After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend , and her soul makes a first step to healing. This best-selling book is also "#1 book in motorcycle safety" (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-

sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called "Motorcycle Dynamics," Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider's safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider's braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called "Cornering Habits" is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough's skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough's voice in his head takes an unnecessary risk with his own life. Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it's road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or "blind" truck drivers. The book offers the kind of first-hand experience that can literally save riders' lives, as illustrated in the chapters "Booby Traps" and "Special Situations," which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, "Sharing the Ride," is geared toward experienced riders who travel together in groups or who travel with a second passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index. KX60 (1983-2002), KX80 (1983-1990) A fun and exciting touch-and-feel book featuring one of the best-selling children's book characters of all time - Pat the Bunny! Pat the Bunny has been creating special first-time moments between parents and their children for over 75 years. This engaging touch-and-feel book takes babies on a playful trip to the zoo where they can pet animals like lions, pandas, turtles, and more, all the while making cherished memories that will last a lifetime. Suspension is probably the most misunderstood aspect of

motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Service, repair and maintenance manual. Classic (2003-2008); Mean Streak (2004-2008); Nomad (2005-2008) The Complete Idiot's Guide to Motorcycles, Fourth Edition, is the most complete book on motorcycles, covering everything from how to choose and maintain a motorcycle and how to buy appropriate gear, to how to ride safely, and how to make the most out of trips on the open road. This beautiful book reveals works from the Victoria and Albert Museum's rich collection of drawings ranging from the early 17th century right up to the present day. Reproducing, often for the first time, works by foremost British artists, this book offers fresh insights into the wide range of ways in which these artists have used drawing to think on paper, build up ideas, and make finished exhibition pieces. Including examples from the greatest masters—William Blake, Thomas Rowlandson, John Constable, Dante Gabriel Rossetti, Edward Burne-Jones, Paul Nash, Lucian Freud, David Hockney, John Piper, Grayson Perry, and others—author Susan Owens discusses the art and craft of drawing, materials, and techniques, and why artists chose them.
