Concrete in the Service of Mankind Sep 18 2019 This fourth volume of Concrete in the Service of Mankind focuses on radical concrete technology. Concrete is ubiquitous and unique, and is found in every developed and developing country. Indeed, there are no alternatives to concrete as a volume construction material for infrastructure. This raises important questions of how concrete should be designed and constructed for cost effective use in the the short and long term, and to encourage further radical development. Equally, it must be environmentally friendly during manufacture, in an aesthetic presentation in structures and in the containment of harmful materials. This book should be of interest to concrete technologists; contractors; civil engineers; consultants; government agencies; research organizations.

Crossover Feb 22 2020 Crossover is a laboratory manual and computer program that work together to teach the principles of genetics. Designed to complement regular textbooks and classroom instruction, Crossover consists of thirty-five modules that can be tailored to fit genetics courses at several levels. Examples, interactive computer models, problems, and self-tests all help students understand difficult concepts and learn the basic mathematical skills needed to study contemporary theories of genetics, evolution, and breeding. The easy-to-use tutorial system lets students work at their own pace. Features include: - In-depth investigations of meiosis, genetic ratios, linkage mutation, natural selection, Hardy-Weinberg equilibrium, artificial selection, quantitative genetics, breeding methods, mating designs, plant patent law, and the use of molecular markers - A computer model that allows students to manipulate genetic parameters and compare outcomes. Students can observe evolution and artificial selection in action - A "Major Concepts" section at the beginning of each chapter to help students focus on the important material to be learned - A visual, easy-to-understand presentation of material - Exercises based on genetic data and analyses from actual research projects - Several stages of complexity within each area of instruction. - Instant grading of exercises - "Suggested Readings" at the end of each chapter to direct the student to related books, articles, and computer programs.

HSC Ancient History Nov 25 2022 This comprehensive study guide covers every topic in the first two sections of the HSC Ancient History course and has been specifically created to maximise exam success. This guide has been designed to meet all study needs, providing up-to-date information in an easy-to-use format. This is the first of the two new Ancient History study guides. Revision questions have been updated for the new HSC format. Excel Ancient History Book 1 contains: a chapter on every topic available in the first two sections of the HSC course: Section I - Personalities in their Times, and Section II - Ancient Societies an introductory section on how to use the book, with an explanation of exam requirements revision questions in each chapter with answers and guidelines comprehensive bibliography and further reading lists key terms defined in each chapter, plus a glossary of terms cross-referencing between chapters for further information Also available is Excel Ancient History Book 2 which covers comprehensive coverage of Sections III and IV of the HSC course: Section III - Personalities in the Times and Section IV - Historical Periods.

Stem Cells Jan 23 2020 In this volume, the contributing authors from top labs involved in stem cell therapeutics share the latest advances in the field of stem cell research. The book covers many aspects of stem cell-based therapy and the progress made toward stem cell therapy for liver, ocular, and cardiovascular diseases as well as cancer. This volume serves as a continuation of Prof. Khawaja Husnain Haider's previously edited books pertaining to stem cells-based therapeutics. This is an ideal book for researchers involved in drug development as well as regenerative medicine and stem cell-based therapy. The secondary audience includes graduate and postgraduate medical students, doctors, cellular pharmacology, drug industry, and researchers involved in using stem cells as ex-vivo disease models for drug development.

The Way From Dusty Death Aug 18 2019 This historical account, covering the 1890s to 1969, includes the emergence of medical, and then official, concern about the three diseases related to asbestos (asbestosis, lung cancer and mesothelioma), the legislative process during and after the 1930s, and the impact of the 1931 Asbestos Industry Regulations. The availability of much previously unexamined material, including copious government records, combined with unimpeded access to the vast archive of documents kept by the leading British asbestos manufacturer, Turner and Newall, have enabled Dr. Bartrip to provide a comprehensive examination of this important medico-legal question, and to give a unique insight into occupational health and its regulation in twentieth century Britain.

Physics Jun 20 2022 Excel Success One HSC Physics 2021 Edition contains: * Over 100 objective-response and short-answer questions from past HSC Papers 2004-2014 arranged into Module topics; * Four sample HSC Examination papers with actual questions from the 2015-2018 HSC papers. All questions in these sample papers are on topics examinable in the new syllabus. Over half of each paper's questions are actual past HSC questions and the others are written for the new topics in the updated syllabus; * Three Excel sample HSC Examination papers, written to the new syllabus and based on the new HSC exam format; * The 2019 and 2020 HSC Examination papers; * Answers to all questions with distribution of marks for each question.

