Export–Import Theory, Practices, and Procedures Jul 17 2021 This book remains the sole export–import textbook aimed squarely at the academic audience. Discussing theoretical issues in depth, while maintaining a practical approach, it offers a comprehensive exploration of import procedures and export regulations. In addition to updated cases, this new edition includes: New major developments in bilateral and regional trade agreements Changes to INCOTERMS 2010 Coverage of the role of e-commerce Expanded updates on methods of payment, export pricing, and government export finance This clearly written and comprehensive textbook will ground students in theory and prepare them for the realities of a career in this fast-moving field. Suitable for upper-level undergraduates and postgraduates of international trade, the book stands alone in its blend of conceptual frameworks and cogent analysis. A related website, filled with export–import resources, opinion pieces, cases, and the latest news is located at: www.export-importtradecenter.com.

Smart Systems and IoT: Innovations in Computing Oct 27 2019 The book features original papers from the 2nd International Conference on Smart IoT Systems: Innovations and Computing (SSIC 2019), presenting scientific work related to smart solution concepts. It discusses computational collective intelligence, which includes interactions between smart devices, smart environments and smart interactions, as well as information technology support for such areas. It also describes how to successfully approach various government organizations for funding for business and the humanitarian technology development projects. Thanks to the high-quality content and the broad range of the topics covered, the book appeals to researchers pursuing advanced studies.

Natural Language Processing in Action Nov 28 2019 Summary Natural Language Processing in Action is your guide to creating machines that understand human language using the power of Python with its ecosystem of packages dedicated to NLP and AI. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Recent advances in deep learning empower applications to understand text and speech with extreme accuracy. The result? Chatbots that can imitate real people, meaningful resume-to-job matches, superb predictive search, and automatically generated document summaries—all at a low cost. New techniques, along with accessible tools like Keras and TensorFlow, make professional-quality NLP easier than ever before. About the Book Natural Language Processing in Action is your guide to building machines that can read and interpret human language. In it, you'll use readily available Python packages to capture the meaning in text and react accordingly. The book expands traditional NLP approaches to include neural networks, modern deep learning algorithms, and generative techniques as you tackle real-world problems like extracting dates and names, composing text, and answering free-form questions. What's inside Some sentences in this book were written by NLP! Can you guess which ones? Working with Keras, TensorFlow, gensim, and scikit-learn Rule-based and data-based NLP Scalable pipelines About the Reader This book requires a basic understanding of deep learning and intermediate Python skills. About the Author Hobson Lane, Cole Howard, and Hannes Max Hapke are experienced NLP engineers who use these techniques in production. Table of Contents PART 1 - WORDY MACHINES Packets of thought (NLP overview) Build your vocabulary (word tokenization) Math with words (TF-IDF vectors) Finding meaning in word counts (semantic analysis) PART 2 - DEEPER LEARNING (NEURAL NETWORKS) Baby steps with neural networks (perceptrons and backpropagation) Reasoning with word vectors (Word2vec) Getting words in order with convolutional neural networks (CNNs) Loopy (recurrent) neural networks (RNNs) Improving retention with long short-term memory networks Sequence-to-sequence models and attention PART 3 - GETTING REAL (REAL-WORLD NLP CHALLENGES) Information extraction (named entity extraction and question answering) Getting chatty (dialog engines) Scaling up (optimization, parallelization, and batch processing)

Communication Technology Update Mar 01 2020 New communication technologies are being introduced at an astonishing rate. Making sense of these technologies is increasingly difficult. Communication Technology Update is the single best source for the latest developments, trends, and issues in communication technology. Now in its ninth edition, Communication Technology Update has become an indispensable information resource for business, government, and academia. As always, every chapter has been completely rewritten to reflect the latest developments and market statistics, and now covers mobile computing, digital photography, personal computers, digital television, and electronic games, in addition to the two dozen technologies explored in the previous edition. The book's companion website (www.tfi.com/ctu) offers updated information submitted by chapter authors and offers links to other Internet resources.

Perspectives on Business Intelligence Apr 01 2020 In the 1980s, traditional Business Intelligence (BI) systems focused on the delivery of reports that describe the state of business activities in the past, such as for questions like "How did our sales perform during the last quarter?" A decade later, there was a shift to more interactive content that presented how the business was performing at the present time, answering questions like "How are we doing right now?" Today the focus of BI users are looking into the future. "Given what I did before and how I am currently doing this quarter, how will I do next quarter?" Furthermore, fuelled by the demands of Big Data, BI systems are going through a time of incredible change. Predictive analytics, high volume data, unstructured data, social data, mobile, consumable analytics, and data visualization are all examples of demands and capabilities that have become critical within just the past few years, and are growing at an unprecedented pace. This book introduces research problems and solutions on various aspects central to next-generation BI systems. It begins with a chapter on an industry perspective on how BI has evolved, and discusses how game-changing trends have drastically reshaped the landscape of BI. One of the game changers is the shift toward the consumerization of BI tools. As a result, for BI tools to be successfully used by business users (rather than IT departments), the tools need a business model, rather than a data model. One chapter of the book surveys four different types of business modeling. However, even with the existence of a business model for users to express queries, the data that can meet the needs are still captured within a data model. The next chapter on vivification addresses the problem of closing the gap, which is often significant, between the business and the data models. Moreover, Big Data forces BI systems to integrate and consolidate multiple, and often wildly different, data sources. One chapter gives an overview of several integration architectures for dealing with the challenges that need to be overcome. While the book so far focuses on the usual structured relational data, the remaining chapters turn to unstructured data, an ever-increasing and important component of Big Data. One chapter on information extraction describes methods for dealing with the extraction of relations from free text and the web. Finally, BI users need tools to visualize and interpret new and complex types of information in a way that is compelling, intuitive, but accurate. The last chapter gives an overview of information visualization for decision support and text.

