints and tips Written using the language of the examination Learning Intentions unpack the learning into manageable, focused lessons for students Exam Links provide relevant questions beside the text, putting the learning in context Check Your Learning boxes provide opportunities for assessment for learning throughout the chapters Skills Activities focus on bringing theory and skill together in preparation for examination questions Chapter Links show students where other areas of the course may be relevant to the learning Exam Tips let students know the important ways to get top marks when answering questions Examination Questions at the end of every chapter include Ordinary and Higher Level Part One and Part Two questions with up-to-date marking schemes Each student who purchases the Landscapes textbook receives a FREE eBook to use at home or in school! Gill Education eBooks are also FREE to adopting teachers. DIGITAL RESOURCES FOR TEACHERS Comprehensive PowerPoints for every chapter are available for teachers on www.gillexplore.ie, our digital resources website, and include: Content to enhance teaching and learning Answers to every question (exam questions with sample answers, plus suggested marking schemes) Revision test material with marking schemes Relevant weblinks Cyclone provides everything you need for Junior Cycle Geography. Written by experienced teachers with extensive knowledge of the Junior Cycle Framework, this package provides the perfect blend of clear content, trusted methods and innovation. Teaching Geography Creatively was Winner of the Geographical Association Gold Award 2014 and Winner of the Geographical Association Silver Award 2017. This fully updated second edition of Teaching Geography Creatively is a stimulating source of

guidance for busy trainee and experienced teachers. Packed full of practical approaches for bringing the teaching of geography to life, it offers a range of innovative ideas for exploring physical geography, human geography and environmental issues. Underpinned by the very latest research and theory, expert authors from schools and universities explore the inter-relationship between creativity and learning, and consider how creativity can enhance pupils' motivation, self-image and well-being. Two brand new chapters focus on creative approaches to learning about the physical world, as well as the value of alternative learning settings. Further imaginative ideas include: games and starter activities as entry points for creative learning how to keep geography messy the outdoors and learning beyond the classroom how to teach geography using your local area the links between geography and other areas of the curriculum looking at geography, creativity and the future fun and games in geography engaging with the world through picture-books teaching about sustainability. With contemporary, cutting-edge practice at the forefront, *Teaching Geography Creatively* is an essential read for all trainee and practicing teachers, offering a variety of practical strategies to create a fun and stimulating learning environment. In the process it offers a pedagogy that respects the integrity of children as joyful and imaginative learners and which offers a vision of how geography can contribute to constructing a better and more equitable world. Explores how pupils experience and think about geography as a school subject. *Geography Education in the Digital World* draws on theory and practice to provide a critical exploration of the role and practice of geography education within the digital world. It considers how living within a digital world influences teacher identity and professionalism and is changing young people's lives. The book moves beyond the applied perspective of educational technology to engage with wider social and ethical issues of technology implementation and use of digital data within geography education. Situated at the intersection between research and practice, chapters draw on a wide range of theory to consider the role, adoption and potential challenges of a range of digital technologies in

furthering geographical education for future generations. Bringing together academics from the fields of geography, geography education and teacher education, the book engages with four key themes within the digital world: Professional practice and personal identities. Geographical sources and connections. Geospatial technologies. Geographical fieldwork. This is a crucial read for geographers, geography educators and geography teacher educators, as well as those engaging with existing and new technologies to support geographical learning in the dynamic context of the digital world. It will also be of interest to any students, academics and policymakers wanting to better understand the impact of digital media on education. *Learning to Teach Geography in the Secondary School* has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching, and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum, as well as to initial teacher education, the new edition considers the current debates around what we mean by geographical knowledge, and what's involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography: Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school-based initial teacher education in mind, *Learning to Teach Geography in the Secondary school* is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of *Learning to Teach Geography in the*