Carotenoids and Vitamin A in Translational Medicine Jan 15 2022 Vitamin A (retinol) is an essential dietary compound with myriad metabolic and regulatory functions. Deficiency can result in vision problems, compromised immune responses, and a host of other medical issues. More than 600 carotenoids have been identified in plants, algae, fungi, and bacteria, and around 50 carotenoids—including β -carotene—can be converted into vitamin A. Carotenoids and Vitamin A in Translational Medicine reviews the medical use of carotenoids and vitamin A in cancer; diseases of the skin, eye, ear, and lung; and inflammatory bowel and metabolic diseases. It also discusses the analytics of carotenoids and the supply of carotenoids and vitamin A in developing countries. Serving a broad community of researchers and practitioners conducting basic and clinical analysis on carotenoids and vitamin A for medical purposes, the book evaluates

basic research, epidemiological studies, and clinical trials in the field. It updates information on the worldwide problem of vitamin A deficiency and discusses extensively the pros and cons of carotenoid supplementation in cancer. The authors provide a comprehensive overview of the efforts made in the field of carotenoid research with respect to translational medicine and present the future outlook on carotenoids as new therapeutic agents. It is the editors' intent through the contributions in this volume to expand this important discussion on therapeutic approaches using carotenoids and retinoids. In doing so, they hope to enhance the quality of research which brings safe, effective, and clinically proven medicines to patients.

Objective Measurement Dec 02 2020 Aimed at a broad audience concerned with measurement and assessment issues in education, psychology, and related social science fields.

Creating Cultures of Thinking May 27 2020 Discover why and how schools must become places where thinking is valued, visible, and actively promoted. As educators, parents, and citizens, we must settle for nothing less than environments that bring out the best in people, take learning to the next level, allow for great discoveries, and propel both the individual and the group forward into a lifetime of learning. This is something all teachers want and all students deserve. In *Creating Cultures of Thinking: The 8 Forces We Must Master to Truly Transform Our Schools*, Ron Ritchhart, author of *Making Thinking Visible*, explains how creating a culture of thinking is more important to learning than any particular curriculum and he outlines how any school or teacher can accomplish this by leveraging 8 cultural forces: expectations, language, time, modeling, opportunities, routines, interactions, and environment. With the techniques and rich classroom vignettes throughout this book, Ritchhart shows that creating a culture of thinking is not about just adhering to a particular set of practices or a general expectation that people should be involved in thinking. A culture of thinking produces the feelings, energy, and even joy that can propel learning forward and motivate us to do what at times can be hard and challenging mental work.

Biology Nov 01 2020 *Excel Success One HSC Biology 2021 Edition* contains: Over 100 objective-response and short-answer questions from past HSC Papers 2001-2014 arranged into Module topics. Four sample HSC Examination papers with actual questions from the 2015-2018 HSC papers. All questions in these sample papers are on topics examinable in the new syllabus. Approximately half of each paper's questions are actual past HSC questions and the other half are written for the new topics in the updated syllabus. Three Excel sample HSC Examination papers, written to the new syllabus and based on the new HSC exam format. The 2019 and 2020 HSC Examination papers. Answers to all questions with distribution of marks for each question.

3 Unit Mathematics Feb 16 2022 Covers the 3 unit HSC mathematics course. Introduces new types of question and new methods of solutions. Provides questions set in an exam format with answers. The author's other works include '2 Unit HSC Practice Questions by Topic' and 'Unit HSC Practice Questions by Topic'.

Lean Startups for Social Change Apr 25 2020 For years, the lean startup has been revolutionizing both new and established businesses. In this eye-opening book, serial social entrepreneur Michel Gelobter shows how it can do the same for nonprofits. Traditionally, whether creating a new business or a new program, entrepreneurs in all sectors develop a plan, find money to fund it, and pursue it to its conclusion. The problem is, over time conditions can change drastically—but you're locked into your plan. The lean startup is all about agility and flexibility. Its mantra is “build, measure, learn”: create small experimental initiatives, quickly get real-world feedback on them, and use that data to expand what works and discard what doesn't. Using dozens of social sector examples, Gelobter walks you through the process. The standard approach wastes time and money. The lean startup will help your organization vastly increase the good it does.