Build Your Own Home Theater Sep 18 2021 Written to provide information on all price ranges of equipment to everyone from the beginner to the experienced home theater owner, Build Your Own Home Theater has been completely updated for today's audience. This new edition contains valuable consumer information on the latest digital home theater components and technology, including digital surround sound receivers, DVD players, digital television & HDTV, digital satellites (DBS), digital camcorders, and digital hard-drive video recorders. Recent Advances in Information and Communication Technology 2017 Jan 29 2020 This book includes selected contributions related to big data and data networking, presented at the 13th International Conference on Computing and Information Technology (IC2IT), which was held at the Arnoma Grand Hotel Bangkok, Thailand, July 6–7, 2017. The aim of the conference was to present emerging algorithms, methods and technologies with a high degree of originality, novelty and innovation addressing the conference theme 'Mastering Data and Networking'. Section 1 and 2 discuss various aspects of data mining and corresponding applications. Section 3 focuses on speed and overhead networking optimisation problems, as well as energy problems of autonomous systems, which are becoming increasingly important. The key to addressing these problems is properly determining critical parameters. Section 4 sheds light on natural language processing, including extraction of trends and popularity and recognition of emotions as well as classic topics such as detection and classification.

East-West Montage May 15 2021 "East-West Montage possesses a unique vision that promises to push discussions of globalization, cultural production, ethnic identity, and bodily metaphors in powerful new directions. Ma is to be praised for his sound scholarship and innovative interpretations. Indeed where others specialize in either the collection of details or the unpacking of text, Ma weaves a strong analytic exegesis rooted in thorough research." —Richard King, Washington State University Approximately twelve hours' difference lies between New York and Beijing: The West and the East are, literally, night and day apart. Yet East-West Montage crosscuts the two in the manner of adjacent filmic shots to accentuate their montage-like complementarity. It examines the intersection between East and West—the Asian diaspora (or more specifically Asian bodies in diaspora) and the cultural expressions by and about people of Asian descent on both sides of the Pacific. Following the introduction "Establishing Shots," the book is divided into seven intercuts, which in turn subdivide into dialectically paired chapters focusing on specific body parts or attributes. The range of material examined is broad and rich: the iconography of the opium den in film noir, the writings of Asian American novelists, the swordplay and kung fu film, Japanese anime, the "Korean Wave" (including soap operas like *Winter Sonata* and the cult thriller *Oldboy*), Rogers and Hammerstein's Orientalist musicals, the comic *Blackhawk*, the superstar status of the Dalai Lama, and the demise of Hmong refugees and Chinese retirees in the U.S. Highly original and immensely readable, *East-West Montage* will appeal to many working in a range of disciplines, including Asian studies, Asian American studies, cultural studies, ethnic studies, film studies, popular culture, and literary criticism.

Irresistible! Markets, Models, and Meta-Value in Consumer Electronics Oct 08 2020 The consumer electronics industry is entering an era of extraordinary growth. The industry's best companies will ride that wave to unprecedented success. But, today, many CE companies are struggling with business models that are simply untenable. They must change to survive: they must change even more dramatically to win. In this book, two world-renowned consultants preview the industry's future—from online gaming to telehealthcare, and beyond. Next, they present a powerful new blueprint, offering indispensable guidance on everything from technology platforms to user interface design, branding to channel strategies. You'll discover how to uncover new sources of value, design better models for doing business, and fuel growth by reaching new geographical markets. Whatever your role in the industry, this book will help you:

- Make better decisions, find your differentiators, and focus on your key success drivers
- Tap into the emergent "meta-value" that arises when technologies, devices, services, and content come together
- Reach tomorrow's smart, service-sensitive shopper: not just the "technology-hungry" customers

The consumer electronics industry continues to grow at breakneck speed: from MP3 players to home healthcare devices, consumers are adopting new technologies faster than ever before. But most consumer electronics companies are struggling with razor-thin margins, or even losses. Their traditional business models simply aren't working anymore. In *Irresistible! Markets, Models, and Meta-Value in Consumer Electronics*, IBM's leading consumer electronic industry consultants reveal powerful new opportunities to profit—and offer realistic advice for leveraging them. Drawing on their experience working with innovators from Helsinki to Osaka, the authors and contributors introduce revolutionary On Demand Business models for improving profitability, and identify tomorrow's most profitable CE opportunities. They cover every element of success: technology, design, service, branding, channel strategies, and much more. Whether you're an executive or engineer, strategist or entrepreneur, this book will help you find your differentiators, focus on your key success drivers—and become one of this industry's big long-term winners!

The Chinese Tao of Business Aug 30 2022 How can managers discover, develop and implement successful business strategies for China and our global economy? Drawing on in-depth research with top executives of successful Chinese and Western companies, this book provides a road map for profitable business strategies in our interconnected economy. In the process, the authors describe and examine both Chinese and Western strategic management, their weaknesses and strengths. Starting with an analysis of the historical, cultural and legal antecedents of Chinese strategy, the authors identify potential for synergy and dominance between companies from Western, industrialized economies and Chinese companies. The book closes with recommendations on how the managements of non-Chinese companies, now pouring into China, can most effectively compete and interact with Chinese businesspersons and governments. *The Chinese Tao of Business* offers guidance to compete successfully against local companies and in foreign markets through: Unique insights into Chinese business strategy, including its origins and influencing factors; Insightful perspectives on the evolution of China's market and business environments; Incisive analysis of Eastern and Western strategic decision-making styles and how they differ; Cogent identification of hidden and overt threats, pitfalls and opportunities that Western companies face in China and how to plan for them; Effective direction through an Adaptive-Action

Road Map (ARM) for successful business strategies in China and the global economy.
