**Life Writing and Politics of Memory in Eastern Europe** Mar 25 2020 This volume addresses the issues of remembering and performing the past in Eastern European ex-communist states in the context of multiplication of the voices of the past. The book analyzes the various ways in which memory and remembrance operate; it does so by using different methods of recollecting the past, from oral history to cultural and historical institutions, and by drawing on various political and cultural theories and concepts. Through well-documented case studies the volume showcases the plurality of approaches available for analyzing the relationship between memory and narrative from an interdisciplinary and international perspective.

**Multiple Affordances of Language Corpora for Data-driven Learning** Sep 11 2021 In recent years, corpora have found their way into language instruction, albeit often indirectly, through their role in syllabus and course design and in the production of teaching materials and other resources. An alternative and more innovative use is for teachers and students alike to explore corpus data directly as part of the learning process. This volume addresses this latter application of corpora by providing research insights firmly based in the classroom context and reporting on several state-of-the-art projects around the world where learners have direct access to corpus resources and tools and utilize them to improve their control of the language systems and skills or their professional expertise as translators. Its aim is to present recent advances in data-driven learning, addressing issues involving different types of corpora, for different learner profiles, in different ways for different purposes, and using a variety of different research methodologies and perspectives.

**Reservoir Quality of Clastic and Carbonate Rocks** Sep 23 2022 Reservoir quality is studied using a wide range of similar techniques in both sandstones and carbonates. Sandstone and carbonate reservoir quality both benefit from the study of modern analogues and experiments, but modelling approaches are currently quite different for these two types of reservoirs. There are many common controls on sandstone and carbonate reservoir quality, but also distinct differences due primarily to mineralogy. Numerous controversies remain including the question of oil inhibition, the key control on pressure solution and geochemical flux of material to or from reservoirs. This collection of papers contains case-study-based examples of sandstone and carbonate reservoir quality prediction as well as modern analogue, outcrop analogue, modelling and advanced analytical approaches.

**Crafting Trade and Investment Accords for Sustainable Development** Oct 20 2019 International economic law guides and shapes globalization and the future of the world economy, our human societies, and the Earth. The rules which facilitate trade and investment could defend the interests of Hermes, Greek god of commerce and thieves, or learn to draw inspiration from Athena, goddess of justice, wisdom, and crafts. This volume explores how trade and investment agreements could promote more sustainable development, rather than increasing the negative social and environmental impacts of economic growth. States and other actors are attempting to integrate social and environmental considerations into trade and investment policies, towards more sustainable development. Analysing their efforts, this volume offers insights into the ways that commitments to sustainability are being operationalized in the texts of economic treaties themselves. Written by a renowned expert jurist and professor of law, this book examines the measures being debated in the WTO and adopted by States in a selection of innovative and flexible regional and bilateral trade and investment accords. With legal examples spanning decades of experimentation and experience, the book illuminates how States and stakeholders are seeking innovative ways to integrate environmental and social considerations into trade and investment agreements. Introducing a ground-breaking systematic approach, the volume considers how, through this integration, international trade and investment law can contribute to the achievement of the world's Sustainable Development Goals.

**Financial Accounting** May 19 2022 Success in Accounting begins here! The technical details you need to know and decision-making processes you need to understand, with plain-language explanations and unlimited practice. Financial Accounting is an engaging resource that focuses on current accounting theory and practice in Australia, within a business context. **Conversational Exchanges in Early Modern England (1549-1640)** Feb 22 2020 Conversational Exchanges in Early Modern England (1549-1640) presents an opportunity to understand how texts, performances, politics, and historical topics intersected and informed cultural productions during this period. These analyses of conversational exchanges across genres permit readers to grasp how conversation functioned as both a compositional methodology and an interpretive hermeneutic in early modern England. The essays gathered here adopt eclectic critical approaches from the perspectives of historicism, gender studies, print culture studies, performance studies, object-oriented ontologies, and the digital humanities to collectively argue that "conversation" is not only a site of reproductive intercourse, but one of metamorphic between-ness. As this book demonstrates, conversation extends what is conventionally thought of as "source study" by treating multiple sources as active interlocutors. These essays discuss how writers of this period push the boundaries of conventional, diachronic imitation by engaging with ancient and/or contemporary sources to lend a sense of immediacy to the subject at hand. Each contribution examines the varying degrees to which "conversation" carries within itself a sense of internal crisis, a turning back and forth, a form of sexual and textual intercourse that does not simply reproduce, but metamorphoses with each interaction.

