Duty Calls: Dunkirk Jul 29 2020 'YOU WANTED TO SEE SOME ACTION - WELL YOU'RE GOING TO GET IT NOW. YOU'RE GOING TO GET IT NOW ALL RIGHT.' Friday 24th May, 1940 Private Johnny Hawke, aged sixteen, awakens to artillery fire. Hours later, Stukas scream down from the sky. Messerschmit fighters roar towards his regiment. Trucks burst into flames. Now men and mules lay dead and dying, severed limbs twisted grotesquely as blood soaks the cobbled streets. Young Private Hawke just wants to do his duty and serve his country. But as he - and his fellow soldiers - prepare to stop the German advance, there's only one question on everyone's lips. HOW WILL THEY SURVIVE?

Early Social Cognition Apr 18 2022 In recent years, much stimulating research has emerged on children's theories of mind, construed as the understanding of others' intentions, beliefs, and desires. In this context, there is a renewed interest in the developmental origins of social cognition. This book is an expression of this new interest, assembling current conceptualizations and research on the precursors of joint engagement, language, and explicit theories of mind. The focus is on what announces such remarkable development. The book is divided into four parts. Part I deals with the nature and development of social cognition in infancy. Each contribution provides a different view of the important features of social cognition in the first months of life. Part II presents recent empirical findings on the developing ability by young infants to detect whether caretakers and social partners are attentive and responsive to their own behavior in social exchanges. Part III focuses on the early development of infants' ability to monitor others in their action, their gazing, their animacy, and their emotion. Part IV offers a commentary on the contributions as a whole, discussing the basic theoretical assumptions guiding current research on early social cognition. The

author identifies the conceptual strengths and weaknesses of the work presented and suggests interesting avenues for future research.

The Prism City Nov 13 2021 The third and final installment in the Kingdoms of Oz series. The gloves are off. The board is set. The Witches of Oz are prepared to fight. It's a race to the city as Ellana, Fallon, and Nox work to keep their enemy from taking over. Has she done enough to prove her good intentions, or will the people of Oz rally to help her defeat the witch that has caused years of misery? Lions, archers, and magical powers will combine. but to what end?

The Ski Mask Way Feb 22 2020 Hoping to start his life over after his prison release, ladies' man Seven finds himself tempted by the fast money of the drug trade when his day job fails to provide his desired lifestyle, a circumstance for which he teams up with a fellow ex-con for a high-stakes operation. Original. 60,000 first printing.

Urban Transportation and Logistics Sep 11 2021 Although society has become increasingly dependent on the timely operation of logistics systems, we still face many problems regarding efficiency, the environment, energy consumption, and safety in urban transport and logistics—under normal cases and in disasters. As such, understanding how to address these challenges has become essential for creating better urban planning and policy implementation. Presenting the best practices of leading experts from around the world, *Urban Transportation and Logistics: Health, Safety, and Security Concerns* provides cutting-edge concepts and a vision for urban transport and logistics relating to human security. Its comprehensive coverage supplies the foundation for examining transport and logistics systems in urban areas from the viewpoint of safety and security considerations on human life. Topics covered include: Hazardous material transport Healthy transport Road safety Network design for freight transport and supply chain Transport and logistics in Asian cities Vehicle routing and scheduling with uncertainty Urban transport and logistics in natural disasters Future perspectives on urban freight transport The book addresses Information and Communication Technologies (ICT) and Intelligent Transport System (ITS) applications within urban logistics. It considers supply chains, road safety in hazardous material transport, and logistics and transport design in mixed traffic areas. It also introduces the notion of the megalopolis and the need for improved planning relative to human usage, freight transportation, and city logistic planning. This book provides numerous examples and case studies of real-world scenarios from around the world, making it useful for both practitioners and researchers involved in urban transport and logistics planning.

Principles of Animal Communication Jan 15 2022 Starting with the physics and physiology of signal production, propagation and reception, this book provides a useful introduction to the principles of animal communication. Only a minimum of algebra is required to understand the text.

Firedrake Nov 20 2019 The Salamanders attempt a daring rescue mission deep in Dark Eldar territory in order to reveal more secrets held within the Tome of Fire. When Chaplain Elysium of the Salamanders is taken captive by Dark Eldar, he faces a fight for survival at the hands of these cruel aliens. The Firedrakes of 1st Company attempt a daring rescue mission, but much more is at stake than the Chaplain's life. He holds the key to secrets buried beneath Mount Deathfire, secrets that could reveal the damnation – or salvation – of their home world.

