**Chance Rules** Mar 25 2020 Chance continues to govern our lives in the 21st Century. From the genes we inherit and the environment into which we are born, to the lottery ticket we buy at the local store, much of life is a gamble. In business, education, travel, health, and marriage, we take chances in the hope of obtaining something better. Chance colors our lives with uncertainty, and so it is important to examine it and try to understand about how it operates in a number of different circumstances. Such understanding becomes simpler if we take some time to learn a little about probability, since probability is the natural language of uncertainty. This second edition of Chance Rules again recounts the story of chance through history and the various ways it impacts on our lives. Here you can read about the earliest gamblers who thought that the fall of the dice was controlled by the gods, as well as the modern geneticist and quantum theory researcher trying to integrate aspects of probability into their chosen speciality. Example included in the first addition such as the infamous Monty Hall problem, tossing coins, coincidences, horse racing, birthdays and babies remain, often with an expanded discussion, in this edition. Additional material in the second edition includes, a probabilistic explanation of why things were better when you were younger, consideration of whether you can use probability to prove the existence of God, how long you may have to wait to win the lottery, some court room dramas, predicting the future, and how evolution scores over creationism. Chance Rules lets you learn about probability without complex mathematics.

**Seduced By Mrs. Robinson** Feb 16 2022 An in-depth look at the making of the classic movie and its effect on filmmaking and society. When The Graduate premiered in December 1967, its filmmakers had only modest expectations for what seemed to be a small, sexy art-house comedy adapted from an obscure first novel by an eccentric twenty-four-year-old. There was little indication that this offbeat story—a young man just out of college has an affair with one of his parents' friends and then runs off with her daughter—would turn out to be a monster hit, with an extended run in theaters and seven Academy Award nominations. The film catapulted an unknown actor, Dustin Hoffman, to stardom with a role that is now

permanently engraved in our collective memory. While turning the word plastics into shorthand for soulless work and a corporate, consumer culture, *The Graduate* sparked a national debate about what was starting to be called “the generation gap.” In celebration of the film’s fiftieth birthday, author Beverly Gray offers a smart close reading of the film as well as vivid, never-before-revealed details from behind the scenes of the production—including all the behind-the-scenes drama and decision-making. For movie buffs and pop culture fanatics, *Seduced by Mrs. Robinson* illuminates *The Graduate*’s huge influence on the future of filmmaking. And it explores how this unconventional movie rocked the late-sixties world, both reflecting and changing the era’s views of sex, work, and marriage. An Amazon Best Book of the Month “[Gray] writes smartly and insightfully. . . . The book . . . offers a fascinating look at how this movie tells a timeless story.” —The Washington Post

**Essentials of Metaheuristics (Second Edition)** Jun 20 2022 Interested in the Genetic Algorithm? Simulated Annealing? Ant Colony Optimization? *Essentials of Metaheuristics* covers these and other metaheuristics algorithms, and is intended for undergraduate students, programmers, and non-experts. The book covers a wide range of algorithms, representations, selection and modification operators, and related topics, and includes 71 figures and 135 algorithms great and small. Algorithms include: Gradient Ascent techniques, Hill-Climbing variants, Simulated Annealing, Tabu Search variants, Iterated Local Search, Evolution Strategies, the Genetic Algorithm, the Steady-State Genetic Algorithm, Differential Evolution, Particle Swarm Optimization, Genetic Programming variants, One- and Two-Population Competitive Coevolution, N-Population Cooperative Coevolution, Implicit Fitness Sharing, Deterministic Crowding, NSGA-II, SPEA2, GRASP, Ant Colony Optimization variants, Guided Local Search, LEM, PBIL, UMDA, cGA, BOA, SAMUEL, ZCS, XCS, and XCSF.

