A Bleeding in Black Leather Jan 23 2020 With *A Bleeding in Black Leather*, John Pietaro takes urban poetry and fiction on a throbbing roller-coaster ride through latent modernism, self-exploration, jagged rhythmic cadences and the raw sounds of music and words. All the while reveling in New York centrality. Here's a collection conceived in Selby's Brooklyn in the bare light of the blue hour.

Explorations in Asian Christianity Jun 20 2022 Asia is the birthplace of Christianity, yet the history of Asian Christianity has long been a difficult one. Scott W. Sunquist is a recognized expert on the history of the Christian faith in Asia, and these essays cover Asian Christianity in broad perspective, with topics like the history of Christian mission and missionary practice in Asia, theological education, and global migration.

Intensive Short-Term Dynamic Psychotherapy Feb 16 2022 Traditionally, psychoanalytic treatment has been a lengthy endeavour, requiring a long-term commitment from patient and analyst, as well as vast financial resources. More recently, short-term approaches to psychoanalytic treatment have proliferated. One of the most well-known and thoroughly studied is the groundbreaking method of Intensive Short-term Dynamic Psychotherapy, developed by Dr. Habib Davanloo. Having trained directly with Dr. Davanloo, the author has written a clear, concise outline of the method that has come to be regarded as a classic in the field. The book is organised in a systematic fashion, analogous to the process of therapy itself, from initial contact through to termination and follow-up. Detailed clinical examples are presented throughout the text to illustrate how theory is translated into techniques of unparalleled power and effectiveness.

Connecting Kids to History with Museum Exhibitions Jul 09 2021 Kids have profound and important relationships to the past, but they don't experience history in the same way as adults. For museum professionals and everyone involved in informal history education and exhibition design, this book is the essential new guide to creating meaningful and memorable connections to the past for children. This vital museum audience possesses many of the same dynamic qualities as trained historian—curiosity, inquiry, empathy for the human experience—yet traditional history exhibitions tend to focus on passive looking in the galleries, giving priority to relaying information through words. D. Lynn McRainey and John Russick bring together top museum professionals to present state-of-the-art research and practice that respects and incorporates kids' developmental stages and learning preferences and the specific ways in which kids connect to history. They provide concrete tools for audience research and evaluation; exhibition development and design; and working with kids as "creative consultants." The only book to focus comprehensively on history exhibits for kids, *Connecting Kids to History With Museum Exhibitions* shows how to enhance the experiences of a vitally important but frequently the least understood museum audience.

Roller Coasters Mar 05 2021 In its fourth edition, this exhaustive guide to roller coasters in the United States and Canada also provides a history of coaster evolution (from the 16th century) and a look into the future of coaster technology and design. The book lists by state or province more than 700 coasters at more than 160 amusement and theme parks. Each entry includes contact information along with summaries of each coaster's origins, features and history. There are six appendices: famous coaster designers, the longest wood and steel coasters in North America, a coaster census by state or province, a chronology of wooden roller coasters still in operation, interesting amusement park and coaster facts, and a guide to the alpine coasters at winter resorts in the U.S. and Canada.

Space Exploration For Dummies® Dec 26 2022 Your comprehensive guide to remarkable achievements in space Do you long to explore the universe? This plain-English, fully illustrated guide explains the great discoveries and advancements in space exploration throughout history, from early astronomers to the International Space Station. You'll learn about the first satellites, rockets, and people in space; explore space programs around the world; and ponder the controversial question: Why continue to explore space? Take a quick tour of astronomy get to know the solar system and our place in the galaxy, take a crash course in rocket science, and live a day in the life of an astronaut Run the Great Space Race trace the growth of the Space Age from Sputnik to the Apollo moon landings and meet the robots that explored the cosmos Watch as space exploration matures from the birth of the Space Shuttle to the creation of the Mir Space Station to successes and failures in Mars exploration, see how space programs reached new levels Journey among the planets check out the discoveries made during historic voyages to the inner and outer reaches of the solar system Understand current exploration review the telescopes in space, take a tour of the International Space Station, and see the latest sights on Mars Look into the future learn about upcoming space missions and increased access to space travel Open the book and find: Descriptions of space milestones and future missions An easy-to-follow chronological structure Color and black-and-white photos The nitty-gritty details of becoming an astronaut A grand tour of the solar system through space missions Explanations of tragedies and narrow escapes Facts on the creation of space stations by NASA and the USSR Ten places to look for life beyond Earth

