2020 All the Math Your 4th Grader Needs to Succeed This book will help your elementary school student develop the math skills needed to succeed in the classroom and on standardized tests. The user-friendly, full-color pages are filled to the brim with engaging activities for maximum educational value. The book includes easy-to-follow instructions, helpful examples, and tons of practice problems to help students master each concept, sharpen their problem-solving skills, and build confidence. Features include: • A guide that outlines national standards for Grade 4 • Concise lessons combined with lot of practice that promote better scores—in class and achievement tests • A pretest to help identify areas where students need more work • End-of-chapter tests to measure students' progress • A helpful glossary of key terms used in the book • More than 1,000 math problems with answers Topics covered: • Adding and subtracting • Multiplying and dividing • 2-, 3-, and 4-digit numbers • Rounding and estimating • Prime numbers, factors, and multiples • Operations with fractions and mixed numbers • Decimals •

Customary and metric units of measure • Lines, angles, triangles, quadrilaterals, and circles • Perimeter and area • Data line plots • Word problems • Multistep problems and variables

2021 All the Math Your 7th Grader Needs to Succeed This book will help your elementary school student develop the math skills needed to succeed in the classroom and on standardized tests. The user-friendly, full-color pages are filled to the brim with engaging activities for maximum educational value. The book includes easy-to-follow instructions, helpful examples, and tons of practice problems to help students master each concept, sharpen their problem-solving skills, and build confidence. Features include:

- A guide that outlines national standards for Grade 7
- Concise lessons combined with lot of practice that promote better scores—in class and achievement tests
- A pretest to help identify areas where students need more work
- End-of-chapter tests to measure students' progress
- A helpful glossary of key terms used in the book
- More than 1,000 math problems with answers

Topics covered:

- Mathematical operations and number properties
- Negative numbers and absolute value
- Solving problems with rational numbers
- Ratios and proportions
- Percent and percent change
- Graphing relationships and unit rates
- Roots and exponents
- Scientific notation
- Solving equations and inequalities
- Customary and metric units of measure, including conversions
- Data presentation
- Statistics and probability
- Constructing and analyzing geometric figures
- Solving problems involving angle measure, area, surface area, and volume