Fair City Blues Aug 10 2021 IN FAIR CITY BLUES MARSHALL JACK DILLON SEARCHES FOR THE IDENTITY OF A HEADLESS, HANDLESS BODY DISCOVERED IN DUBLIN'S ROYAL CANAL. In the 5th action packed Dublin tale by Patrick Emmett (Mike Faricy's Irish alter ego). US Marshall Jack Dillon is still detailed to Dublin's Special Investigative Unit. Once a headless body with a US Marine Corp tattoo is found floating in Dublin's Royal Canal Dillon is on the case. At every turn he seems to come up with more unanswered questions. Meanwhile a series of ATM robberies are occurring across the city and the police seem powerless to stop them and Dillon's looking for a missing American college student...but then Dublin can quickly become an amazingly small world. WHO WILL LIKE IT: Fans of Dev Haskell and rascals like him. Also the fans of Robert B. Parker, Elmore Leonard, Carl Hiaasen, Lee Child, Laurence Shames, strong Minnesota men, especially when transplanted to Ireland and drinkers of Guinness everywhere. "Faricy is the next Carl Hiaasen..." - Crime Scene "Faricy is America's hottest new mystery writer..." - The Dirty Lowdown

**Dilettanti** Apr 25 2020 Bruce Redford re-creates the vibrant culture of connoisseurship in Enlightenment England by investigating the multifaceted activities and achievements of the Society of Dilettanti. Elegantly and wittily he dissects the British connoisseurs whose expeditions, collections, and publications laid the groundwork for the Neoclassical revival and for the scholarly study of Graeco-Roman antiquity. After the foundation of the society in 1732, the Dilettanti commissioned portraits of the members. Including a striking group of mock-classical and mock-religious representations, these portraits were painted by George Knapp, Sir Joshua Reynolds, and Sir Thomas Lawrence. During the second half of the century, the society’s expeditions to the Levant yielded a series of pioneering architectural folios, beginning with the first volume *The Antiquities of Athens* in 1762. These monumental volumes aspired to empirical exactitude in text and image alike. They prepared the way for *Specimens of Ancient Sculpture* (1809), which combines the didactic (detailed investigations into technique, condition, restoration, and provenance) with the connoisseurial (plates that bring the illustration of ancient sculpture to new artistic heights). The Society of Dilettanti’s projects and publications exemplify the Enlightenment ideal of the gentleman amateur, which is linked in turn to a culture of wide-ranging curiosity.

Search Methodologies Jul 29 2020 The first edition of *Search Methodologies: Introductory Tutorials in Optimization and Decision Support Techniques*

was originally put together to offer a basic introduction to the various search and optimization techniques that students might need to use during their research, and this new edition continues this tradition. Search Methodologies has been expanded and brought completely up to date, including new chapters covering scatter search, GRASP, and very large neighborhood search. The chapter authors are drawn from across Computer Science and Operations Research and include some of the world's leading authorities in their field. The book provides useful guidelines for implementing the methods and frameworks described and offers valuable tutorials to students and researchers in the field. "As I embarked on the pleasant journey of reading through the chapters of this book, I became convinced that this is one of the best sources of introductory material on the search methodologies topic to be found. The book's subtitle, "Introductory Tutorials in Optimization and Decision Support Techniques", aptly describes its aim, and the editors and contributors to this volume have achieved this aim with remarkable success. The chapters in this book are exemplary in giving useful guidelines for implementing the methods and frameworks described." Fred Glover, Leeds School of Business, University of Colorado Boulder, USA "[The book] aims to present a series of well written tutorials by the leading experts in their fields. Moreover, it does this by covering practically the whole possible range of topics in the discipline. It enables students and practitioners to study and appreciate the beauty and the power of some of the computational search techniques that are able to effectively navigate through search spaces that are sometimes inconceivably large. I am convinced that this second edition will build on the success of the first edition and that it will prove to be just as popular." Jacek Blazewicz, Institute of Computing Science, Poznan University of Technology and Institute of Bioorganic Chemistry, Polish Academy of Sciences

