The Science and the Story of the Future of Learning In 1999, Sugata Mitra conducted the famous "Hole in the Wall" experiment that inspired three TED Talks and earned him the first million-dollar TED prize for research in 2013. Since then, he has conducted new research around self-organized learning environments (SOLE), building "Schools in the Cloud" all over the world. This new book shares the results of this research and offers

- Examples of thriving Schools in the Cloud in unlikely places
- Mitra's predictions on the future of learning
- How to design assessments for self-organizing learning
- How to build your own School in the Cloud
- Clips from the documentary, The School in the Cloud

Originally published in 1985, the chapters in this volume collectively approach the phenomenon of questioning from many perspectives. There are studies on question comprehension, question answering, question asking and the influence of adjunct questions on text comprehension and memory. The chapters cover different theories, models, methods, and practical applications. Some contributors focus exclusively on adult subjects, whereas others examine cognitive development in children. The earlier chapters in the book have a "pure science" emphasis, whereas the later chapters have an "applied" emphasis. Of course, the distinction between science and application had, in the editors' words, become "very fuzzy" in the years prior to publication.