The Highly Sensitive Child Feb 04 2021 The bestselling author and psychologist whose books have topped 240,000 copies in print now addresses the trait of “high sensitivity” in children—and offers a breakthrough parenting guidebook for highly sensitive children and their caregivers. With the publication of *The Highly Sensitive Person*, Elaine Aron became the first person to identify the inborn trait of “high sensitivity” and to show how it affects the lives of those who possess it. Up to 20 percent of the population is born highly sensitive, and now in *The Highly Sensitive Child*, Aron shifts her focus to highly sensitive children, who share the same characteristics as highly sensitive adults and thus face unique challenges as they grow up. Rooted in Aron's years of experience as a psychotherapist and her original research on child temperament, *The Highly Sensitive Child* shows how HSCs are born deeply reflective, sensitive to the subtle, and easily overwhelmed. These qualities can make for smart, conscientious, creative children, but with the wrong parenting or schooling, they can become unusually shy or timid, or begin acting out. Few parents and teachers understand where this behavior comes from—and as a result, HSCs are often mislabeled as overly inhibited, fearful, or “fussy,” or classified as “problem children” (and in some cases, misdiagnosed with disorders such as Attention Deficit Disorder). But raised with proper understanding and care, HSCs are no more prone to these problems than nonsensitive children and can grow up to be happy, healthy, well-adjusted adults. In this pioneering work, parents will find helpful self-tests and case studies to help them understand their HSC, along with thorough advice on: • The challenges of raising an highly sensitive child • The four keys to successfully parenting an HSC • How to soothe highly sensitive infants • Helping sensitive children survive in a not-so-sensitive world • Making school and friendships enjoyable With chapters addressing the needs of specific age groups, from newborns through teens, *The Highly Sensitive Child* delivers warmhearted, timely information for parents, teachers, and the sensitive children in their lives.

The Laws of Scientific Change Sep 11 2021 This book systematically creates a general descriptive theory of scientific change that explains the mechanics of changes in both scientific theories and the methods of their assessment. It was once believed that, while scientific theories change through time, their change itself is governed by a fixed method of science. Nowadays we know that there is no such thing as an unchangeable method of science; the criteria employed by scientists in theory evaluation also change through time. But if that is so, how and why do theories and methods change? Are there any general laws that govern this process, or is the choice of theories and methods completely arbitrary and random? Contrary to the widespread opinion, the book argues that scientific change is indeed a law-governed process and that there can be a general descriptive theory of scientific change. It does so by first presenting meta-theoretical issues, divided into chapters on the scope, possibility and assessment of theory of scientific change. It then builds a theory about the general laws that govern the process of scientific change, and goes into detail about the axioms and theorems of the theory.

Excel HSC Chemistry Oct 24 2022 ISBN: 9781741252996 AUTHOR: Jim Stamell RRP: \$39.95 PAGES: 428 pp. SPECIFICATION: Softcover, perfect bound, 280 mm x 210 mm STATUS: New edition PUBLICATION DATE: April 2008 The EXCEL HSC Chemistry guide is directly linked to the syllabus with every single dot point of the HSC Chemistry syllabus appearing in the margin of the book. You can write in the guide, so your study is focused and your notes are structured. This guide comes in a brand new format that makes even better use of your study time! up-to-date coverage of the core topics plus 3 Option topics: Industrial Chemistry, Shipwrecks, Corrosion and Conservation and Forensic Chemistry. this guide is organised just like the HSC syllabus, so the students learn to section (the theoretical part) is under routine headings and the students section (the practical part) is under headings like First-hand/Second-hand Investigations and Problem Solving - %this way you will be able to see at a glance what the theoretical and practical work is! all main headings in each chapter (1. 1, 2. 1, etc.) are directly from the syllabus, word for word %this way you can easily match the Excel guide to the syllabus! an alphabetical list of all the key definitions and concepts you should know from each chapter %an efficient way of learning all the definitions in one go! chapter syllabus checklist with every single dot point listed in checklist form for each chapter %a fantastic way of testing that you know all the work ! hundreds of key concept questions with answers %questions that test you recall of knowledge in each chapter. HSC-type questions for every section in each chapter with clock icons to tell you how

much time you will have to answer the questions in the HSC %this way yo u can test yourself on HSC-type questions under HSC-type time pressure! an examiner maximiser feature, ticks to show the mark distribut ion and answers to all HSC-type questions - %all you need to answ er HSC-type questions! two sample HSC papers with an examiner m aximiser feature plus answers %not one but two up-to-date sample papers ! the Excel syllabus summary notes: a detachable secti on at the end of the guide, where every single dot point of each chapter is summarised for you% - a comprehensive and compact summary of the wh ole course in 32 pages!