More Than You Know Apr 06 2021 Since its first publication, Michael J. Mauboussin's popular guide to wise investing has been translated into eight languages and has been named best business book by BusinessWeek and best economics book by Strategy+Business. Now updated to reflect current research and expanded to include new chapters on investment philosophy, psychology, and strategy and science as they pertain to money management, this volume is more than ever the best chance to know more than the average investor. Offering invaluable tools to better understand the concepts of choice and risk, More Than You Know is a unique blend of practical advice and sound theory, sampling from a wide variety of sources and disciplines. Mauboussin builds on the ideas of visionaries, including Warren Buffett and E. O. Wilson, but also finds wisdom in a broad and deep range of fields, such as casino gambling, horse racing, psychology, and evolutionary biology. He analyzes the strategies of poker experts David Sklansky and Puggy Pearson and pinpoints parallels between mate selection in guppies and stock market booms. For this edition, Mauboussin includes fresh thoughts on human cognition, management assessment, game theory, the role of intuition, and the mechanisms driving the market's mood swings, and explains what these topics tell us about smart investing. More Than You Know is written with the professional investor in mind but extends far beyond the world of economics and finance. Mauboussin groups his essays into four parts-Investment Philosophy, Psychology of Investing, Innovation and Competitive Strategy, and Science and Complexity Theory-and he includes substantial references for further reading. A true eye-opener, More Than You Know shows how a multidisciplinary approach that pays close attention to process and the psychology of decision making offers the best chance for long-term financial results.

**Alternative Medicine for the Elderly** Dec 02 2020 The explosion of information about complementary and alternative medicine (CAM) has demanded the attention of health professionals and responsible consumers, including the elderly. Increasingly, medical schools are providing education about CAM. This book brings together for academicians and interested mainstream practitioners much of the current information on CAM and its role in the health of the elderly. The individual chapters are thoroughly researched and quite readable, even for patients and the lay public concerned with the state of the evidence and art supporting CAM's role in prevention and management of illness and well-being. This book provides educators with much necessary information needed to prepare coursework and learning activities. Although definitive data are lacking regarding

efficacy and even safety of CAM methodologies, many chapters in this book summarize the existing evidence in a usable way. The topics analyzed range from well-accepted therapies, such as vitamin E for dementia and zinc tablets for the common cold, to far less conventional therapies such as transcendental meditation. The conclusions are often surprising, but well-presented and defended. Even the most highly controversial areas, such as the use of acupuncture to treat low back pain and osteoarthritis of the knee, are thoroughly and fairly reviewed. Finally, the chapters address some of the political issues that challenge CAM. These issues include who should be allowed to practice a CAM discipline whose efficacy is not based on the scientific method, and some of the state-to-state variations in practice standards and licensure.

Critical Thinking in Clinical Practice Nov 20 2019 Decisions are influenced by a variety of fallacies and biases that we can learn how to avoid. Critical thinking values, knowledge, and skills, therefore, are integral to evidence-based practice. These emphasize the importance of recognizing ignorance as well as knowledge and the vital role of criticism in discovering how to make better decisions. This book is for clinicians--clinicians who are willing to say "I don't know." Critical Thinking in Clinical Practice, Second Edition is designed to enhance readers' skills in making well-informed, ethical decisions. Making such decisions is no easy task. Decisions are made in uncertain, changing environments with time pressures. Interested parties, such as the pharmaceutical industry, spend millions of dollars to influence decisions made. Drawing on a wide range of related literature, this book describes common pitfalls in clinical reasoning as well as strategies for avoiding them--sometimes called mind-tools. Mental health and allied professionals will come away from this text with knowledge of how classification decisions, a focus on pathology, and reliance on popularity can cause errors. Hazards involved in data collection and team decision making such as groupthink are discussed. Part 1 provides an overview of the context in which clinicians make decisions. Part 2 describes common sources of error. Part 3 describes decision aids including the process of evidence-based practice. Part 4 describes the application of related content to different helping phases including assessment, intervention, and evaluation. Part 5 suggests obstacles to making well-informed decisions and how to encourage lifelong learning. This new Second Edition has been completely updated with expanded coverage on: Evidence-based practice Screening issues and practice errors Lifelong learning Problem solving Decision making An interactive, dynamic book filled with insightful examples, useful lists and guidelines, and exercises geared to encourage critical thinking, Critical Thinking in Clinical Practice, Second Edition provides an essential resource for helping professionals and students.