**The Global Making of Policing** Nov 01 2020 This edited volume analyses the global making of security institutions and practices in our postcolonial world. The volume will offer readers the opportunity to gain a deeper understanding of the global making of how security is thought of and practiced, from US urban policing, diaspora politics and transnational security professionals to policing encounters in Afghanistan, Palestine, Colombia or Haiti. It critically examines and decentres conventional perspectives on security governance and policing. In doing so, the book offers a fresh analytical approach, moving beyond dominant, one-sided perspectives on the transnational character of security governance, which suggest a diffusion of models and practices from a 'Western' centre to the rest of the globe. Such perspectives omit much of the experimenting and learning going on in the (post)colony as well as the active agency and participation of seemingly subaltern actors in producing and co-constituting what is conventionally thought of as 'Western' policing practice, knowledge and institutions. This is the first book that studies the truly global making of security institutions and practices from a postcolonial perspective, by bringing together highly innovative, in-depth empirical cases studies from across the globe. It will be of particular interest to students and scholars interested in International Relations and Global Studies, (critical) Security Studies, Criminology and Postcolonial Studies.

*International Adoption and Clinical Practice* Dec 26 2022 No matter how positive the intent of prospective parents, international adoption is fraught with emotional, medical, administrative, linguistic, and geopolitical issues. And while a wide range of professionals supports adopted children and their families in adjusting to the inherent changes and disruptions, the pediatrician's tasks--identifying and treating existing health problems and preventing numerous others--are particularly complex. *International Adoption and Clinical Practice* equips pediatricians with a comprehensive set of tools for establishing a long-term care plan and creating interventions to promote healthy development. This concise guide overviews the intricacies of the international adoption process and how they can affect the pediatrician's job, from potential pitfalls in collecting medical data from a child's birth country to tracking health concerns into adolescence and young adulthood. Developmental and behavioral issues including attachment, language acquisition, identity development, and consequences of abuse and neglect are also examined in this context. Figures, tables, and reference lists complement current information on topics such as: Epidemiology and demographics of international adoption. Pre-adoption evaluation of medical records. Guidelines for diagnostic testing, screening, laboratory evaluations, and immunizations. Common mental health issues faced by adopted children and their families. Long-term and adult outcomes of international adoption. Relevant policy issues and areas for future study. Every child deserves a safe and healthy home, and *International Adoption and Clinical Practice* gives pediatricians an in-depth framework for helping to make this possible as children make the transition to a new country and the next stage of their lives.

The Eastern Mediterranean in Transition Jan 23 2020 The wider region of the Eastern Mediterranean is in transition. What is being evinced is a situation of continuous volatility, centering on developments such as the 'Arab Spring,' the Greek sovereign debt crisis, Islamic terrorism, the continuation of deadlock over the Cypriot and Palestinian Issues, significant energy finds in the Levantine Basin, concerns over nuclear proliferation and, more recently, the Syrian Civil War. At a systemic level, the move towards a regional multipolar reality has also contributed to volatility by creating a crescendo of antagonisms between all the major international actors who continuously strive for more influence, power and prestige. This collective project by leading experts represents a unique combination of International Theory and International Politics analysis that deals exclusively with the wider Eastern Mediterranean. It scrutinizes in a multidimensional manner the current geostrategic and geopolitical conditions that include the latest domestic socio-political events, as well as the active involvement of the Great Powers in the region. This book should be of interest to academics, decision-makers and a general reading public focusing on a significant and influential region in flux.

*Routledge Handbook of Maritime Regulation and Enforcement* Oct 12 2021 With advances in technology and maritime transport, human use of the ocean now extends beyond the traditional activities of navigation and fishing. Emerging activities such as bioprospecting, deep seabed mineral and hydrocarbon exploration and exploitation, offshore renewable energy developments and marine scientific probes of deep sea areas challenge the applicability of maritime law and policy in new ways. This handbook examines current regulatory and enforcement instruments and mechanisms for different sectors of maritime activity. Covering various jurisdictions, its specially commissioned chapters are authored by some of the world's foremost authorities on maritime law, and offer unique perspectives on maritime law, policy and practice. This highly relevant collection is organised into four parts: • International Law Considerations in Maritime Regulation and Enforcement • Role of States and other International Actors in Maritime Regulation and Enforcement • Regulation and Enforcement in Different Maritime Sectors • Current Issues and Future Challenges This comprehensive reference work will be of interest to scholars and students of maritime law, practitioners and non-lawyers interested in the regulation of offshore areas, as well as policy-makers.

