Learning Futures Jan 03 2021 In the twenty-first century, educators around the world are being told that they need to transform education systems to adapt young people for the challenges of a global digital knowledge economy. Too rarely, however, do we ask whether this future vision is robust, achievable or even desirable, whether alternative futures might be in development, and what other possible futures might demand of education. Drawing on ten years of research into educational innovation and socio-technical change, working with educators, researchers, digital industries, students and policy-makers, this book questions taken-for-granted assumptions about the future of education. Arguing that we have been working with too narrow a vision of the future, Keri Facer makes a case for recognizing the challenges that the

next two decades may bring, including: the emergence of new relationships between humans and technology the opportunities and challenges of aging populations the development of new forms of knowledge and democracy the challenges of climate warming and environmental disruption the potential for radical economic and social inequalities. This book describes the potential for these developments to impact critical aspects of education - including adult-child relationships, social justice, curriculum design, community relationships and learning ecologies. Packed with examples from around the world and utilising vital research undertaken by the author while Research Director at the UK's Futurelab, the book helps to bring into focus the risks and opportunities for schools, students and societies over the coming two decades. It makes a powerful case for rethinking the relationship between education and social and technological change, and presents a set of key strategies for creating schools better able to meet the emerging needs of their students and communities. An important contribution to the debates surrounding educational futures, this book is compelling reading for all of those, including educators, researchers, policy-makers and students, who are asking the question 'how can education help us to build desirable futures for everyone in the context of social and technological change?'

Validating Technological Innovation Sep 18 2019 This book discusses Hong Kong's use of onscreen marking (OSM) in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive, coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high-stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Digital Technologies in the Lives of Young People Mar 05 2021 This book examines the presence and effects of new technologies in the lives of young people. The rapid pace of change in the development and use of digital technologies, and the likely impact this has on youth, means that the topic has wide implications for educational institutions, theory and practice. There is a demand for a concentration on the ways in which new devices such as smart phones and tablets, as well as new platforms

and recent notions such as the 'flipped classroom', are affecting the way education is being provided. However, there is also still a small minority who do not have full access to the internet, and the disadvantages suffered by this group must also be addressed. The internet offers a vast range of opportunities for young people, and yet for various reasons it is not always available. This can partly be attributed to the controls that schools impose on the use of digital technology, for reasons of safety and security, and can in part be explained by the fact that policy makers have contradictory attitudes to technology. While they may argue for the need to have a well-educated and well-trained workforce, they fear the threats to privacy and safety posed by the internet. This book asserts that society needs to have more open debate about the threats and opportunities of digital technology as it is a dynamic and ever-changing topic for us all. This book was originally published as a special issue of the Oxford Review of Education.

XamIdea Accountancy Class 12 CBSE (2020-21) Examination Aug 18 2019 Key Features of Xam idea Accountancy Class 12 (2020-21) 1. Model Test Papers have been given at the end of the book for practice, based on the pattern of the exam covering full syllabus.

English Studies in Indian Universities Nov 01 2020 Right from its formal introduction in India in 1835, through Thomas B. Macaulay's Minute, English has been intrinsically linked with the employment prospects of

Indians. During their regime, the British promoted English education to fulfil the requirement of English-knowing Indians for administrative purposes. Owing to globalization, the last few years have witnessed the opening up of thousands of lucrative job opportunities for graduates proficient in English. English has gained importance in India as the language of opportunities. In colonial India, English education was a passport to government jobs, while in the twenty-first century, proficiency in English is essential for private sector jobs. This book examines the development of curricula in English in Indian universities vis-a-vis the needs of second language learners studying in Special English programmes of Bachelor of Arts (BA). It also reflects on how globalization has strengthened the connection between English and employment.

Introduction to Health and Safety in Construction Feb 22 2020 This NEBOSH-endorsed textbook is matched to the latest syllabus of the National Certificate in Construction Safety and Health. Within the construction industry the need for specialist health and safety training is high due to the high risks involved. This is reflected in recent legislation such as CDM 2007 and explains the consistent demand for courses and learning materials. The text is easy to read, highly illustrated in full color, and supported with checklists, report forms and record sheets used currently in the industry. Students are supported with end-of-chapter questions, a study skills chapter and specimen assignments including specimen answers. As NEBOSH actively grow their qualifications internationally, demand for this book and it's sister titles continues to increase overseas. High growth markets are the Middle East, Malaysia, India and China.