Solutions to Competitive Problems in the Oil Industry Aug 10 2021

Frozen Dreams Jun 08 2021 Wedding up-to-date scientific information to an understanding of the emotional burdens and ethical dilemmas that inhere in reproductive medicine, *Frozen Dreams: Psychodynamic Dimensions of Infertility and Assisted Reproduction* provides an overview of the psychology of infertility patients and of the evaluative, administrative, and especially psychotherapeutic issues involved in helping them. The contributors to this volume, who include professionals from nationally prestigious reproductive programs as well as psychotherapists who evaluate and work clinically with infertility patients, explore the complex choices about life and death that are the daily experience of infertility specialists. In voices equally authoritative and intimate, psychotherapists and other health professionals explore the therapeutic process with patients and couples struggling with miscarriage, infertility, childlessness, the possibility of adoption, and the promise of assisted pregnancy. And the contributors are equally attentive to the range of issues that challenge physicians and nurses active in reproductive medicine, intent on providing practical information that will aid decision-making in this demanding area of practice. Written for a large audience of psychiatrists, psychologists, social workers, researchers, nurses, physicians, and general readers, *Frozen Dreams* is a fascinating introduction to the human face of reproductive medicine. Filled with intriguing and edifying case histories, it will appeal to all mental health professionals who work with adult patients through their childbearing years. For professionals who work inside the complex world of infertility treatment, *Frozen Dreams* will quickly become an essential text that is turned to repeatedly for information, guidance, reassurance, and revitalization.

If You're Not Having Fun You're Doing it Wrong Apr 18 2022 Where are you on the roller coaster of life? Climbing to new heights. Holding on, hoping you don't crash. Stuck in a downward plunge. Are you having any fun? Life's roller coaster provides ups, downs, highs, and lows. Even though we don't know what's coming next, wouldn't it be great to enjoy the ride? There is a way to get more enjoyment out of life, and it's called perspective management. *The Art of Perspective Management* is an exploration of the human experience, with an emphasis on proactive decision-making. It's a fun read that embraces the construct, "While you can't always control the circumstances in your life, you always have a choice for how you respond to them." Consider a traffic jam. Is it an annoyance or an opportunity for some down time? If you are late for an appointment, it's a bummer. If you don't want to go to the appointment, it's a blessing. If you are headed away from the jam, it's your lucky day. Our perspective determines how we react to any situation. In *The Art of Perspective Management*, Keith takes a lighthearted approach to exploring the factors that contribute to development of perspective, explaining perspective's influence on decision-making, and describing the technique of reframing, which can make any experience life productive. Readers can expect to laugh and learn because Keith's motto is, "If you are not learning and having fun, then he's doing it wrong!"

Teaching Science Through Trade Books Feb 04 2021

What was your favourite book as a child? In more than 10 years of facilitating workshops, we have never heard anyone reply, My fourth-grade science textbook. Clearly, textbooks have an important place in the science classroom, but using trade books to supplement a textbook can greatly enrich students experience. from *Teaching Science Through Trade Books* If you like the popular *Teaching Science Through Trade Books* columns in NSTA's journal *Science and Children*, or if you've become enamoured of the award-winning *Picture-Perfect Science Lessons* series, you'll love this new collection. It's based on the same time-saving concept: By using children's books to pique students interest, you can combine science teaching with reading instruction in an engaging and effective way. In this volume, column authors Christine Royce, Karen Ansberry, and Emily Morgan selected 50 of their favorites, updated the lessons, and added student activity pages, making it easier than ever to teach fundamental science concepts through high-quality fiction and nonfiction children's books. Just as with the original columns, each lesson highlights two trade books and offers two targeted activities, one for K-3 and one for grades 4-6. All activities are Standards-based and inquiry-oriented. From *Measuring Penny* and *How Tall, How Short, How Far Away?* to *I Took a Walk* and *Secret Place*, the featured books will help your students put science in a whole new context. *Teaching Science Through Trade Books* offers an ideal way to combine well-structured, ready-to-teach lessons with strong curricular connections and books your students just may remember, always.