**Lone-Actor Terrorists** Apr 18 2022 This book provides the first empirical analysis of lone-actor terrorist behaviour. Based upon a unique dataset of 111 lone actors that catalogues the life span of the individual's development, the book contains important insights into what an analysis of their behaviours might imply for practical interventions aimed at disrupting or even preventing attacks. It adopts insights and methodologies from criminology and forensic psychology to provide a holistic analysis of the behavioural underpinnings of lone-actor terrorism. By focusing upon the behavioural aspects of each offender and by analysing a variety of case studies, including Anders Breivik, Ted Kaczynski, Timothy McVeigh and David Copeland, this work marks a pointed departure from previous research in the field. It seeks to answer the following key questions: Is there a lone-actor terrorist profile and how do they differ? What behaviours did the lone-actor terrorist engage in prior to his/her attack and is there a common behavioural trajectory into lone-actor terrorism? How 'lone' do lone-actor terrorists tend to be? What role, if any, does the internet play? What role, if any, does mental illness play? This book will be of much interest to students of terrorism/counter-terrorism studies, political violence, criminology, forensic psychology and security studies in general.

**Disaster Risk Communication** May 07 2021 This book provides a unique blend of integrated disaster risk communication research conducted by authors with diverse backgrounds, including social psychology, sociology, civil engineering, informatics, and meteorology. It reports on the latest advances in collaborative and participatory action research on community-based disaster management from the frontline in Japan, Nepal, China and the USA. In addition, it employs and integrate a broad range of methodologies, including mathematical analyses, computer simulations, questionnaire surveys, gaming approaches, and participatory observation. Each chapter deals with disaster risk communication initiatives to address various hazards, such as earthquakes, tsunamis, floods and landslides, which are uniquely integrated from a social psychological perspective.

**Five Year Mission** Dec 14 2021 In May 2010, Labour suffered one of its worst ever election defeats. A few months later it chose Ed Miliband as its new leader. His task? To win back power after just one term in opposition - a tall order given how many voters had come to blame Labour for the economic mess the country was in, and to see the party as a soft-touch when it came to immigration and welfare. Even those who were more sympathetic had their doubts. Was Ed Miliband really leadership material? Would he be able to overcome defeating his elder brother to get to the top? Would he have to do as he was told by the trade union leaders who had helped him win? Could he resolve the tensions between Blairites and Brownites, Blue Labour and New Labour? Might his desire to keep his colleagues united mean Labour stayed stuck in its comfort zone? Would he, in seeking to break from the party's recent past, take it too far to the left? Could he offer the electorate something really radical in 2015 or would he instead choose something safer but ultimately less inspiring? And what should twenty-first social democracy look like now that the money had run out? This book, by one of the country's foremost experts on party politics, seeks to answer all those questions and, in the run up to

the 2015 general election, to ask one more: will Ed Miliband's five year mission turn out to be 'mission impossible'?

**Essential Travel Medicine** Nov 25 2022 This 1st edition of *Essential Travel Medicine* provides an excellent concise introduction to the specialty of Travel Medicine. This core text will enable health care practitioners particularly those new to the clinical practice of Travel Medicine, to gain a fundamental understanding of the diverse and complex issues which can potentially affect the health of the many millions of people who undertake international travel. **From the Elephant's Back** Jan 15 2022 "This collection has a straightforward ambition: to redirect the interpretive perspective that readers bring to Lawrence Durrell's literary works by returning their attention to his short prose." – From the Introduction Best known for his novels and travel writing, Lawrence Durrell defied easy classification within twentieth-century modernism. His anti-authoritarian tendencies put him at odds with many contemporaries—aesthetically and politically. However, thanks to a compelling recontextualization by editor James Gifford, these 38 previously unpublished or out-of-print essays and letters reveal that Durrell's maturation as an artist was rich, complex, and subtle. This edition promises to open up new approaches to interpreting his more famous works. Durrell fans will treasure this selection of rare nonfiction, while scholars of Durrell, Modernist literature, anti-authoritarian artists, and the Personalist movement will also appreciate Gifford's fine editorial work.