*Artificial Intelligence: A Systems Approach* Jan 15 2022 This book offers students and AI programmers a new perspective on the study of artificial intelligence concepts. The essential topics and theory of AI are presented, but it also includes practical information on data input & reduction as well as data output (i.e., algorithm usage). Because traditional AI concepts such as pattern recognition, numerical optimization and data mining are now simply types of algorithms, a different approach is needed. This "sensor / algorithm / effector" approach grounds the algorithms with an environment, helps students and AI practitioners to better understand them, and subsequently, how to apply them. The book has numerous up to date applications in game programming, intelligent agents, neural networks, artificial immune systems, and more. A CD-ROM with simulations, code, and figures accompanies the book.

*Evolutionary Design by Computers* Dec 22 2019 "Evolutionary Design By Computers offers an enticing preview of the future of computer-aided design: Design by Darwin." Lawrence J. Fogel, President, Natural Selection, Inc. "Evolutionary design by computers is the major revolution in design thinking of the 20th century and this book is the best introduction available." Professor John Frazer, Swire Chair and Head of School of Design, the Hong Kong Polytechnic University, Author of "An Evolutionary Architecture" "Peter Bentley has assembled and edited an important collection of papers that demonstrate, convincingly, the utility of evolutionary computation for engineering solutions to complex problems in design." David B. Fogel, Editor-in-Chief, IEEE Transactions on Evolutionary Computation Some of the most startling achievements in the use of computers to automate

design are being accomplished by the use of evolutionary search algorithms to evolve designs. Evolutionary Design By Computers provides a showcase of the best and most original work of the leading international experts in Evolutionary Computation, Engineering Design, Computer Art, and Artificial Life. By bringing together the highest achievers in these fields for the first time, including a foreword by Richard Dawkins, this book provides the definitive coverage of significant developments in Evolutionary Design. This book explores related sub-areas of Evolutionary Design, including: design optimization creative design the creation of art artificial life. It shows for the first time how techniques in each area overlap, and promotes the cross-fertilization of ideas and methods.

Flood of August 4-5, 1943 in Central West Virginia Jun 27 2020

**Nutrition During Pregnancy and Lactation** Sep 23 2022 Pregnancy is viewed as a window to future health. With the birth of the developmental origins of human adult disease hypothesis, research and clinical practice has turned its attention to the influence of maternal factors such as health and lifestyle surrounding pregnancy as a means to understand and prevent the inter-generational inheritance of chronic disease susceptibility. Outcomes during pregnancy have long-lasting impacts on both women and children. Moreover, nutrition early in life can influence growth and the establishment of lifelong eating habits and behaviors. This Special Issue on "Nutrition during Pregnancy and Lactation: Implications for Maternal and Infant Health" is intended to highlight new epidemiological, mechanistic and interventional studies that investigate maternal nutrition around the pregnancy period on maternal and infant outcomes. Submissions may include original research, narrative reviews, and systematic reviews and meta-analyses.

**vanity fair** Oct 12 2021

Property Rights in a Social and Ecological Context Sep 30 2020 The collection of papers in the book Property Rights and the Environment: Social and Ecological Issues, (6) and this companion volume examine the relationships between people, the environment, and property rights and the ways in which a given social and ecological context affects those relationships. The papers are products of a research program at the Royal Swedish Academy of Sciences, Stockholm. The main objective of the program was to convene social scientists and natural scientists to address research questions in their full social and ecological dimensions. The program's participants addressed five general issues related to property rights and the environment: (1) the design of governance systems for sustainability; (2) the relationship between equity, stewardship, and environmental resilience; (3) the use of traditional knowledge in resource management, (4) the mechanisms that link people to their environments, and (5) the role played by population and poverty. This volume presents case studies that address questions of design application in those five areas. (6) Also available: Property Rights and the Environment: Social and Ecological Issues. (ISBN 0-8213-3415-8) Stock No. 13415.