But Should the Angels Call for Him Sep 30 2020 Glenda Pearson had a story that needed to be told. This is that story. There are no words to express the devastation that a parent feels when a child is taken from them. When her 21-year-old son was killed in an accident, so many dreams for the future went with him. The painful journey that followed has been an emotional roller coaster and a catalyst for self-discovery. Her search for meaning and exploration of herself in a world that had turned upside-down changed the course of her life. Here, Glenda offers you the insights and wisdom she has gained from her life experiences. To view newspaper articles on the book and author please go to www.angelscall.us

Exploring Science in Museums Jul 21 2022 The relationship between science and the public is one of the great contemporary

debates. Understanding between scientists and non-scientists is a key figure in the dialogue and here the interpretation of science in museums has a vital part to play.

Business and Professional Communication Jan 15 2022 Recipient of the 2020 Textbook Excellence Award from the Textbook & Academic Authors Association (TAA) Business and Professional Communication provides students with the knowledge and skills they need to move from interview candidate, to team member, to leader. Accessible coverage of new communication technology and social media prepares students to communicate effectively in real world settings. With an emphasis on building skills for business writing and professional presentations, this text empowers students to successfully handle important work-related activities, including job interviewing, working in team, strategically utilizing visual aids, and providing feedback to supervisors. This title is accompanied by a complete teaching and learning package. Contact your SAGE representative to request a demo. Digital Option / Courseware SAGE Vantage is an intuitive digital platform that delivers this text's content and course materials in a learning experience that offers auto-graded assignments and interactive multimedia tools, all carefully designed to ignite student engagement and drive critical thinking. Built with you and your students in mind, it offers simple course set-up and enables students to better prepare for class. Learn more. Assignable Video with Assessment Assignable video (available with SAGE Vantage) is tied to learning objectives and curated exclusively for this text to bring concepts to life. LMS Cartridge (formerly known as SAGE Coursepacks): Import this title's instructor resources into your school's learning management system (LMS) and save time. Don't use an LMS? You can still access all of the same online resources for this title via the password-protected Instructor Resource Site. Learn more.

The Book of Movement Exploration Jun 27 2020 Ages 3 to 9 years. These activities bring out the strong movement impulses in children, who love to burn off energy by spontaneously dancing around the living room or running from place to place. Children will develop an awareness for their bodies, time, space, weight, locomotion, flow, and shape. Performed quickly or slowly, with music or without, solo or in a group, these activities make for fun, engaging educational experiences for children.

BULLS IN THE CHINA SHOP Mar 25 2020 Bulls in the China Shop is an engagingly anecdotal, lucidly written account of the tragicomic cultural and political misadventures that have plagued American commercial ventures over the past two decades in the People's Republic of China. When diplomatic tensions between the two countries were eased in the 1970s, American businesses rushed to China, lured by the world's largest national market. As they tried to introduce capitalism to China's socialist society they soon discovered that the rules of business, as they understood them, did not apply. Chinese buyers placed huge orders for which they had no money to pay: Chinese marketing bore no relation to capitalist exigencies—playing cards were named “Maxipuke” (pu-ke: poker), designer men's underwear, “Pansy”; million-dollar projects already underway were cancelled without warning. The Chinese, in turn, were astonished by the indiscretion of the Americans, who prized “directness” above all in negotiations and were at once brash and guileless in exposing weaknesses in their own bargaining positions. Like Mark Twain's innocents, Americans were woefully ignorant of Chinese etiquette, and prone to embarrassing gaffes. And more: the Chinese found the American insistence on lengthy, detailed contracts fatuous, if not insulting. Bulls in the China Shop is a fascinating look at the uneasy commerce between American and China—between capitalism and socialism—and at the cultural, political, and historical significance of trade between the two nations.