**Industrial Chemistry** Oct 24 2022 Along with the first volume on "Industrial Chemistry" this book discusses, illustrates and explains many of the major chemical processes performed by industry, looks at how transformations affect the quality of our lives, examines the various types of waste produced as necessary products are developed and marketed, and shows techniques and practices in which many industries have made strides to improve or "green" specific chemical processes.

**Permanent State of Emergency** Aug 22 2022 In the wake of the attacks of September 11, 2001, the United States launched initiatives that test the limits of international human rights law. The indefinite detention and torture of detainees at Guantánamo Bay, targeted killing, and mass surveillance require an expansion of executive authority that negates the rule of law. In *Permanent State of Emergency*, Ryan Alford establishes that the ongoing failure to address human rights abuses is a symptom of the most serious constitutional crisis in American history. Instead of curbing the increase in executive power, Congress and the courts facilitated the breakdown of the nation's constitutional order and set the stage for presidential supremacy. The presidency, Alford argues, is now more than imperial: it is an elective dictatorship. Providing both an overview and a systematic analysis of the new regime, he objectively demonstrates that it does not meet even the minimum requirements of the rule of law. At this critical juncture in American democracy, *Permanent State of Emergency* alerts the public to the structural transformation of the state and reiterates the importance of the constitutional limits of the American presidency.

**The Churchill Sisters** May 27 2020 As complex in their own way as their Mitford cousins, Winston and Clementine Churchill's daughters each had a unique relationship with their famous father. Rachel Trethewey's biography, *The Churchill Sisters*, tells their story. Bright, attractive and well-connected, in any other family the Churchill girls – Diana, Sarah, Marigold and Mary – would have shone. But they were not in another family, they were Churchills, and neither they nor anyone else could ever forget it. From their father – 'the greatest Englishman' – to their brother, golden boy Randolph, to their eccentric and exciting cousins, the Mitford Girls, they were surrounded by a clan of larger-than-life characters which often saw them overlooked. While Marigold died too young to achieve her potential, the other daughters lived lives full of passion, drama and tragedy. Diana, intense and diffident; Sarah, glamorous and stubborn; Mary, dependable yet determined – each so different but each imbued with a sense of responsibility toward each other and their country. Far from being cosseted debutantes, these women were eyewitnesses at some of the most important events in world history, at Tehran, Yalta and Potsdam. Yet this is not a story set on the battlefields or in Parliament; it is an intimate saga that sheds light on the complex dynamics of family set against the backdrop of a tumultuous century. Drawing on previously unpublished family letters from the Churchill archives, *The Churchill Sisters* brings Winston's daughters out of the shadows and tells their remarkable stories for the first time.

**The Kurdish Spring** Jul 21 2022 Kurds are the largest stateless people in the world. An estimated thirty-two million Kurds live in "Kurdistan," which includes parts of Turkey, Iraq, Syria, and Iran today's "hot spots" in the Middle East. *The Kurdish Spring* explores the subjugation of Kurds by Arab, Ottoman, and Persian powers for almost a century, and explains why Kurds are now evolving from a victimized people to a coherent political community. David L. Phillips describes Kurdish rebellions and arbitrary divisions in the last century, chronicling the nadir of Kurdish experience in the 1980s. He discusses draconian measures implemented by Iraq, including use of chemical weapons, Turkey's restrictions on political and cultural rights, denial of citizenship and punishment for expressing Kurdish identity in Syria, and repressive rule in Iran. Phillips forecasts the collapse and fragmentation of Iraq. He argues that US strategic and security interests are advanced through cooperation with Kurds, as a bulwark against ISIS and Islamic extremism. This work will encourage the public to look critically at the post-colonial period, recognizing the injustice and impracticality of states that were created by Great Powers, and offering a new perspective on sovereignty and statehood.

