The formulation 'egalitarian strangeness' is a direct borrowing from Courts voyages au pays du peuple [Short Voyages to the Land of the People] (1990), a collection of essays by the contemporary French thinker Jacques Rancière. Perhaps best known for his theory of radical equality as set out in *Le Maître ignorant* [The Ignorant Schoolmaster] (1987), Rancière reflects on ways in which a hierarchical social order based on inequality can come to be unsettled. In the democracy of literature, for example, he argues that words and sentences serve to capture any life and to make it available to any reader. The present book explores embedded forms of social and cultural 'apportionment' in a range of modern and contemporary French texts (including prose fiction, socially engaged commentary, and autobiography), while also identifying scenes of class disturbance and egalitarian encounter. Part One considers the 'refrain of class' audible in works by Claude Simon, Charles Péguy, Marie Ndiaye, Thierry Beinstingel, and Gabriel Gauny and examines how these authors' practices of language connect with that refrain. In Part Two, Hughes analyses forms of domination and dressage with reference to Simone Weil's mid-1930s factory journal, Paul Nizan's novel of class alienation *Antoine Bloyé* from the same decade, and Pierre Michon's *Vies minuscules* [Small Lives] (1984) with its focus on obscure rural lives. The reflection on how these narratives draw into contiguity antagonistic identities is extended in Part Three, where individual chapters on Proust and the contemporary authors François Bon and Didier Eribon demonstrate ways in which enduring forms of cultural distribution are both consolidated and contested.

Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of research is not limited to very young and old patients—sleep disorders reach across all ages and ethnicities. *Sleep Disorders and Sleep Deprivation* presents a structured analysis that explores the following:

- Improving awareness among the general public and health care professionals.
- Increasing investment in interdisciplinary somnology and sleep medicine research training and mentoring activities.
- Validating and developing new and existing technologies for diagnosis and treatment.

This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems.

'Essential reading.' - Susan Cain, author of *Quiet* Every day we speak around 16,000 words - but inside our minds we create tens of thousands more. Thoughts such as 'I'm not spending enough time with my children' or 'I'm not good enough to present my work' can seem to be unshakable facts. In reality, they're the judgemental opinions of our inner voice. Drawing on more than twenty years of academic research, consulting, and her own experiences overcoming adversity, Susan David PhD, a psychologist and faculty member at Harvard Medical School, has pioneered a new way to enable us to make peace with our inner self, achieve our most valued goals, make real change, and live life to the fullest. Susan David has found that emotionally agile people experience the same stresses and setbacks as anyone else. The difference is the emotionally agile know how to unhook themselves from unhelpful patterns, and how to create values-based success with better habits and behaviours. *Emotional Agility* describes a new way of living and relating to yourself and the world around you. Become aware of your true nature, learn to face your emotions with acceptance and generosity, act according to your deepest values, and flourish. 'An accessible, reader-friendly voyage. Emotional Agility can be helpful to anyone.' - Daniel Goleman, author of *Emotional Intelligence*

Susan David has a PhD in psychology and a post-doctorate in emotions research from Yale. She is a psychologist at the Harvard Medical School and a founder and director at the Harvard/McLean-affiliated Institute of Coaching. I'll tell you: pleasure!" explains Jean Vanier, founder of the international federation of L'Arche communities where people with and without intellectual disabilities share their lives. Vanier's spiritual vision and playful sense of humour shaped L'Arche, but the organization was also informed by its surprising history with the United Church of Canada. In *Tender to the World* Carolyn Whitney-Brown explores the connections between the two organizations through diverse critical insights from Julia Kristeva, Doreen Massey, and Mikhail Bakhtin, as well as Vanier's controversial articulation of the gift of weakness. Tracing the five-decade relationship between L'Arche and the United Church alongside evolving disability theories, Whitney-Brown examines both the fundamental importance of stories and the agency of people with intellectual disabilities. Inversion – a transformative overturning of expectations in social interactions – can be upsetting or exciting, challenging or inspiring, she argues. This book offers a fresh look at how L'Arche and the United Church have worked to break down walls of difference, illuminating how each tenders something unexpected to the other and to the world. At a time when many are seeking new visions for society, the long and complex relationship between Canada's largest Protestant denomination and L'Arche offers both encouragement and a deeper way to approach questions of living in diverse communities.

He is a master of his artistic medium and has managed this success on broadcast networks rather than on cable. Web site: <http://www.engin.umich.edu/> cr The colorful history of the Hawaiian Islands, since their discovery in 1778 by the great British navigator Captain James Cook, falls naturally into three periods.

During the first, Hawaii was a monarchy ruled by native kings and queens. Then came the perilous transition period when new leaders, after failing to secure annexation to the United States, set up a miniature republic. The third period began in 1898 when Hawaii by annexation became American territory. The Hawaiian Kingdom, by Ralph S. Kuykendall, is the detailed story of the island monarchy. In the first volume, "Foundation and Transformation," the author gives a brief sketch of old Hawaii before the coming of the Europeans, based on the known and accepted accounts of this early period. He then shows how the arrival of sea rovers, traders, soldiers of fortune, whalers, scoundrels, missionaries, and statesmen transformed the native kingdom, and how the foundations of modern Hawaii were laid. In the second volume, "Twenty Critical Years," the author deals with the middle period of the kingdom's history, when Hawaii was trying to insure her independence while world powers maneuvered for dominance in the Pacific. It was an important period with distinct and well-marked characteristics, but the noteworthy changes and advances which occurred have received less attention from students of history than they deserve. Much of the material is taken from manuscript sources and appears in print for the first time in the second volume. The third and final volume of this distinguished trilogy, "The Kalakaua Dynasty," covers the colorful reign of King Kalakaua, the Merry Monarch, and the brief and tragic rule of his successor, Queen Liliuokalani. This volume is enlivened by such controversial personages as Claus Spreckels, Walter Murray Gibson, and Celso Caesar Moreno. Through it runs the thread of the reciprocity treaty with the United States, its stimulating effect upon the island economy, and the far-reaching consequences of immigration from the Orient to supply plantation labor. The trilogy closes with the events leading to the downfall of the Hawaiian monarchy and the establishment of the Provisional Government in 1893. Just in time for the Chairman's centennial, the endlessly absorbing sequel to James Kaplan's bestselling Frank: The Voice Finally the definitive biography that Frank Sinatra, justly termed 'The Entertainer of the Century,' deserves and requires. Like Peter Guralnick on Elvis, Kaplan goes behind the legend to give us the man in full, in his many guises and aspects: peerless singer, (sometimes) powerful actor, business mogul, tireless lover and associate of the powerful and infamous. In 2010's Frank: The Voice, James Kaplan, in rich, distinctive, compulsively-readable prose, told the story of Frank Sinatra's meteoric rise to fame, subsequent failures, and reinvention as a star of the stage and screen. The story of 'Ol' Blue Eyes; continues with Sinatra: The Chairman, picking up the day after Frank claimed his Academy Award in 1954 and had reestablished himself as the top recording artist in music. Frank's life post-Oscar was incredibly dense: in between recording albums and singles, he often shot four or five movies a year; did TV show and nightclub appearances; started his own label, Reprise; and juggled his considerable commercial ventures (movie production, the restaurant business, even prizefighter management) alongside his famous and sometimes notorious social activities and commitments. Collection of scholarly essays on the wildly popular Comedy Central show.
