Foundry Manual Jul 31 2020

This Manual is intended primarily for use by foundry personnel aboard repair ships and tenders. The recommended practices are based on procedures proved workable under Navy conditions and are supplemented by information from industrial sources. The Manual is divided into two general sections. The first section, chapters 1 through 13, contains information of a general nature, such as "How Metals Solidify," "Designing a Casting," "Sands for Molds and Cores," "Gates, Risers, and Chills," and "Description and Operation of Melting Furnaces." Subjects covered in these chapters are generally applicable to all of the metals that may be cast aboard ship. The second section, chapters 14 through 21, contains information on specific types of

alloys, such as "Copper-Base Alloys," "Aluminum-Base Alloys," "Cast Iron," and "Steel." Specific melting practices, suggestions for sand mixes, molding practices, gating, and risering are covered in these chapters. This manual has been written with the "how-to-do-it" idea as the principal aim. Discussions as to the "why" of certain procedures have been kept to a minimum. This manual contains information that should result in the production of consistently better castings by repair ship personnel.

Jungle Survival Manual 1944

Aug 12 2021 During the

Second World War, British and American soldiers were sent to new and challenging theaters, fighting to survive not only encounters with the enemy but the landscape they found themselves in. Being posted to South-East Asia and the Pacific to fight the Japanese meant soldiers had to learn to survive in the tropics, fighting and living in endless steamy jungle and perilous swamps. In this environment, men had to be able to take care of themselves rather than relying on their unit to supply their needs, something which did not come naturally to the many soldiers born and raised in cities. To help them in this completely alien environment, the British and US armies produced a number of official training manuals and guides to explain to the men how to identify and fight the Japanese and avoid their deadly panji traps, but also 'jungle lore' how to find and cook plants that were safe to eat; which animals and insects could kill them; how to identify and treat tropical illnesses and diseases; and

avoid the dangers of polluted water and cannibals. The Jungle Survival Manual brings together the official manuals and information that enabled the Allies to fight in Burma, Malaya, Thailand, Indochina, Singapore and the Pacific Islands and win the war. This paperback volume will appeal to those interested in the South-East Asian and Pacific

theatres of WWII as well as those researching their family history. It makes a unique gift for all those interested in survival techniques, and those of traveling to Asia. The Jungle Survival Manual is complete with some 20 diagrams and drawings reproduced from the original guides.