**International Perspectives on Early Years Workforce Development** Dec 02 2020 This up to date text is suitable for students on all early years and early childhood courses as well as interested practitioners. It looks at the current structure of the early childhood education and care (ECEC) workforce in different countries, each of which represents a distinct philosophical tradition, tracing what has shaped this structure and examining how politics and policy have moulded the workforce over time. Each chapter analyses historical, philosophical and political developments in the respective country and looks at key theorists, the concepts of childhood that have shaped the workforce and the pedagogical approach. The unique aspects of each country are highlighted along with a consideration of what the future might hold for the workforce. Students and practitioners will

achieve a more critical understanding of current practice and the beliefs which underpin particular pedagogical approaches while being encouraged to question their own values and practice.

*Masculinity in Breaking Bad* Sep 30 2020 Following on author Peter Rollins' motto "If it isn't popular, it isn't culture," this collection of new essays considers Vince Gilligan's award-winning television series *Breaking Bad* as a landmark of Western culture--comparable to the works of Shakespeare and Dickens in their time--that merits scholarly attention from those who would understand early the 21st century zeitgeist. The essayists explore the series as a critique of American concepts of masculinity, with Walter White discussed as a father archetype--provider, protector, author of a legacy--and as a Machiavellian warrior on the capitalist battleground. Other topics include the mutual exclusivity of intellect and masculinity in American culture, and the dramatic irony as White's rationales for his criminal life are gradually revealed as a lie. In "round table" chapters, contributors discuss the show's reception, fans who root for "Team Walt," "Skyler-hating" and *Breaking Bad* as a feminist text.

*Accounting* Jun 20 2022 Success in Accounting begins here! The technical details you need to know and decision making processes you need to understand, with plain language explanations and the power of unlimited practice. Accounting is an engaging resource that focuses on current accounting theory and practice in Australia, within a business context. It emphasises how financial decision-making is based on accurate and complete accounting information and uses case studies to illustrate this in a practical way. The new seventh edition is accurate and up-to-date, guided by extensive technical review feedback and incorporating the latest Australian Accounting Standards. It also provides updated coverage of some of the most significant current issues in accounting such as ethics, information systems and sustainability.

**A Critical Look at Institutional Mission** Mar 17 2022 This book explores the relevance of institutional mission to writing program administration and writing center direction. It helps WPAs and writing center directors understand the challenges and opportunities mission can pose to their work. It also examines ways WPAs and writing center directors can work with and against mission statements and legacy practices to do their best work.

*Crowdsourced Geographic Information Use in Government* Jul 09 2021 The acceptance of volunteered geographic information (VGI) as a valued and useful source of information for governments is growing at all levels. Put simply, VGI is "crowdsourced" geographic information provided by a wide range of participants with varying levels of education, knowledge and skills (see Michael Goodchild's writing for the original definition of the term). While a growing body of research demonstrates the reliability and accuracy of VGI when compared to official or government produced data sets, the progression towards their adoption and wider use is slow. There are a range of mechanisms and methods available for ensuring that crowdsourced information is fit for purpose so concerns about data quality are not the major reason for the lack of adoption. Instead, organizational practices, regulations and legal issues limit the rate of change. This report is based on a six-month study of the use of VGI by government and aims to provide a guide for the successful implementation of VGI.

*Advocacy in Conflict* Jul 29 2020 Conflicts in Africa, Asia and Latin America have become a common focus of advocacy by Western celebrities and NGOs. This provocative volume delves into the realities of these efforts, which have often involved compromising on integrity in pursuit of profile and influence. Examining the methods used by Western advocates, how they relate to campaigns in the countries concerned, and their impact, expert authors evaluate the successes and failures of past advocacy campaigns and offer constructive criticism of current efforts. Taking in a range of high-profile case studies, including campaigns for democracy in Burma and Latin America, for the rights of Palestinians in Gaza, and opposing the Lord's Resistance Army in Uganda, the authors challenge the assumptions set forth by advocacy organizations.

