Services for Children and Their Families Dec 17 2021
Services for Children and their Families: Aspects of Child Care for Social Workers is a collection of essays describing the level that the child care service has reached on the eve of the reorganization of program. These essays contain the values, ideas, opinions, and philosophies that are part of the social services. These articles cover the period from 1870 to 1970; in 1971 child care services became the responsibility of the Department of Health and Social Services. Some papers review the influences—historical, economical or geographical—that make the environment where the social worker operates, of which he or she should be aware of their effects. Another essay discusses the contributions of the Children Act 1948 in which it recognizes the rights of the child as an individual human being. It has only been recently that any large-scale use of resources to the preventive work of child care has occurred. One paper addresses the challenges for social workers to re-examine themselves, their responsibilities to society, their identification with certain social controls, and the structures and ways that society can show its concern for children and their families. This collection can benefit sociologists, economists, historians, students and academicians doing sociological research, as well as policy makers involved in social services and welfare.

LAW OF COPYRIGHT Mar 08 2021 The book attempts to critically analyse the cases on the law of copyright as well as statutory provisions of law of copyright. When the first edition of the book was published in 2015, there was no readable and dependable book for the general reader interested to be acquainted with the changing features of the law of copyright immediate after the enactment of the Copyright (Amendment) Act 2012. Since the publication of this book, the Finance Act 2017 has introduced Appellate Board in place of Copyright Board as well as the Supreme Court and High Courts in India have also delivered a large number of judicial decisions on the law of copyright. In this edition the author has surveyed all such Courts decisions and analysed them and inserted them in appropriate places of the book and also examined the impact of the Appellate Board. It presents not only the provisions of the Copyright Act 1957 in the form of a normative, but points out the changes made thereon by formal amendments as well as conflicts of law which have been settled by judicial interpretations. The book is divided into ten chapters. Chapter 1 is introductory, while Chapters 2 and 3 discuss the origin and development of law of copyright at international as well as national level. The most important debatable issue in copyright law is "works in which copyright subsists", and the Chapter 4 is devoted to this aspect. Chapter 5 explores various issues relating to author of work, owner of copyright and recognised rights of copyright owner. The terms of copyright, licensing of copyright, international copyright and registration of copyright are the subject matter of Chapter 6, while rights of

broadcasting organisation and of performers (neighbouring rights) are the subject matter of Chapter 7. Internet is the greatest communication medium of the contemporary era, and there is an inherent link between law of copyright and internet. Therefore, Chapter 8 is devoted to discuss various issues relating to "protection of copyright in internet." While Chapter 9 demonstrates the law relating to infringement of copyright and defences of copyright liability. Chapter 10, the concluding chapter, discusses the enforcement of copyright in India in detail. Though the book is designed for the undergraduate and postgraduate students of Law, it will be equally beneficial for the researchers, academicians, jurists, lawyers, judges as well as members of civil society. TARGET AUDIENCE • Undergraduate and postgraduate students of Law. • Researchers, Academicians, Jurists, Lawyers, Judges as well as members of Civil Society.

Coercion and the State Nov 23 2019 A signal feature of legal and political institutions is that they exercise coercive power. An Introduction to Competition Law Jan 06 2021 This book is intended to serve as a first acquaintance with competition law. It aims to reach a broad range of readers: students, teachers in further and higher education, officials and practising lawyers who are not usually faced with competition law issues in their working lives. This second edition has been fully updated in the light of the latest developments, and covers both EU and UK competition law along with an introduction to the EU rules on State Aid. It provides insight into the combined system of EU and UK competition law, providing a broad range of examples for the three main subjects - the prohibition of cartels, the prohibition of the abuse of a position of dominance and the supervision of concentrations (ie mergers and acquisitions). Those examples are drawn from European and UK practice. These greatly enhance the exposition of the general principles, taking into account recent legislative and judicial developments.