Yes, Roya May 27 2020 A very dirty book about a very unusual relationship.

Sundial of the Seasons Aug 18 2019 In *Sundial of the Seasons*, beloved New York Times nature writer Hal Borland (1900-1978) guides readers day-by-day through the seasonal changes of the natural world. With humility, wit, and wisdom he celebrates the everyday events of life in the country. This collection of his "outdoor editorials" will bring you daily joy and inspiration.

GRE Math Workbook Jul 09 2021 Kaplan's GRE Math Workbook provides hundreds of realistic practice questions and exercises to help you prepare for the Math portion of the GRE. With expert strategies, content review, and realistic practice sets, GRE Math Workbook will help you face the test with confidence. The Best Review Six full-length Quantitative Reasoning practice sets Diagnostic tool for even more targeted Quantitative practice Review of crucial math skills and concepts, including arithmetic, algebra, data interpretation, geometry, and probability Key strategies for all Quantitative Reasoning question types on the revised GRE An advanced content review section to help you score higher Expert Guidance We know the test: The Kaplan team has spent years studying every GRE-related document available. Kaplan's expert psychometricians ensure our practice questions and study materials are true to the test. We invented test prep—Kaplan (www.kaptest.com) has been helping students for almost 80 years. Our proven strategies have helped legions of students achieve their dreams.

Developmental Social Cognitive Neuroscience Jun 20 2022 This volume in the JPS Series is intended to help crystallize the emergence of a new field, "Developmental Social Cognitive Neuroscience," aimed at elucidating the neural correlates of the development of socio-emotional experience and behavior. No one any longer doubts that infants are born with a biologically based head start in accomplishing their important life tasks—genetic resources, if you will, that are exploited differently in different contexts. Nevertheless, it is also true that socially relevant neural functions develop slowly during childhood and that this development is owed to complex interactions among genes, social and cultural environments, and children's own behavior. A key challenge lies in finding appropriate ways of describing these complex interactions and the way in which they unfold in real developmental time. This is the challenge that motivates research in developmental social cognitive neuroscience. The chapters in this book highlight the latest and best research in this emerging field, and they cover a range of topics, including the typical and atypical development of imitation, impulsivity, novelty seeking, risk taking, self and social awareness, emotion regulation, moral reasoning, and executive function. Also addressed are the potential limitations of a neuroscientific approach to the development of social cognition. Intended for researchers and advanced students in neuroscience and developmental, cognitive, and social psychology, this book is appropriate for graduate seminars and upper-level undergraduate courses on social cognitive neuroscience, developmental neuroscience, social development, and cognitive development.

Dead Petals - An Apocalypse Mar 25 2020 Not just your garden-variety zombie apocalypse... It was a week ago when I heard the stomping on the front porch. It sounded like someone was drunk. I opened the door and it was my neighbor. She lunged at me. *Dead Petals* is a different species of zombie tale. Apocalypse, Rapture and the transformation of reality, all sprouting from the same seed.

Sway Jun 27 2020 In a hilarious and often poignant debut YA novel, Jesse Alderman—or "Sway," as he's known—avoids emotional connection at all costs, but he's ultimately forced to open his heart when he meets the girl of his dreams.

Heart Rate Variability and other Autonomic Markers in Children and Adolescents Dec 26 2022

Easter Is Coming! Sep 23 2022 Mommy and her little ones are settling in for story time, and this time it's the biblical story of Easter that she's telling. As the youngsters hear God's tale unfold with its sometimes somber notes about sin and death, they are softly and continually reminded,

“But Easter is coming!” By the end of the book, the anticipation has built and the children can celebrate the ending and the glory of Easter Sunday. In a time when children’s Easter excitement often focuses on only egg hunts and candy, this book offers a different—and true—reason for joy and expectancy. It’s designed to be read and reread on the days leading up to Easter, telling the greatest story and building a sense of anticipation and celebration in little hearts. Go to bhkids.com to find this book’s Parent Connection, an easy tool to help moms and dads (or anyone else who loves kids) discuss the book’s message with their child. We’re all about connecting parents and kids to each other and to God’s Word.