Scam Man May 27 2020 Scam Man is the Thirteenth mystery in the highly entertaining Dev Haskell Private Investigator Series. Morton, the golden retriever is back just in time to turn Dev's dating experience with gorgeous AJ into an absolute disaster. Meanwhile his longtime "friend with benefits" Heidi is being showered with jewels and romantic getaways. Dev is investigating Austin Hackett, a scheming attorney who has run scams on everything from porn to disability lawsuits. He can set everything right if only Swindle Lawless and Woofy Barker can keep their act together. Assaults, shootings, scams, broken hearts and murder combine for more humorous entertainment from the master of the bizarre, Mike Faricy. If you like Carl Hiaasen, Tim Dorsey and Elmore Leonard-make room for one more!

Code That Fits in Your Head Dec 14 2021 The latest title in Addison Wesley's world-renowned Robert C. Martin Series on better software development, Code That Fits in Your Head offers indispensable practical advice for writing code at a sustainable pace, and controlling the complexity that causes too many software projects to spin out of control. Reflecting decades of experience consulting on software projects and helping

development teams succeed, Mark Seemann shares proven practices and heuristics, supported by realistic advice. His guidance ranges from checklists to teamwork, encapsulation to decomposition, API design to unit testing and troubleshooting. Throughout, Seemann illuminates his insights with up-to-date code examples drawn from a start to finish sample project. Seemann's examples are written in C##, and designed to be clear and useful to every object-oriented enterprise developer, whether they use C#, Java, or another language. Code That Fits in Your Head is accompanied by the complete code base for this sample application, organized in a Git repository to facilitate further exploration of details that don't fit in the text.

**Biological Invasions in Marine Ecosystems** Oct 20 2019 Biological invasions are considered to be one of the greatest threats to the integrity of most ecosystems on earth. This volume explores the current state of marine bioinvasions, which have been growing at an exponential rate over recent decades. Focusing on the ecological aspects of biological invasions, it elucidates the different stages of an invasion process, starting with uptake and transport, through inoculation, establishment and finally integration into new ecosystems. Basic ecological concepts - all in the context of bioinvasions - are covered, such as propagule pressure, species interactions, phenotypic plasticity, and the importance of biodiversity. The authors approach bioinvasions as hazards to the integrity of natural communities, but also as a tool for better understanding fundamental ecological processes. Important aspects of managing marine bioinvasions are also discussed, as are many informative case studies from around the world.

*Dutch Landscapes* Aug 30 2020 Published to accompany an exhibition opening at the Queen's Gallery, the Palace of Holyroodhouse, in April 2010 and the Queen's Gallery, Buckingham Palace, in April 2011.

Teachers' Guide to Child Development Jan 23 2020

Genetic Algorithms in Search, Optimization, and Machine Learning May 07 2021 A gentle introduction to genetic algorithms. Genetic algorithms revisited: mathematical foundations. Computer implementation of a genetic algorithm. Some applications of genetic algorithms. Advanced operators and techniques in genetic search. Introduction to genetics-based machine learning. Applications of genetics-based machine learning. A look back, a glance ahead. A review of combinatorics and elementary probability. Pascal with random number generation for fortran, basic, and cobol programmers. A simple genetic algorithm (SGA) in pascal. A simple classifier system(SCS) in pascal. Partition coefficient transforms for problem-coding analysis.

**Benford's Law** Jul 09 2021 Benford's law states that the leading digits of many data sets are not uniformly distributed from one through nine, but rather exhibit a profound bias. This bias is evident in everything from electricity bills and street addresses to stock prices, population numbers, mortality rates, and the lengths of rivers. Here, Steven Miller brings together many of the world's leading experts on Benford's law to demonstrate the many useful techniques that arise from the law, show how truly multidisciplinary it is, and encourage collaboration. Beginning with the general theory, the contributors explain the prevalence of the bias, highlighting explanations for when systems should and should not follow Benford's law and how quickly such behavior sets in. They go on to discuss important applications in disciplines ranging from accounting and economics to psychology and the natural sciences. The contributors describe how Benford's law has been successfully used to expose fraud in elections, medical tests, tax filings, and financial reports. Additionally, numerous problems, background materials, and technical details are available online to help instructors create courses around the book. Emphasizing common challenges and techniques across the disciplines, this accessible book shows how Benford's law can serve as a productive meeting ground for researchers and practitioners in diverse fields.