*Handbook of Clean Energy Systems, 6 Volume Set* Jun 27 2020 The Handbook of Clean Energy Systems brings together an international team of experts to present a comprehensive overview of the latest research, developments and practical applications throughout all areas of clean energy systems. Consolidating information which is currently scattered across a wide variety of literature sources, the handbook covers a broad range of topics in this interdisciplinary research field including both fossil and renewable energy systems. The development of intelligent energy systems for efficient energy processes and mitigation technologies for the reduction of environmental pollutants is explored in depth, and environmental, social and economic impacts are also addressed. Topics covered include: Volume 1 - Renewable Energy: Biomass resources and biofuel production; Bioenergy Utilization; Solar Energy; Wind Energy; Geothermal Energy; Tidal Energy. Volume 2 - Clean Energy Conversion Technologies: Steam/Vapor Power Generation; Gas Turbines Power Generation; Reciprocating Engines; Fuel Cells; Cogeneration and Polygeneration. Volume 3 - Mitigation Technologies: Carbon Capture; Negative Emissions System; Carbon Transportation; Carbon Storage; Emission Mitigation Technologies; Efficiency Improvements and Waste Management; Waste to Energy. Volume 4 - Intelligent Energy Systems: Future Electricity Markets; Diagnostic and Control of Energy Systems; New Electric Transmission Systems; Smart Grid and Modern Electrical Systems; Energy Efficiency of Municipal Energy Systems; Energy Efficiency of Industrial Energy Systems; Consumer Behaviors; Load Control and Management; Electric Car and Hybrid Car; Energy Efficiency Improvement. Volume 5 - Energy Storage: Thermal Energy Storage; Chemical Storage; Mechanical Storage; Electrochemical Storage; Integrated Storage Systems. Volume 6 - Sustainability of Energy Systems: Sustainability Indicators, Evaluation Criteria, and Reporting; Regulation and Policy; Finance and Investment; Emission Trading; Modeling and Analysis of Energy Systems; Energy vs. Development; Low Carbon Economy; Energy Efficiencies and Emission Reduction. Key features: Comprising over 3,500 pages in 6 volumes, HCES presents a comprehensive overview of the latest research, developments and practical applications throughout all areas of clean energy systems, consolidating a wealth of information which is currently scattered across a wide variety of literature sources. In addition to renewable energy systems, HCES also covers processes for the efficient and clean conversion of traditional fuels such as coal, oil and gas, energy storage systems, mitigation technologies for the reduction of environmental pollutants, and the development of intelligent energy systems. Environmental, social and economic impacts of energy systems are also addressed in depth. Published in full colour throughout. Fully indexed with cross referencing within and between all six volumes. Edited by leading researchers from academia and industry who are internationally renowned and active in their respective fields. Published in print and online. The online version is a single publication (i.e. no updates), available for one-time purchase or through annual subscription.

**Demography for Planning and Policy: Australian Case Studies** Feb 16 2022 This edited collection shows how demographic analysis plays a pivotal role in planning, policy and funding decisions in Australia. Drawing on the latest demographic data and methods, these case studies in applied demography demonstrate that population dynamics underpin the full spectrum of contemporary social, economic and political issues. The contributors harness a range of demographic statistics and develop innovative techniques demonstrating how population dynamics influence issues such as electoral representation, the distribution of government funding, metropolitan and local planning, the provision of aged housing, rural depopulation, coastal growth, ethnic diversity and the well-being of Australia's Indigenous community. Moving beyond simple statistics, the case studies show that demographic methods and models offer crucial insights into contemporary problems and provide essential perspectives to aid efficiency, equity in public policy and private sector planning. Together the volume represents essential reading for students across the social sciences as for policy makers in government and private industry.

**The Syrian Jihad** Nov 20 2019 The eruption of the anti-Assad revolution in Syria has had many unintended consequences, among which is the opportunity it offered Sunni jihadists to establish a foothold in the heart of the Middle East. That Syria's ongoing civil war is so brutal and protracted has only compounded the situation, as have developments in Iraq and Lebanon. Ranging across the battlefields and international borders have been dozens of jihadi Islamist fighting groups, of which some coalesced into significant factions such as Jabhat al Nusra and the Islamic State. This book assesses and explains the emergence since 2011 of Sunni jihadist organizations in Syria's fledgling insurgency, charts

their evolution and situates them within the global Islamist project. Unprecedented numbers of foreign fighters have joined such groups, who will almost certainly continue to host them. Thus, external factors in their emergence are scrutinized, including the strategic and tactical lessons learned from other jihadist conflict zones and the complex interplay between Al-Qaeda and the Islamic State and how it has influenced the jihadist sphere in Syria. Tensions between and conflict within such groups also feature in this indispensable volume.
