***User Unfriendly Jun 30 2020 We've all been there. Seduced by the sleek designs and smart capabilities of the newest gadgets, we end up stumped by their complicated set-up instructions and exasperating error messages. In this fascinating history, Joseph J. Corn maps two centuries of consumer frustration and struggle with personal technologies. Aggravation with the new machines people adopt and live with is as old as the industrial revolution. Clocks, sewing machines, cameras, lawn mowers, bicycles, electric lights, cars, and computers: all can empower and exhilarate, but they can also exact a form of servitude. Adopters puzzle over which type and model to buy and then how to operate the device, diagnose its troubles, and meet its insatiable appetite for accessories, replacement parts, or upgrades. It intrigues Corn that we put up with the frustrations our technology thrusts upon us, battling with the unfamiliar and climbing the steep learning curves. It is this ongoing struggle, more than the uses to which we ultimately put our machines, that animates this quizzical study. Having extensively researched owner's manuals, computer user-group newsletters, and how-to literature, Corn brings a fresh, consumer-oriented approach to the history of technology. User Unfriendly will be valuable to historians of technology, students of American culture, and anyone interested in our modern dependency on machines and gadgets.***

*Remote-controlled Push Lawn Mower Aug 01 2020 A remote-controlled lawn mower has been designed for those who have decreased mobility, but still wish to take care of their property. Through a mounted camera with real time feedback, a person can track the exact location of the lawn mower through a monitor. It uses easily ordered materials to transform a machine that requires significant physical labor, into one that is accessible for all people. By modifying a push lawn mower through added motors, a motor driver, batteries, and other electronic components, a person can operate this from afar with decent efficiency. While both gas and battery-powered lawn mowers are effective, eliminating the usage of natural gas as fuel has proven to reduce emissions and prevent environmental harm. Every component was analyzed for local availability and affordability before its purchase, ensuring that the average homeowner could access them. To ensure safety, a circuit breaker has been added as a failsafe to inhibit motor damage. Upon testing, small inconveniences were discovered, but corrections were made to improve operations. While autonomous lawn mowers have been released, there are not many which are remote-controlled on the market. The lawn mower assembly is outlined with the inclusion of an instruction manual. Ideally, anyone with a push lawn mower could do this themselves with a DIY kit. After construction, the device will cut grass and be fully remote-controlled once turned on manually. With room for more modifications and upgrades, this prototype creates a reliable and affordable standard that can be built upon with more time and resources.*

Part Two offers a solution on what it will take for churches to make a healthy transition from the Church of Me to the Church of We. Church Together, for this reason, gives churches a manageable plan to defy the individualistic spirit of the age as they become the Church of We in the Age of Me.*