Ema's Odyssey Aug 10 2021 Follow the fantastic odyssey of one woman as she explores shamanic realms, encountering spirit animals and other teachers who answer her deepest questions and provide her with life-changing guidance and healing. Widowed, childless, and alone, 60-year-old Ema bravely decides to expand her self-knowledge by embarking on a spiritual adventure. She meets with author Sandra Harner, who leads her through five sessions of Harner Shamanic Counseling (HSC), a highly effective system of personal problem-solving in which counselors help clients enter a shamanic state of consciousness using a specific sonic rhythm. While in this state, clients seek out helping spirits, who offer insight, wisdom, and healing. By the end of her sessions with Harner, Ema has discovered her own innate ability to find answers to pervasive personal questions, overcome inhibitory fears, and acquire self-confidence and wisdom. She has found a sense of personal empowerment and a newfound joy in existence--and decides she wants to continue her journeys independently. From 1999 to 2011, Ema ventures on a total of 64 journeys, each one chronicled in this book, thanks to taped recordings of her simultaneous narration. In addition to serving as an invaluable resource for students and practitioners of shamanism, psychology, and alternative modalities of therapy, Ema's Odyssey enchants us with its lyrical poetry and unique wisdom, and inspires us with its demonstration of courage, curiosity, persistence, and humility. Perhaps most importantly, we come away with the added assurance that we are not alone, that there are oft-untapped resources we all can access, given the tools and trust in our own experience. From the Trade Paperback edition.

10 Last Years Solved Papers (HSC) - Science Apr 18 2022

Flag State Responsibility Sep 30 2020 All of these flag States have the right to sail ships flying their flag on the high seas (LOSC Article 90) ; and those ships enjoy the freedom of navigation upon the high seas (LOSC Article 87) . With this freedom comes a concomitant duty upon the flag State to effectively exercise its jurisdiction and control in administrative , technical , social (LOSC Article 94 (1)) and en vironmental protection (LOSC Article 217) matters over ships flying its flag. 1.2 Flag State Responsibility The absence of any authority over ships sailing the high seas would lead to chaos. One of the essential adjuncts to the principle of freedom of the seas is that a ship must fly the flag of a single State and that it is subject to the jurisdiction of that State. (Brown 1994 , p. 287) This opinion of the International Law Commission in 1956 on a draft article of the High Seas Convention (HSC) was a product of its time; a time of traditional maritime States and responsible long-established shipping companies operating for 3 the most part under the effective maritime administrations of their national flag .

Three Excel sample HSC Examination papers, written to the new syllabus and based on the new HSC exam format. The 2019 and 2020 HSC Examination papers. Answers to all questions with distribution of marks for each question.

Design and Technology Dec 22 2019

Basics of the International System of Customs and Tariffs May 07 2021 Although customs and tariffs operate from a national perspective, it is the overarching international structure of classification, valuation, etc. that is imposed upon the national schemes that provide international customs and tariffs with a comprehensible global consistency whose understanding is of great importance for those dealing in international commerce. It is this global scheme of customs and tariffs laws and practices that the author describes so thoroughly and well. Having mapped out for the reader that global scheme, he then describes the many types of variances and exemptions from the global scheme that must be understood as well. Basic Guide to International Customs and Tariffs provides a highly readable description of its subject and a unique global perspective not encountered in other books dealing with the same topic. Published under the Transnational Publishers imprint.

European Success Stories in Industrial Mathematics Nov 20 2019 This unique book presents real world success stories of collaboration between mathematicians and industrial partners, showcasing first-hand case studies, and lessons learned from the experiences, technologies, and business challenges that led to the successful development of industrial solutions based on mathematics. It shows the crucial contribution of mathematics to innovation and to the industrial creation of value, and the key position of mathematics in the handling of complex systems, amplifying innovation. Each story describes the challenge that led to the industrial cooperation, how the challenge was approached and how the solutions were achieved and implemented. When brought together, they illustrate the versatile European landscape of projects in almost all areas of applied mathematics and across all business sectors. This book of success stories has its origin in the Forward Look about Mathematics and Industry that was funded by the European Science Foundation (ESF) and coordinated by the Applied Mathematics Committee of the European Mathematical Society (EMS). In each of these success stories, researchers, students, entrepreneurs, policy makers and business leaders in a range of disciplines will find valuable material and important lessons that can be applied in their own fields.?

The Intrinsic Value of Endangered Species Jul 29 2020 Why save endangered species without clear aesthetic, economic, or ecosystemic value? This book takes on this challenging question through an account of the intrinsic goods of species. Ian A. Smith argues that a species' intrinsic value stems from its ability to flourish—its organisms continuing to reproduce successfully and it avoiding extinction—which helps to demonstrate a further claim, that humans ought to preserve species that we have endangered. He shows our need to exercise humility in our relations with endangered species through the preservation of their intrinsic goods, which in turn rectifies our degradation of their importance. Unique in its appeal to virtue ethics and to species concepts, *The Intrinsic Value of Endangered Species* is an important resource for scholars working in environmental ethics and the philosophy of biology.
