KEY FEATURES

- Covers numerous concepts, techniques, best practices and troubleshooting tips by community experts.
- Includes practical demonstration of robust deep learning prediction models with exciting use-cases.
- Covers the use of the most powerful research toolkit such as Python, PyTorch, and Neural Network Intelligence.

DESCRIPTION This book is aimed at teaching the readers how to apply the deep learning techniques to the time series forecasting challenges and how to build prediction models using PyTorch. The readers will learn the fundamentals of PyTorch in the early stages of the book. Next, the time series forecasting is covered in greater depth after the programme has been developed. You will try to use machine learning to identify the patterns that can help us forecast the future results. It covers methodologies such as Recurrent Neural Network, Encoder-decoder model, and Temporal Convolutional Network, all of which are state-of-the-art neural network architectures. Furthermore, for good measure, we have also introduced the neural architecture search, which automates searching for an ideal neural network design for a certain task. Finally by the end of the book, readers would be able to solve complex real-world prediction issues by applying the models and strategies learnt throughout the course of the book. This book also offers another great way of mastering deep learning and its various techniques.

WHAT YOU WILL LEARN

Pakistan was once only an inspired vision. In 1947, through great sacrifice, a miraculous new nation was born. With its people energised and free, it seemed there was no height Pakistan would not scale. Now, many decades later, as we look back on years of strife, division and poverty cultivated by generations of misguided leaders, we find ourselves wondering how this glorious inheritance became so spoiled. Atif F Qureshi examines the causes of the calamity, in particular the explanation that trumps all others - the import of Western political, legal and economic systems. Detailing why these methods are wholly unworkable for an independent Muslim nation, he examines how Western concepts such as socialism and English Civil Law have led to crises ranging from economic stagnation to terrorist insurgencies. Yet the decline is not irreversible. Qureshi outlines policies that by returning to core Islamic values will revive, rejuvenate and revitalise this beautiful nation. From defence and the environment to education and banking, every aspect of national planning is explored. He shows how in spite of all the travails, Pakistan is well-placed for a glorious future. After all, a manifest

A rich collection of captivating and remarkable chapters, *Writing Namibia Coming of Age* presents research of senior academics as well as emerging scholars from Namibia. The book includes wide ranging topics in literature written in English and other Namibian languages, such as German, Afrikaans and Oshiwambo. Almost thirty years after independence, Namibia literature has come of age with new writers experimenting with different genres and varied aspects of literature. As an aesthetic object and social phenomenon, Namibian literature still fulfils the function of social conscience and as new writers emerge, there is ample demonstration that, pluri-vocal as they are, Namibian literary texts relate in a complex manner to the socio-historical trends shaping the country. The Namibian literary-critical tradition continues to paint some versions of Namibia and what we find in this new and highly welcome volume is a canvas of rich voices and perspectives that demonstrate an intricate diversity in terms of culture, language, and themes. American pilot Major Ellie has crashed his plane in the middle of a desert. Lucky for him there's room for him at the very refugee camp he was supposed to bomb. Teenage Momo doesn't see it that way: the camp is a trap, not a refuge. An in-depth look at how U.S. Latino advocacy groups are using ethnoracial demographic projections to bring about political change in the present For years, newspaper headlines, partisan speeches, academic research, and even comedy routines have communicated that the United States is undergoing a profound demographic transformation—one that will purportedly change the “face” of the country in a matter of decades. But the so-called browning of America, sociologist Michael Rodríguez-Muñiz contends, has less to do with the complexion of growing populations than with past and present struggles shaping how demographic trends are popularly imagined and experienced. Offering an original and timely window

into these struggles, Figures of the Future explores the population politics of national Latino civil rights groups. Based on eight years of ethnographic and qualitative research, spanning both the Obama and Trump administrations, this book investigates how several of the most prominent of these organizations—including UnidosUS (formerly NCLR), the League of United Latin American Citizens, and Voto Latino—have mobilized demographic data about the Latino population in dogged pursuit of political recognition and influence. In census promotions, get-out-the-vote campaigns, and policy advocacy, this knowledge has been infused with meaning, variously serving as future-oriented sources of inspiration, emblems for identification, and weapons for contestation. At the same time, Rodríguez-Muñiz considers why these political actors have struggled to translate this demographic growth into tangible political gain and how concerns about white backlash have affected how they forecast demographic futures. Figures of the Future looks closely at the politics surrounding ethnoracial demographic changes and their rising influence in U.S. public debate and discourse.