**Classic Computer Science Problems in Java** Mar 05 2021 Sharpen your coding skills by exploring established computer science problems! Classic Computer Science Problems in Java challenges you with time-tested scenarios and algorithms. Summary Sharpen your coding skills by exploring

established computer science problems! Classic Computer Science Problems in Java challenges you with time-tested scenarios and algorithms. You'll work through a series of exercises based in computer science fundamentals that are designed to improve your software development abilities, improve your understanding of artificial intelligence, and even prepare you to ace an interview. As you work through examples in search, clustering, graphs, and more, you'll remember important things you've forgotten and discover classic solutions to your "new" problems! Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the technology Whatever software development problem you're facing, odds are someone has already uncovered a solution. This book collects the most useful solutions devised, guiding you through a variety of challenges and tried-and-true problem-solving techniques. The principles and algorithms presented here are guaranteed to save you countless hours in project after project. About the book Classic Computer Science Problems in Java is a master class in computer programming designed around 55 exercises that have been used in computer science classrooms for years. You'll work through hands-on examples as you explore core algorithms, constraint problems, AI applications, and much more. What's inside Recursion, memoization, and bit manipulation Search, graph, and genetic algorithms Constraint-satisfaction problems K-means clustering, neural networks, and adversarial search About the reader For intermediate Java programmers. About the author David Kopec is an assistant professor of Computer Science and Innovation at Champlain College in Burlington, Vermont. Table of Contents 1 Small problems 2 Search problems 3 Constraint-satisfaction problems 4 Graph problems 5 Genetic algorithms 6 K-means clustering 7 Fairly simple neural networks 8 Adversarial search 9 Miscellaneous problems 10 Interview with Brian Goetz **Hide and Sneak** Mar 17 2022 A mythical figure and traditional Inuit practices set the backdrop for this story about a young girl who is lost on the tundra.

*Dependency Injection In.Net* Nov 01 2020 Dependency Injection in .NET is a comprehensive guide that introduces DI and provides an in-depth look at applying DI practices to .NET apps. In it, you will also learn to integrate DI together with such technologies as Windows Communication Foundation, ASP.NET MVC, Windows Presentation Foundation and other core .NET components. Building on your existing knowledge of C# and the .NET platform, this book will be most beneficial for readers who have already built at least a few software solutions of intermediate complexity. Most examples are in plain C# without use of any particular DI framework. Later, the book introduces several well-known DI frameworks, such as StructureMap, Windsor and Spring.NET. For each framework, it presents examples of its particular usage, as well as examines how the framework relates to the common patterns presented earlier in the book.

*A Concise Introduction to Logic* Feb 22 2020

**Fierce Conversations** Feb 04 2021 Fierce Conversations is a way of conducting business. An attitude. A way of life. Communications expert Susan Scott maintains that a single conversation can change the trajectory of a career, marriage or life. Whether these are conversations with yourself, partner, colleagues, customers, family or friends, Fierce Conversations shows you how to have conversations that count. Scott reveals how to: \*Overcome the barriers to meaningful conversations \*Express who you are and what you believe \*Confront tough issues with courage, confidence and sensitivity \*Overcome fear to get to the heart of the problem \*Inspire followers, attract believers and build visions that become reality \*Bring about real change through talking \*Encourage others to reveal their true opinions Packed with exercises and questionnaires to help you have the best conversations possible, Fierce Conversations will revolutionise the way you communicate.

*Threads and Traces* May 19 2022 "This book is a translation of historian Carlo Ginzburg's latest collection of essays. Through the detective work of uncovering a wide variety of stories or microhistories from fragments, Ginzburg takes on the bigger questions: How do we draw the line between truth and fiction? What is the relationship between history and memory? Stories range from medieval Europe, the inquisitional trial of a witch,

seventeenth-century antiquarianism, and twentieth-century historians"--Provided by publisher.