Exploration and Meaning Making in the Learning of Science Nov 25 2022 Mountaineers, Rock Climbers, and Science Educators Around the 1920s, rock climbing separated from mountaineering to become a separate sport. At that time European climbers developed new equipment and techniques, enabling them to ascend mountain faces and to climb rocks, which were considered unassailable up to that time. American climbers went further by expanding and improving on the equipment. They even developed a system of quantification where points were given for the degree of difficulty of an ascent. This system focused primarily on the pitch of the mountain, and it even calculated up to decimals to give a high degree of quantification. Rock climbing became a technical system. Csikszentmihaly (1976) observed that the sole interest of rock climbers at that time was to climb the rock. Rock climbers were known to reach the top and not even glance around at the scenery. The focus was on reaching the top of the rock. In contrast, mountaineers saw the whole mountain as a single “unit of perception.” “The ascent (to them) is a gestalt including the aesthetic, historical, personal and physical sensations” (Csikszentmihaly, 1976, p. 486). This is an example of two contrasting approaches to the same kind of landscape and of two different groups of people. Interestingly, in the US, Europe, and Japan a large segment of the early rock climbers were young mathematicians and theoretical physicists, while the mountaineers were a more varied lot.

Exploring Energy with TOYS Oct 12 2021 Provides experiments and lesson plans for teachers that demonstrate such concepts as energy of motion, stored energy, and energy conservation

Environmental and Nature Writing Dec 14 2021 Offering guidance on writing poetry, nonfiction, and fiction, Environmental and Nature Writing is a complete introduction to the art and craft of writing about the environment in a wide range of genres. With discussion questions and writing prompts throughout, Environmental and Nature Writing: A Writers' Guide and Anthology covers such topics as: · The history of writing about the environment · Image, description and metaphor · Environmental journalism, poetry, and fiction · Researching, revising and publishing · Styles of nature writing, from

discovery to memoir to polemic The book also includes an anthology, offering inspiring examples of nature writing in all of the genres covered by the book, including work by: John Daniel, Camille T. Dungy, David Gessner, Jennifer Lunden, Erik Reece, David Treuer, Bonnie Jo Campbell, Alyson Hagy, Bonnie Nadzam, Lydia Peelle, Benjamin Percy, Gabrielle Calvocoressi, Nikky Finney, Juan Felipe Herrera, Major Jackson, Aimee Nezhukumatathil, G.E. Patterson, Natasha Trethewey, and many more.

The Fall of Candy Corn May 27 2020 In the second book of the Sweet Seasons series, Candace has decided to spend another season at The Zone amusement park. But while working as a screaming mascot in the maze is fun, the park has more than a few serious twists—and scares—to offer. Candace never thought she'd sign up for another season at The Zone, but the allure of working with her boyfriend, Kurt, and spending time with her new friends has made the job easier to bear. Though once she finds out her new job is working as Candy in the newest Halloween maze—a role based on her harrowing night in the park that summer that shifted into a wild story she was chased by a killer—things don't look quite as promising. Her friend Josh makes things slightly easier to bear, but soon the stress of her family's potential financial hardships, a suddenly strained relationship with Kurt, and the exhaustion of running and screaming each night begin to take their toll. Then dangerous things start happening inside the maze, and Candace starts wondering if maybe her urban myth is becoming a reality—which means her life may be in danger. *The Fall of Candy Corn*: is a YA contemporary novel with a fun, rom-com feel is written by New York Times bestselling author Debbie Viguié contains a suspenseful plotline with light chills is a coming-of-age story that mixes humor with real-life struggles is a clean read for young adult fans of any age

