*Civic Empowerment in an Age of Corporate Greed* Aug 26 2022 A thought-provoking investigation of an urgent issue facing American communities today, Edward C. Lorenz's book examines the intersection of corporate irresponsibility and civic engagement. At the heart of this case study is a group of firms responsible for seven of the most contaminated Superfund sites in the United States, the largest food contamination accident in U.S. history, stunning stock and financial manipulations, and a massive shift of jobs off shore. In the face of these egregious environmental, employee, and investor abuses, several communities impacted by these firms organized to confront and combat failures in corporate and bureaucratic leadership, winning notable victories over major financiers, lobbyists, and indifferent or ineffective government agencies. A critical analysis of public and private leadership, business and economic ethics, and civic life, this book concludes with a stirring blueprint for other communities facing similarly overwhelming opposition.

**The Civic Foundations of Fascism in Europe** Apr 22 2022 Drawing on a Gramscian theoretical perspective and developing a systematic comparative approach, *The Civic Foundations of Fascism in Europe* challenges the received Tocquevillian consensus on authoritarianism by arguing that fascist regimes, just like mass democracies, depended on well-organised, rather than weak and atomised, civil societies. In making this argument the book focuses on three crucial cases of interwar authoritarianism: Italy, Spain and Romania, selected because they are all counterintuitive from the perspective of established explanations, while usefully demonstrating the range of fascist outcomes in interwar Europe. Civic Foundations argues that, in all three cases, fascism emerged because of the rapid development of voluntary associations, combined with weakly developed political parties among the dominant class, thus creating a crisis of hegemony. Riley then traces the specific form that this crisis took depending on the form of civil society developed (autonomous, as in Italy; elite-dominated, as in Spain; or state-dominated, as in Romania) in the nineteenth century.

**Honda Engine Swaps** Feb 20 2022 When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

**Democracy in Latin America, 1760-1900** Dec 06 2020 Carlos Forment's aim in this highly ambitious work is to write the book that Tocqueville would have written had he traveled to Latin America instead of the United States. Drawing on an astonishing level of research, Forment pored over countless newspapers, partisan pamphlets, tabloids, journals, private letters, and travelogues to show in this study how citizens of Latin America established strong democratic traditions in their countries through the practice of democracy in their everyday lives. This first volume of Democracy in Latin America considers the development of democratic life in Mexico and Peru from independence to the late 1890s. Forment traces the emergence of hundreds of political, economic, and civic associations run by citizens in both nations and shows how these organizations became models of and for democracy in the face of dictatorship and immense economic hardship. His is the first book to show the presence in Latin America of civic democracy, something that gave men and women in that region an alternative to market- and state-centered forms of life. In looking beneath institutions of government to uncover local and civil organizations in public life, Forment ultimately uncovers a tradition of edification and inculcation that shaped democratic practices in Latin America profoundly. This tradition, he reveals, was stronger in Mexico than in Peru, but its basic outlines were similar in both nations and included a unique form of what Forment calls Civic Catholicism in order to distinguish itself from civic republicanism, the dominant political model throughout the rest of the Western world.

**Developing Sustainable Agriculture and Community** Jan 07 2021 This book illustrates the ways in which communities can strengthen the links and set the stage for long-term partnerships between sustainable agriculture and sustainable rural community development initiatives. It provides lessons learned, first, from the community development literature that can help shape sustainable agriculture strategies, and second, from the sustainable agriculture literature that can prove useful in moulding sound and effective community development strategies. The threads that weave the chapters together is the commitment to a building and expanding the community capital resources that have important bearing on the sustainability of agriculture and the broader community of which it is a part. Certainly, the success of the agriculture/community partnerships is rooted in one critical ingredient - "social capital." To be effective over the long-term, sustainable development depends on a network of people, drawn from a wide array of interests, who have a strong trusting relationship with one another, and who are willing to work together in responding to the economic, environmental, and social challenges facing agriculture and community alike. At the same time, strategies that work to strengthen the stock of all seven types of community capitals are important to pursue. It is balanced investments in all seven types of community capitals that will contribute to the emergence of "community agency" -- the ability of local people to act in a proactive manner in managing, utilizing, and enhancing local resources. With the emergence of "community agency," an important step in the pursuit of a sustainable future for both agriculture and community is possible. This book was published as a special issue of Community Development.

*Prisoners of Freedom* Jun 12 2021 In this vivid ethnography, Harri Englund investigates how ideas of freedom impede struggles against poverty and injustice in emerging democracies. Reaching beyond a narrow focus on the national elite, *Prisoners of Freedom* shows how foreign aid and human rights activism hamper the pursuit of democratic citizenship in Africa. The book explores how activists' aspirations of self-improvement, pursued under harsh economic conditions, find in the human rights discourse a new means to distinguish oneself from the poor masses. Among expatriates, the emphasis on abstract human rights avoids confrontations with the political and business elites. Drawing on long-term research among the Malawian poor, Englund brings to life the personal circumstances of Malawian human rights activists, their expatriate benefactors, and the urban and rural poor as he develops a fresh perspective on freedom—one that recognizes the significance of debt, obligation, and civil virtues.

Or would you get them on the court and have them play? In basketball, the answer is easy&BAD:—you do both. So why teach politics only as a spectator sport? Senator Bob Graham believes that students should expand on their classroom learning about the political system: he spurs them to hit the court and actually play the game. If students work on an issue they care about, politics will become a meaningful and positive experience. This short, how-to guide takes students out of theoretical discussions of policy and into a world where they can affect change. Graham&BAD:'s goal is to have students identify a problem, and then walk them through each step from researching the issue, to getting others involved, to engaging the media. Each chapter starts with a real case, showing citizens tackling a step in the process, and ends with a summary checklist and a series of questions that help students put Graham&BAD:'s game plan in action. By offering students concrete guidance, an array of resources, and advice for troubleshooting and overcoming barriers, this compact user&BAD:'s guide gets students way beyond textbook learning. Thirty-five years ago, as a member of the Florida Legislature, Bob Graham took on the challenge of civic education for eighteen weeks at a Miami-area high school. *The New Democracy Wars* Nov 17 2021 Burrton provides a critical analysis of Canadian and US democracy promotion in the Americas. He concentrates on Haiti, Peru, and Bolivia in particular but situates them within a larger analysis of Canadian and US foreign policy - bilateral and regional - in the areas of trade, investment, diplomacy, security and, for the United States, the war on drugs. His main argument is that democracy promotion is typically formulated to advance commercial, geopolitical and security objectives that conflict with a genuine commitment to democratic development. Given this broad scope, the book is well positioned to contribute to a number of debates in comparative Latin American politics and international political economy (IPE) with a focus on North-South relations in the hemisphere.
