The structure of education systems varies widely between countries. In order to produce internationally comparable education statistics and indicators, it is necessary to have a framework to collect and report data on education programmes with a similar level of educational content. UNESCO's International Standard Classification of Education (ISCED) is the reference classification for organising education programmes and related qualifications by education levels and fields. The basic concepts and definitions of ISCED are intended to be internationally valid and comprehensive of the full range of education systems. ISCED 2011 is the second major revision of this classification (initially developed in the 1970s and first revised in 1997). It was adopted by the UNESCO General Conference in November 2011. Prepared jointly by the UNESCO Institute for Statistics (UIS), the OECD and Eurostat, this operational

manual provides guidelines and explanatory notes for the interpretation of the revised classification, by each education level. It also includes country examples of programmes and qualifications that have been classified to ISCED 2011. This manual will be useful for national statisticians collecting and reporting data on education to international organisations, as well as for policymakers and researchers interested in better understanding of these data. While public affairs faculty study administration and management techniques, few administrators of public affairs programs receive formal training in the nuts and bolts of academic administration. Even those faculty who come to academia after distinguished careers in managerial positions may not be ready for the very different (and difficult) environment of university administration. The Public Affairs Faculty Manual argues that public affairs as a field needs to ensure that knowledge about administration and management is applied to the running of its academic programs, and brings together major leaders in the discipline to explore key features of academic administration. Many of these leaders have served as Master of Public Administration (MPA) directors, chairs, and deans at the nation's top public affairs programs. Crucial issues of academic administration discussed include the basics of public affairs programs, models of governance, roles of different administrative leaders, planning and budgeting for programs, navigating the accreditation process, assessing and improving student learning, ensuring social equity and cultural competency, mentoring faculty, developing curriculum, and helping provide service and applied research to community partners. Contributors have served as MPA directors, chairs, and deans at the nation's top public affairs programs. Themes running throughout the book's chapters are examined, and additional resources to help manage public affairs programs are offered. This collection of essays and the strategies within it are designed to encourage faculty to assume positions of leadership in their programs and manage those programs in an effective, efficient, and fair manner. The Public Affairs Faculty Manual is required reading for new, seasoned, and aspiring academic administrators in public administration, public policy, and nonprofit management programs, as well as schools of

government. People use lots of water for drinking, cooking and washing, but significantly more for producing things such as food, paper and cotton clothes. The water footprint is an indicator of water use that looks at both direct and indirect water use of a consumer or

producer. Indirect use refers to the 'virtual water' embedded in tradable goods and commodities, such as cereals, sugar or cotton. The water footprint of an individual, community or business is defined as the total volume of freshwater that is used to produce the goods and services consumed by the individual or community or produced by the business. This book offers a complete and up-to-date overview of the global standard on water footprint assessment as developed by the Water Footprint Network. More specifically it:

This groundbreaking work challenges modernist military science and explores how a more open design epistemology is becoming an attractive alternative to a military staff culture rooted in a monistic scientific paradigm. The author offers fresh sociological avenues to become more institutionally reflexive - to offer a variety of design frames of reference, beyond those typified by modern military doctrine. Modernist military knowledge has been institutionalized to the point that blinds militaries to alternative designs organizationally and in their interventions. This book seeks to reconstruct strategy and operations in "designing ways" and develops theories of action through multifaceted contextualizations and recontextualizations of situations, showing that Military Design does not have to rely on set rational-analytic decision-making schemes, but on seeking alternative meanings in- and on-action. The work offers an alternative philosophy of practice that embraces the unpredictability of tasks to be accomplished. Written by Colonel Papparone (U.S. Army, Ret., PhD) with a special chapter by two active duty officers, it will appeal to

all in military and security studies, including professionals and policymakers. "The curriculum provides a vision for chemical dependency treatment I have attempted to address for many years. This looks like an approach that finally meets this need." --Eli Coleman, PhD, Director of the Program in Human Sexuality University of Minnesota The ideal of successful treatment is to maintain abstinence for the rest of the addict's life; yet few treatment programs meet this goal. For many men and women in recovery, sexual behavior linked with drug or alcohol use is the primary reason for relapse. A large number of addicts have sex/drug-linked patterns of combining drugs, such as crystal meth, cocaine, alcohol, and club drugs, with sexual relations. In recovery, they may be unprepared for the dual absence of drug use and sexual relations. Additionally many addicts have past histories of sexual abuse. While great strides have been made in treating women and men suffering from addiction, their sexuality is too often marginalized. When sexuality is not directly and positively addressed in drug and alcohol treatment, it can contribute to treatment failure, relapse, and untold costs in the lives of addicts and their families. Sexual Health in Drug and

Alcohol Treatment introduces a pioneering evidence-based curriculum, designed to integrate concepts of sexual health, current sex research, and recent developments in relapse prevention research. Complete with suggested group activities, guided discussions, role plays, and more, the program can reduce the risk of relapse and increase client retention for men and women with sex/drug linked addiction and alcoholism. This curriculum was created by drug and alcohol counselors, sexual health advocates, and psychological/sexological research specialists. Key Features: Helps women and men in recovery identify sexual thoughts and feelings associated with increasing or decreasing risk of relapse Is compatible with all treatment settings, approaches, and clientele Includes psychoeducational material, experiential learning, skill-building exercises, assessments, worksheets, and more Proven to improve client retention and reduce sex/drug linked shame-a common cause of relapse The MINI Cooper, Cooper S, Clubman (R55, R56, R57) 2007-2013 Service Manual is a comprehensive source of service information and specifications for MINI Cooper models from 2007 to 2013 (Mk II).