**Nassau Country Club** Aug 18 2019 Heritage is synonymous with Nassau Country Club, home of the "two dollar Nassau wager"; also of the original Calamity Jane, renowned putter of Bobby Jones, & the Nassau bowl, oldest tennis award in the U.S. This Nassau Journey began 100 years ago in the heart of the old Gold Coast of Glen Cove, Long Island. The founders were rich in the history of this country at the turn into the 1900's. Among its first golf professionals were Alex Smith & Jimmie Maiden, from Carnoustie, Scotland. Nassau CC was The Place To Be for Jones, Travers, & Hagen, Vardon & Ray--for Nassau Bowl aspirants tennis greats Clothier, Tilden, Riggs, Trabert & Newcombe--J. P. Morgan & Percy Chubb--past Presidents of the U.S., luminaries, & royalty from abroad. Nassau is that rich in past tournaments in golf, lawn tennis, & squash that we earnestly researched & detailed many matches stroke by stroke; although unique for a club history, we invite the true follower to relive the excitement of days past to the present. Along the way, we introduce our members, their fun ways, the challenges exacerbated by two world wars, & the paths followed to solve problems & insure a future bicentennial.

**Three Swedish Mountain Men** Aug 22 2022 Three ripped, gorgeous men. One secluded Swedish mountain cabin. It looks like my vacation is about to heat up... After my ex-boyfriend makes me the target of a cruel online hate campaign, I know I have to get away. The last thing I expect on my trip to Sweden is a moose standing in the middle of the road -- or the mysterious, bearded ranger who pulls me from my wrecked car. Now a storm's brewing, and I'm being carried into a secluded mountain cabin by a Nordic God rippling with muscle. Inside, I'm greeted by three sizzling-hot Swedish mountain men: Riven, the cool, collected doctor with the muscled arms and the impeccable bedside manner. Eli, the flirty ski instructor with the charming smile and dimples I'm dying to kiss. And Cole, the rugged blonde ranger with the ice-blue eyes and a hammer to rival Thor. Trapped inside the cabin, we only have the roaring fire--and each other--to keep warm. And things heat up fast. All three men are fiercely protective over me. They look like Vikings, kiss like angels, and best of all, they love sharing me. It feels too good to be true. But I'm not who I say I am. When my mountain men find out my true identity, will they be able to forgive my lies and love the real me? Or will my dark, painful secret shatter our relationship to pieces? **THREE SWEDISH MOUNTAIN MEN** is a scorching stand-alone reverse harem romance, filled with love, adventure, and three sinfully gorgeous heroes. No cliffhanger, no cheating, and HEA guaranteed!

**A Field Guide to Genetic Programming** Apr 18 2022 Genetic programming (GP) is a systematic, domain-independent method for getting computers to solve problems automatically starting from a high-level statement of what needs to be done. Using ideas from natural evolution, GP starts from an ooze of random computer programs, and progressively refines them through processes of mutation and sexual recombination, until high-fitness solutions emerge. All this without the user having to know or specify the form or structure of solutions in advance. GP has generated a plethora of human-competitive results and applications, including novel scientific discoveries and patentable inventions. This unique overview of this exciting technique is written by three of the most active scientists in GP. See [www.gp-field-guide.org.uk](http://www.gp-field-guide.org.uk) for more information on the book.