Reference Data Sep 30 2020 Guide C: Reference Data contains the basic physical data and calculations which form the crucial part of building services engineer background reference material. Expanded and updated throughout, the book contains sections on the properties of humid air, water and steam, on heat transfer, the flow of fluids in pipes and ducts, and fuels and combustion, ending with a comprehensive section on units, mathematical and miscellaneous data. There are extensive and easy-to-follow tables and graphs. ·Essential reference tool for all professional building services engineers ·Easy to follow tables and graphs make the data accessible for all professionals ·Provides you with all the necessary data to make informed decisions

40 Sonnets Mar 05 2021 This collection, which won the 2015 Costa Poetry Award, is an exhibition of the Dundee-born poet’s stunningly accomplished adoption of the sonnet’s ancient structure This collection from Don Paterson, his first since the Forward Prize-winning *Rain* in 2009, is a series of forty luminous sonnets. Some take a traditional form, while others experiment with the reader’s conception of the sonnet, but they all share the lyrical intelligence and musical gift that has made Paterson one of our most celebrated poets. Addressed to friends and enemies, the living and the dead, children, musicians, poets, and dogs, these poems are as ambitious in their scope and tonal range as in the breadth of their concerns. Here, voices call home from the blackout and the airlock, the storm cave and the séance, the coal shed, the war, the highway, the forest, and the sea. These are voices frustrated by distance and darkness, which ring with the “sound that fades up from the hiss, / like a glass some random draught had set ringing, / now full of its only note, its lonely call.” In *40 Sonnets*, Paterson returns to some of his central themes—contradiction and strangeness, tension and transformation, the dream world, and the divided self—in some of the most powerful and formally assured poems of his career.

Frustration Theory Nov 01 2020 We live in a world in which inconsistency is the rule rather than the exception and this is particularly true for rewards and frustrations. In some cases, rewards and frustrative non-rewards appear randomly for what seems to be the same behaviour; in others a sequence of rewards is suddenly followed by non-rewards, or large rewards by small rewards. The important common factor in these and other cases is frustration - how we learn about it and how we respond to it. This book provides a basis in learning theory and particularly in frustration theory, for a comprehension not only of the mechanisms controlling these dispositions, but also of their order of appearance in early development and, to an approximation at least, their neural underpinnings.

Animal Behaviour Apr 25 2020 ?This textbook presents all basic principles of animal behaviour in a clear and concise manner and illustrates them with up-to-date examples. Emphasis is placed on behavioural biology as an integrative discipline of organismic biology, focusing on the adaptive value of behaviours that facilitate resource access, predator avoidance and reproductive success and underlie parental care, all within a comprehensive presentation of social complexity. This new textbook provides a rich resource for students (and teachers) from a wide range of life

science disciplines.

Analyzing Animal Societies May 07 2021 Animals lead rich social lives. They care for one another, compete for resources, and mate. Within a society, social relationships may be simple or complex and usually vary considerably, both between different groups of individuals and over time. These social systems are fundamental to biological organization, and animal societies are central to studies of behavioral and evolutionary biology. But how do we study animal societies? How do we take observations of animals fighting, grooming, or forming groups and produce a realistic description or model of their societies? *Analyzing Animal Societies* presents a conceptual framework for analyzing social behavior and demonstrates how to put this framework into practice by collecting suitable data on the interactions and associations of individuals so that relationships can be described, and, from these, models can be derived. In addition to presenting the tools, Hal Whitehead illustrates their applicability using a wide range of real data on a variety of animal species—from bats and chimps to dolphins and birds. The techniques that Whitehead describes will be profitably adopted by scientists working with primates, cetaceans, birds, and ungulates, but the tools can be used to study societies of invertebrates, amphibians, and even humans. *Analyzing Animal Societies* will become a standard reference for those studying vertebrate social behavior and will give to these studies the kind of quality standard already in use in other areas of the life sciences.

Parental Stress and Early Child Development Aug 22 2022 This book examines the complex impact of parenting stress and the effects of its transmission on young children's development and well-being (e.g., emotion self-regulation; executive functioning; maltreatment; future parenting practices). It analyzes current findings on acute and chronic psychological and socioeconomic stressors affecting parents, including those associated with poverty and cultural disparities, pregnancy and motherhood, and caring for children with developmental disabilities. Contributors explore how parental stress affects cognitive, affective, behavioral, and neurological development in children while pinpointing core adaptation, resilience, and coping skills parents need to reduce abusive and other negative behaviors and promote optimal outcomes in their children. These nuanced bidirectional perspectives on parent/child dynamics aim to inform clinical strategies and future research targeting parental stress and its cyclical impact on subsequent generations. Included in the coverage: Parental stress and child temperament. How social structure and culture shape parental strain and the well-being of parents and children. The stress of parenting children with developmental disabilities. Consequences and mechanisms of child maltreatment and the implications for parenting. How being mothered affects the development of mothering. Prenatal maternal stress and psychobiological development during childhood. Parenting Stress and Early Child Development is an essential resource for researchers, clinicians and related professionals, and graduate students in infancy and early childhood development, developmental psychology, pediatrics, family studies, and developmental neuroscience.