The Power of Life Coaching Volume 2 May 19 2022 Wainwright Global Institute of Professional Coaching collaborated with 15 of their Certified Professional Coaches to create the Power of Life Coaching, the seminal book for individuals who are curious about coaching and what the experience of coaching can do for them. Each author shares their diverse life changing experiences that describe the powerful transformation that naturally unfolds during the coaching process, both for themselves and for their clients. You will learn about the different genres of coaching, how coaching will bring to light your inner-most goals, dreams and desires, so you can easily expand your awareness of your life-purpose now.

Exploring Mars Aug 22 2022 *Exploring Mars: Secrets of the Red Planet* by the Editors of Scientific American Our nearest planetary neighbor has been the subject of endless fascination and wide-ranging theories throughout history. Is there life on Mars? Was there ever life on Mars? What was the atmosphere like thousands or millions of years ago? From Percival Lowell, who built his own observatory so he could dedicate himself to studying the red planet, to NASA landing the car-sized Opportunity rover in 2012, this eBook, *Exploring Mars: Secrets of the Red Planet*, traces Scientific American's coverage of the observation and exploration of Mars. The first section outlines early 20th century theories about Mars, including the possibility of an intricate canal system built by an intelligent species. Once the space probes enter the picture, most of those ideas were debunked, but even more questions arose. The second section covers current missions, which found evidence of ancient oceans and a thicker atmosphere that has since been lost. The third section raises even more exciting possibilities with ambitious plans for future missions. In this book, you'll follow these advances in astronomy and planetary science as better and better technology brings us incrementally closer to unlocking the secrets of Mars.

Instructional-design Theories and Models May 07 2021 Instructional theory describes a variety of methods of instruction (different ways of facilitating human learning and development) and when to use--and not use--each of those methods. It is about how to help people learn better. This volume provides a concise summary of a broad sampling of new methods of instruction currently under development, helps show the interrelationships among these diverse theories, and highlights current issues and trends in instructional design. It is a sequel to *Instructional-Design Theories and Models: An Overview of Their Current Status*, which provided a "snapshot in time" of the status of instructional theory in the early 1980s. Dramatic changes in the nature of instructional theory have occurred since then, partly in response to advances in knowledge about the

human brain and learning theory, partly due to shifts in educational philosophies and beliefs, and partly in response to advances in information technologies. These changes have made new methods of instruction not only possible, but also necessary in order to take advantage of new instructional capabilities offered by the new technologies. These changes are so dramatic that many argue they constitute a new paradigm of instruction, which requires a new paradigm of instructional theory. In short, there is a clear need for this Volume II of Instructional Design Theories and Models. To attain the broad sampling of methods and theories it presents, and to make this book more useful for practitioners as well as graduate students interested in education and training, this volume contains twice as many chapters, but each half as long as the ones in Volume I, and the descriptions are generally less technical. Several unique features are provided by the editor to help readers understand and compare the theories in this book: *Chapter 1, which discusses the characteristics of instructional theory and the nature of the new paradigm of instruction, helps the reader identify commonalities across the theories. *Chapter forewords, which summarize the major elements of the instructional-design theories, are useful for reviewing and comparing theories, as well as for previewing a theory to decide if it is of interest, and for developing a general schema that will make it easier to understand. *Editor's notes provide additional help in understanding and comparing the theories and the new paradigm of instruction to which they belong. *Units 2 and 4 have introductory chapters to help readers analyze and understand the theories in those units. This is an essential book for anyone interested in exploring new approaches to fostering human learning and development and thinking creatively about ways to best meet the needs of learners in all kinds of learning contexts. Readers are invited to use Dr. Charles Reigeluth's Web site to comment and to view others' comments about the instructional design theories in this book, as well as other theories. Point your browser to: www.indiana.edu/~idtheory