**Russian Roulette** Dec 26 2022 The **FIRST** in the Dev Haskell series, Russian Roulette is an entertaining tale of intrigue, rank ineptitude and one night stands. Dysfunctional Private Investigator, Dev Haskell wakes up in bed with his latest client only to learn she's signed him up with the Russian mob. Their 'special' relationship quickly finds Dev at odds with the local police and an FBI task force. In the process Dev is forced to place one foot on both sides of the law. Another fast paced, engrossing suspense thriller from Minnesota's Master of the Bizarre, Mike Faricy

**One Eyed Jack** Jul 21 2022 A 2013 Shamus Award finalist, and Writer's Digest self-published book awards Honorable mention. Professional blackmailer John Sharp, aka One Eyed Jack, is a man who knows how to keep a secret - for a price. But when a routine case of infidelity takes an unexpected detour, he soon finds himself caught in a tangled web of double-blackmail, commodities manipulation, and trying to rescue the woman

that had once been his target. Judge, 22nd Annual Writer's Digest Self-Published Book Awards said, "In *One-Eyed Jack*, author Christopher J. Lynch has created a multifaceted main character who will instantly grip readers from the moment he steps onto the stage. What I found interesting was how I both liked and disliked this character at the same time; this is something I've rarely experienced in my many years of reading fiction. This is definitely a book you won't be able to put down." Check out the video trailer at: <http://www.youtube.com/watch?v=XvraVL8dMY0>

*The Fatal Strain* Jan 03 2021 In 2009, Swine Flu reminded us that pandemics still happen, and award-winning journalist Alan Sipress reminds us that far worse could be brewing. When a highly lethal strain of avian flu broke out in Asia in 2003 and raced westward, Sipress, as a reporter for *The Washington Post*, tracked the virus across nine countries, watching its secrets elude the world's brightest scientists and most intrepid disease hunters. A vivid portrayal of the struggle between man and microbe, *The Fatal Strain* is a fast-moving account that weaves cultural, political, and scientific strands into a tale of inevitable pandemic.

**Mastering Ethereum** Sep 11 2021 Ethereum represents the gateway to a worldwide, decentralized computing paradigm. This platform enables you to run decentralized applications (DApps) and smart contracts that have no central points of failure or control, integrate with a payment network, and operate on an open blockchain. With this practical guide, Andreas M. Antonopoulos and Gavin Wood provide everything you need to know about building smart contracts and DApps on Ethereum and other virtual-machine blockchains. Discover why IBM, Microsoft, NASDAQ, and hundreds of other organizations are experimenting with Ethereum. This essential guide shows you how to develop the skills necessary to be an innovator in this growing and exciting new industry. Run an Ethereum client, create and transmit basic transactions, and program smart contracts Learn the essentials of public key cryptography, hashes, and digital signatures Understand how "wallets" hold digital keys that control funds and smart contracts Interact with Ethereum clients programmatically using JavaScript libraries and Remote Procedure Call interfaces Learn security best practices, design patterns, and anti-patterns with real-world examples Create tokens that represent assets, shares, votes, or access control rights Build decentralized applications using multiple peer-to-peer (P2P) components

**Bite Me** Nov 25 2022 An "uproarious" shifter romance with "intensely satisfying chemistry between the leads" from the *New York Times*-bestselling author (Publishers Weekly). Livy Kowalski has no time for idiots. When you shapeshift into a honey badger, getting through life's irritants is a finely honed skill. Until she gets stuck housing her nutso cousin and dealing with her dad's untimely and unexplained demise. That's where Vic Barinov comes in--or his house does. Vic can't step outside without coming back to find Livy devouring his honey stash and getting the TV remote sticky. It gets his animal instincts all riled up. But he'll have to woo her at high speed: all hell is breaking loose, and Livy is leading the charge... "Erotically charged...Laurenston builds up her world with a sprawling cast of memorable characters and their over-the-top antics, featuring everything from bear-only towns with Renaissance Faires to shifter roller derby...delightfully zany."—Publishers Weekly

**New Venture Creation** Sep 18 2019 This new 7th Edition of *New Venture Creation: Entrepreneurship for the 21st Century*, is the most heavily revised edition since its existence, yet it still maintains the market defining "Timmons Model of the Entrepreneurial Process." As always, Timmons & Spinelli cover the process of getting a new venture started, growing the venture, and successfully harvesting it. Through text, case studies, and hands-on exercises, this how-to text guides students in discovering the concepts of entrepreneurship and the competencies, skills, tools, and experience to equip students to successfully launch a new venture and recognize entrepreneurial opportunities.