**The Quest for Core Values in the Application of Legal
Norms** Jul 24 2022 Relations between societal values and
legal doctrine are inevitably complex given the time lag
between law and social reality, and the sociological
space between legal communities involved in the
development and application of the law and non-legal
communities affected by it. It falls on open-ended
concepts, such as proportionality, human rights,
dignity, freedom, and truth, and on legal frameworks for
balancing competing rights and interests, such as self-
defense, command or corporate responsibility, and
restrictions on freedom of expression, to negotiate
chronic tensions between law and society and to bridge
existing gaps. The present volume contains chapters by
leading experts - former judges on constitutional courts
and international courts, and some of the world's
leading criminal law, public law, and international law
scholars - offering their points of view and
professional analysis of legal notions and doctrines
that serve as hubs for the interpretation, application,
and contestation of core values, which in turn
constitute building blocks of the rule of law. The
shared perspective on the interplay between values and
legal rules in public law, criminal law, and
international law is likely to render the publication a

valuable resource for both theoreticians and practitioners, law students, and seasoned legal experts working in diverse legal fields.

Firm Dominance in EU Competition Law Aug 21 2019 How does it come about that a certain firm dominates a market? Can an understanding of this process lead to a more effective enforcement of competition law? That is the question approached in this compelling book. The author reviews the European Union's (EU's) Article 102 case law, comparing it with United States (US) provisions, demonstrating that new ways of looking at market power are needed - today's tech giants differ from older monopolies. He clarifies the role of dominant firms in the competitive process, proposing that conduct should be scrutinized differently depending on the source of market power, rather than using the same approach for all dominant undertakings. Supporting his contention that the legal consequences that derive from holding a dominant position cannot be disassociated from the sources of that market power—that a dynamic understanding of dominance requires looking both forwards and backwards in time—the author examines such sources of dominance as the following: - statutory dominance derived from explicit protectionist measures or subtler geoeconomic strategies; - legacy firms such as the telecommunications or transport industries; - natural monopolies, e.g., the exploitation of a mine; - investment efforts undertaken in a competitive environment; - intangible resources such as timing,

reputation, experience, innovation capabilities, or managerial processes; - lucky monopolies; and - anticompetitive behavior on the road to dominance. Drawing insights from EU and US case law, industrial organization scholarship, and strategic management literature, the book resolves questions related to the role that the origins of market power have played and should play in the enforcement of EU competition rules against dominant firms. It concludes with a list of policy recommendations bringing the application of Article 102 TFEU against dominant firms more in line with the objective of protecting the competitive process. With its focus on how EU competition law enforcement should be fine-tuned to adequately incorporate the origins of firm dominance into the analysis of single-firm behavior, the book makes a major contribution to the analysis of anticompetitive effects. Practitioners, competition authorities, and academics in competition law will greatly appreciate the book's combination of legal analysis and recommendations for policy reform.

Consumer Protection in Asia Jan 18 2022 This book looks at the consumer protection offered in a range of Asian countries, for example China, Japan, and South Korea in key areas such as consumer sales law, unfair terms, product liability, and unfair commercial practices. However, it is interesting to note that consumer protection is on the rise everywhere and to compare how this differs depending upon the legal cultures. It is also fascinating to reflect on the influence of models for law reform such as the EU laws. ASEAN has also affected the development of consumer policy for its member states. The book takes the form of national reports which explain the development of the law and also shed light on how the law works in practice. The book also contains thematic reports which look at each area of the law from a comparative perspective. Commentators from around the globe reflect on their impression of Asian consumer law based on their own differing legal systems and benchmarks. A must-read for anyone with an interest in consumer law in Asia and beyond, this book will form the basis of further research and discussion internationally.

The Arbitrator's Discretion in Conflict of Laws Matters Sep 02 2020 Internationale Schiedsverfahren und CISG bilden eine neutrale Plattform für internationale Handelsstreitigkeiten. Allerdings ist unklar, ob Schiedsrichter das CISG überhaupt anwenden müssen. Diese Arbeit untersucht zunächst die Rechtsnatur der Anwendungsnormen des CISG, mit dem Ergebnis, dass es sich um Internationales Privatrecht handelt. Dies führt zu der grundsätzlichen Frage nach der Bindung von Schiedsrichtern an IPR, in deren Prüfung völker- und europarechtliche sowie rechtspraktische Aspekte einbezogen werden. Eine Bindung wird abgelehnt. Schließlich wird ergänzend ein Blick auf die Bindungswirkung von materiellem Recht in

Schiedsverfahren geworfen.