Human Movements in Human-Computer Interaction (HCI) Feb 16 2022 This book discusses human-computer interaction (HCI) which is a multidisciplinary field of study which aims at developing and implementing tools and techniques to attain an effective and efficient interaction between the humans (the users) and computers. In recent years, there is an increase of interest of HCI researchers and practitioners in the inclusion of gaze gestures which can greatly enhance the communication between the human user and the computer, as well as other more "physical" communication involving all what can be learned from movements of the human body, from face, hand, leg, foot, etc., to the whole body movement, even extending to the involvement of groups of agents, even society. These explicitly human-centric issues in the development, design, analysis, and implementation of the HCI systems are discussed in the book. A comprehensive state of the art is given complemented with

original own proposals. As opposed to more traditional formal and IT based analyses, the discussion is here more focused on relevant research results from psychology and psychophysiology, and other soft, cognitive, etc., sciences. Remarks on the relevance of affective computing are also mentioned.

Odes Jan 03 2021 'Interspersed with acts of breathtaking linguistic daring.' Charlotte Mendelson, Observer Book of the Year Opening with a powerful and tender 'Ode to the Hymen', Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her – the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here – Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

Transportation Statistics and Microsimulation Jun 08 2021 By discussing statistical concepts in the context of transportation planning and operations, Transportation Statistics and Microsimulation provides the necessary background for making informed transportation-related decisions. It explains the why behind standard methods and uses real-world transportation examples and problems to illustrate key conc

Perspectives in Child Psychology Apr 06 2021

Handbook of Life Course Health Development Aug 10 2021 This book is open access under a CC BY 4.0 license. ?This handbook synthesizes and analyzes the growing knowledge base on life course health development (LCHD) from the prenatal period through emerging adulthood, with implications for clinical practice and public health. It presents LCHD as an innovative field with a sound theoretical framework for understanding wellness and disease from a lifespan perspective, replacing previous medical, biopsychosocial, and early genomic models of health. Interdisciplinary chapters discuss major health concerns (diabetes, obesity), important less-studied conditions (hearing, kidney health), and large-scale issues (nutrition, adversity) from a lifespan viewpoint. In addition, chapters address methodological approaches and challenges by analyzing existing measures, studies, and surveys. The book concludes with the editors' research agenda that proposes priorities for future LCHD research and its application to health care practice and health policy. Topics featured in the Handbook include: The prenatal period and its effect on child obesity and metabolic outcomes. Pregnancy complications and their effect on women's cardiovascular health. A multi-level approach for obesity prevention in children. Application of the LCHD framework to autism spectrum disorder. Socioeconomic disadvantage and its influence on health development across the lifespan. The importance of nutrition to optimal health development across the lifespan. The Handbook of Life Course Health Development is a must-have resource for researchers, clinicians/professionals, and graduate students in developmental psychology/science; maternal and child health; social work; health economics; educational policy and politics; and medical law as well as many interrelated subdisciplines in psychology, medicine, public health, mental health, education, social welfare, economics, sociology, and law.

Sniping Oct 20 2019 Although, even before firearms were available, soldiers such as archers were specially trained as elite marksmen, the focus of this book is on the history of sniping, mainly from distance, using firearms. The authors relate the fascinating and somewhat dark history of sniping and snipers through the ages, mainly military but also with some reference to police sniping (perhaps best called marksmanship). They

cover sniping during all major conflicts involving all major forces during the period from America's Revolutionary War to the conflicts in the Middle East today. Each chapter features individual incidents throughout the world during the appropriate conflict and assesses the equipment and tactics deployed, citing famous as well as lesser-known anecdotes. Sniping further describes various camouflage schemes and concealment techniques developed through the ages, the continually evolving sniper skills, weapons, and other special equipment, and the increasing use of sniping by regular and terrorist forces, particularly against vulnerable military hardware and civilian transportation systems. Full coverage is given to the heavy caliber sniper weapons of the twenty-first century such as the Barrett .50 caliber rifle and their impact on the battlefield. The highly readable text is stunningly illustrated with hundreds of photographs and diagrams.