Exploring Southern California Beaches Nov 20 2019 From the bustle of the Mexican border to the isolated beauty of Point Conception, sit back and enjoy the ride as veteran writer and beach bum David Crowell takes you on Safari in "Exploring Southern California Beaches." Discover the diversity of life in a rocky tide pool; unwind with a game of beach volleyball, either as a spectator or a participant; soak up some rays; or catch a wave--the full range of beach fun awaits in this introduction to California's premier natural attractions. Complete information on services and concessions complements Crowell's concise, thorough, and often wry look at California's beach culture. Conveniently divided into 19 clearly mapped regions, the 170 different beaches described here grace the coast with an unmatched variety of fun and discovery. So grab a towel and your shades--the day's a-wasting and the surf's up somewhere along the sunny coast of Southern California.

[Natural Gas and Geopolitics](#) Jan 03 2021 By most estimates, global consumption of natural gas - a cleaner-burning alternative to coal and oil - will double by 2030. However, in North America, Europe, China, and South and East Asia, which are the areas of highest-expected demand, the projected consumption of gas is expected to far outstrip indigenous supplies. Delivering gas from the world's major reserves to the future demand centres will require a major expansion of inter-regional, cross-border gas transport infrastructures. This book investigates the implications of this shift, utilizing historical case studies as well as advanced economic modelling to examine the interplay between economic and political factors in the development of natural gas resources. The contributors aim to shed light on the political challenges which may accompany a shift to a gas-fed world.

[Russian Oil Supply](#) Sep 23 2022 Russian Oil Supply traces the development of the Russian oil industry from its inception in the 1870s through the present. The fundamental geology of the two main producing basins (Volga-Ural and West Siberia) is presented along with a review of key production technologies. The technical, economic, and policy aspects of achieving the 1987-88 peak production are described as well as the mechanics of the production collapse that followed and, since 1999, the recovery of Russian output. The performance of Russia's major oil companies, independents and joint ventures is analyzed and conclusions drawn on the future course of production and exports.

True Vision Dec 02 2020 Featuring the artwork of over 25 leading artists with name recognition As art journaling grows in popularity (even attracting a new breed of scrapbookers who call themselves "life artists"), there is a movement afoot toward creating more authentic, personal, what some people call "raw" journals. These journals are filled with not just attractive, well-composed pages, but pages that are filled with personal, meaningful content. True Visions is focused on ways to bring authenticity and meaning into one's art journaling. The book will examine themes and topics common to all while offering activities and exercises to create rich meaningful content. Each chapter will highlight familiar subject areas such as life events, spirituality, childhood, and even an artist's favorite writings. Within each topic, readers are given guided activities and exercises for developing content, provided one or two artistic techniques, and are shown inspiring examples of work by a variety of talented art journal artists.

[Andrew Rollings and Ernest Adams on Game Design](#) Nov 01 2020 The authors discuss the four main tasks of game design--imagining a game, defining how it works, describing its internal elements, and explaining it to others.

Exile Feb 22 2020 Rachel appears to have everything – a beautiful home on Malibu Beach, a successful career as a film

director, and even an adorable four year old son. But Rachel's world quickly implodes when her son dies in a tragic accident and she realizes all her success and money have left her alone and aching for the one thing she can't seem to achieve—love. Reeling from the loss of her son and her ex's indifference, Rachel throws herself into work and heads to Ireland to film her next project. Once there, she's plagued with vivid dreams and a gnawing sense of déjà vu. But Rachel's tough exterior really begins to crumble when she spots a statue in the town square and is shocked to realize it's the exact replica of the man who has haunted her dreams for months—a handsome stranger for whom she feels a deep and mysterious attraction... Will Rachel choose love even at the expense of her own sanity? Or is her love for the man of her dreams more real than anything here on earth...?"Exile is a deeply romantic psychological thriller that will take you on a roller coaster exploration of grief, logic, and the transcendental nature of love..."
