**Dvorak's Prophecy: And the Vexed Fate of Black Classical Music May 20 2022 A Kirkus Reviews Best Nonfiction Book of 2021 A provocative interpretation of why classical music in America "stayed white"—how it got to be that way and what can be done about it. In 1893 the composer Antonín Dvořák prophesied a “great and noble school” of American classical music based on the “negro melodies” he had excitedly discovered since arriving in the United States a year before. But while Black music would foster popular genres known the world over, it never gained a foothold in the concert hall. Black composers found few opportunities to have their works performed, and white composers mainly rejected Dvořák’s lead. Joseph**

**Horowitz ranges throughout American cultural history, from Frederick Douglass and Huckleberry Finn to George Gershwin's Porgy and Bess and the work of Ralph Ellison, searching for explanations. Challenging the standard narrative for American classical music fashioned by Aaron Copland and Leonard Bernstein, he looks back to literary figures—Emerson, Melville, and Twain—to ponder how American music can connect with a “usable past.” The result is a new paradigm that makes room for Black composers, including Harry Burleigh, Nathaniel Dett, William Levi Dawson, and Florence Price, while giving increased prominence to Charles Ives and George Gershwin. Dvorák's Prophecy arrives in the midst of an important conversation about race in America—a conversation that is taking place in music schools and concert halls as well as capitols and boardrooms. As George Shirley writes in his foreword to the book, “We have been left unprepared for the current cultural moment. [Joseph Horowitz] explains how we got there [and] proposes a bigger world of American classical music than what we have known before. It is more diverse and more equitable. And it is more truthful.”**

***The Last Lecture Apr 19 2022 "We cannot change the cards we are dealt, just how we***

play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

### **Community-Based Health Literacy**

**Interventions Jan 24 2020** In its landmark report, **Health Literacy: A Prescription to End Confusion**, the Institute of Medicine noted that there are 90 million adults in the United States with limited health literacy who cannot fully benefit from what the health and health care systems have to offer. Since the release of that report, health literacy has become a vibrant research field that has developed and disseminated a wide range of tools and practices that have helped organizations, ranging in size from large health care systems to individual health care providers and pharmacists, to engage in health literate discussions with and provide health literate materials for patients and family members. Improving the health literacy of organizations

**can be an important component of addressing the social determinants of health and achieving the triple aim of improving the patient experience, improving the health of populations, and reducing the cost of care. However, the focus on organizations does not address the larger issue of how to improve health literacy across the U.S. population. To get a better understanding of the state of community-based health literacy interventions, the Roundtable on Health Literacy hosted a workshop on July 19, 2017 on community-based health literacy interventions. It featured examples of community-based health literacy programs, discussions on how to evaluate such programs, and the actions the field can take to embrace this larger view of health literacy. This publication summarizes the presentations and discussions from the workshop.**

**The Making of Rebel Without a Cause Aug 31 2020 In 1954, troubled director Nicholas Ray**

chatted at a dinner party about his controversial plan for a film about middle-class juvenile delinquents. He was told of a book, written by a prison psychologist and owned by Warner Bros., called *Rebel Without a Cause*. Though he was initially unimpressed, Ray adapted the book into his own screenplay and Warner Bros. hired him to direct what would become a classic. From the backgrounds of the many players to the pre-production, production, and post-production of the film, this complete history recounts every aspect of *Rebel Without a Cause* from its rudiments to the 1955 Academy Awards: the selection of cast and crew, legal fights, changing screenwriters and the many variations of the story, location scouting, auditions, script readings, difficulties with the censors, romances and fights, the editing, test screenings, and, of course, the death of its star. Dozens of intimate anecdotes, from wardrobe decisions to James Dean's pranks, add rich detail. An epilogue discusses the possible sequels, rights conflicts, documentaries, musicals, and spin-off attempts, and offers concluding words on the cast and crew.