PHILOSOPHY Sep 18 2019

Oxytocin and Social Behaviour in Dogs and Other (Self-)Domesticated Species Methodological Caveats and Promising Perspectives Nov 25 2022 Studying the relationship between different aspects of social behaviour and the oxytocin system in nonhuman animal species is a promising research area which may also have translational relevance for understanding the neuro-hormonal bases of human social cognitive abilities. In order to advance our understanding of social-behavioural effects of oxytocin, this Research Topic eBook collects together contributions from researchers in social cognition and related fields, whose work addresses cutting-edge questions and important gaps in our knowledge of the behavioural effects of oxytocin in dogs and other domestic species.

The Dynamic Business Plan Jul 21 2022 IT takes a long time to make things easy and understandable. I have put 25 years of working with entrepreneurs and small businesses into this book. It is clear, easy to read and understand. After reading you will say · Yes, I can also start a business

Other Minds Dec 14 2021 Leading scholars from psychology, neuroscience, and philosophy present theories and findings on understanding how individuals infer such complex mental states as beliefs, desires, intentions, and emotions.

Defining Dulcie Feb 04 2021 From a debut author comes a story of finding oneself in a place all too familiar. After Dulcie Morigan Jones's dad dies, her mom decides they need to find a new life in California. But Dulcie doesn't understand what's wrong with her old life back in Newbury, Connecticut. So she heads across country and back home in her father's red 1968 Chevy pickup truck. When she arrives, she meets Roxanne, a girl whose home life makes Dulcie see that her own situation may not be all that bad after all. And as the summer comes to an end, Dulcie realizes that maybe it's necessary to leave a place in order to come back and find out who you really are.

The Handbook of Life-Span Development, Volume 1 Mar 17 2022 In the past fifty years, scholars of human development have been moving from studying change in humans within sharply defined periods, to seeing many more of these phenomenon as more profitably studied over time and in relation to other processes. The Handbook of Life-Span Development, Volume 1: Cognition, Biology, and Methods presents the study of human development conducted by the best scholars in the 21st century. Social workers, counselors and public health workers will receive coverage of of the biological and cognitive aspects of human change across the lifespan.

Language and Social Situations Oct 12 2021 Most of our interactions with others occur within the framework of recurring social situations, and the language choices we make are intimately tied to situational features. Although the interdependence between language and social situations has been well recognized at least since G. H. Mead developed his symbolic interactionist theory, psychologists have been reluctant to devote much

interest to this domain until recently. Yet it is arguable that a detailed understanding of the subtle links between situational features and language use must lie at the heart of any genuinely social psychology. This volume contains original contributions from psychologists, linguists and philosophers from the United States, Canada, Europe, Israel, and Australia who share an interest in the social-psychological aspects of language. Their work represents one of the first concentrated attempts to chart the possibilities of this exciting field. It is perhaps in order to say a few words about the origins of this book. The need for a volume integrating research on language and social situations first emerged during the 2nd International Conference of Language and Social Psychology at Bristol University in 1983, at which I was convening a symposium with a similar title at the request of the organizers, Peter Robinson and Howard Giles. When they first approached me with this idea in 1982, I gladly accepted, since my own research on cognitive representations of social episodes seemed eminently relevant to a symposium on language and social situations.

Riven Dec 02 2020 When Brady Wayne Darby, a condemned man whose life is marked by death, guilt, and despair, meets Thomas Carey, a weary man of God, he learns about the prospects of rebirth, forgiveness, and hope.

The Comparative Method in Evolutionary Biology Dec 22 2019 From Darwin onward, it has been second nature for evolutionary biologists to think comparatively, because comparisons establish the generality of evolutionary phenomena. Do large genomes slow down development? What lifestyles select for large brains? Are extinction rates related to body size? These are all questions for the comparative method, and this book is about how such questions can be answered. It examines how the comparative method complements other approaches, identifies the biological causes of similarity among species, and discusses methods for reconstructing phylogenetic trees, along with many other topics. The book will interest all students, professionals, and researchers in evolutionary biology, ecology, genetics and related fields.
