Grounding Education in Environmental Humanities Dec 14 2021 This edited volume draws together educators and scholars to engage with the difficulties and benefits of teaching place-based education in a distinctive culture-laden area in North America: the United States South. Despite problematic past visions of cultural homogeneity, the South has always been a culturally diverse region with many historical layers of inhabitation and migration, each with their own set of religious and secular relationships to the land. Through site-specific narratives, this volume offers a blueprint for new approaches to place-based pedagogy, with an emphasis on

the intersection between religion and the environment. By offering broadly applicable examples of pedagogical methods and practices, this book confronts the need to develop more sustainable local communities to address globally significant challenges.

Building Literacy in Social Studies Mar 25 2020 This book demonstrates how teachers can help their students understand their social studies texts, leading them to become successful readers, critical thinkers, and active citizens.

Topographies of Memories Nov 13 2021 This book explores new approaches towards developing memorial and heritage sites, moving beyond the critique of existing practices that have been the traditional focus of studies of commemoration. Offering understandings of the effects of conflict on memories of place, as manifested in everyday lives and official histories, it explores the formation of urban identities and constructed images of the city. *Topographies of Memories* suggests interdisciplinary approaches for creating commemorative sites with shared stakes. The first part of the book focuses on memory dynamics, the second on Nicosia, the divided capital of Cyprus, and the third on physical and material world

interventions. Design practices and modes of engagement with places of memory are explored, making connections between theoretical explorations of memory and forgetting and practical strategies for designers and practitioners.

History and Imagination Jul 09 2021 "In History and Imagination, elementary school social studies teachers will learn how to help their students break down the walls of their schools, more personally engage with history, and define democratic citizenship. By collaborating together in meaningful investigations into the past and reenacting history, students will become experts who interpret their findings, teach their peers, and relate their experiences to those of older students, neighbors, parents, and grandparents. The byproduct of this collaborative, intergenerational learning is that schools become community learning centers, just like museums and libraries, where families can go together in order to find out more about the topics that interest them. There is an incredible value in the shared and lived experiences of reenacting the past, of meeting people from different

places and times: an authority and reality that textbooks cannot rival. By engaging elementary social studies students in living history, whether in the classroom, afterschool, or in partnership with local historical institutions, teachers are guaranteed to impress upon the students a special, desired understanding of place and time"-- Provided by publisher.

Grades 4-7.

The Secret Nov 25 2022 The tale begins over three-hundred years ago, when the Fair People—the goblins, fairies, dragons, and

other fabled and fantastic creatures of a dozen lands—fled the Old World for the New, seeking haven from the ways of Man. With them came their precious jewels: diamonds, rubies, emeralds, pearls... But then the Fair People vanished, taking with them their twelve fabulous treasures. And they remained hidden until now... Across North America, these twelve treasures, over ten-thousand dollars in precious jewels in 1982 dollars, are buried. The key to finding each can be found within the twelve full-color paintings and verses of *THE SECRET*. Are you smart enough? *THE SECRET: A TREASURE HUNT* was published in 1982. The year before publication, the author and publisher Byron Preiss had traveled to 12 locations in the continental U.S. (and possibly Canada) to secretly bury a dozen ceramic casques. Each casque contained a small key that could be redeemed for one of 12 jewels Preiss kept in a safe deposit box in New York. The key to finding the casques was to match one of 12 paintings to one of 12 poetic verses, solve the resulting riddle, and start digging. Since 1982, only two of the 12 casques have been recovered. The first was located in Grant Park, Chicago, in 1984 by a group of students. The second was unearthed in 2004

in Cleveland by two members of the Quest4Treasure forum.

The Greatest Treasure Hunt in History: The Story of the Monuments Men (Scholastic Focus) Jun 20 2022 Robert M. Edsel brings the story of his #1 NYT bestseller for adults *The Monuments Men* to young readers for the first time in this dynamic, narrative nonfiction project packed with photos. Robert M. Edsel, #1 New York Times bestselling author of *The Monuments Men*, brings this story to young readers for the first time in a sweeping, dynamic adventure detailing history's greatest treasure hunt. As the most destructive war in history ravaged Europe, many of the world's most cherished cultural objects were in harm's way. *The Greatest Treasure Hunt in History* recounts the astonishing true story of 11 men and one woman who risked their lives amidst the bloodshed of World War II to preserve churches, libraries, monuments, and works of art that for centuries defined the heritage of Western civilization. As the war

raged, these American and British volunteers -- museum curators, art scholars and educators, architects, archivists, and artists, known as the Monuments Men -- found themselves in a desperate race against time to locate and save the many priceless treasures and works of art stolen by Adolf Hitler and the Nazis.

We Made Uranium! Mar 17 2022 Item #176: A fire drill. No, not an exercise in which occupants of a building practice leaving the building safely. A drill which safely emits a bit of fire, the approximate shape and size of a drill bit. Item #74: Enter a lecture class in street clothes. Receive loud phone call. Shout "I NEED TO GO, THE CITY NEEDS ME!" Remove street clothes to reveal superhero apparel. Run out for the good of the land. Item #293: Hypnotizing a chicken seems easy, but if the Wikipedia article on the practice is to be believed, debate on the optimal method is heated. Do some trials on a real chicken and submit a report . . . for science of course. Item

#234: A walking, working, people-powered but preferably wind-powered Strandbeest. Item #188: Fattest cat. Points per pound. The University of Chicago's annual Scavenger Hunt (or "Scav") is one of the most storied college traditions in America. Every year, teams of hundreds of competitors scramble over four days to complete roughly 350 challenges. The tasks range from moments of silliness to 1,000-mile road trips, and they call on participants to fully embrace the absurd. For students it is a rite of passage, and for the surrounding community it is a chance to glimpse the lighter side of a notoriously serious university. *We Made Uranium!* shares the stories behind Scav, told by participants and judges from the hunt's more than thirty-year history. The twenty-three essays range from the shockingly successful (a genuine, if minuscule, nuclear reaction created in a dorm room) to the endearing failures (it's hard to build a carwash for a train), and all the chicken hypnotisms and permanent tattoos in between. Taken together, they show how a scavenger hunt once meant for blowing off steam before finals has grown into one of the most outrageous annual traditions at any university. The tales told

here are absurd, uplifting, hilarious, and thought-provoking—and they are all one hundred percent true.

The Ultimate Book of Scavenger Hunts Oct 12 2021 It's hard to resist a scavenger hunt. Give kids a list of things to find, and they naturally want to turn it into a game and start checking things off. Add in an outdoor and nature twist, and the game is elevated to a whole new level—and what an amazing opportunity to engage kids and families with nature in a whole new way. *The Ultimate Book of Scavenger Hunts* will help turn every outdoor outing into a scavenger hunt, with plenty of things for your family to look for, discover, and learn about. Geared towards families with kids ages 4-10, the hunts are geared to just about any location—from city to farm to beach to mountains. The book includes a leveled difficulty rating system so you can find both easy and difficult items within each hunt (1 being easy, 2 medium, 3 hard). Each hunt comes complete with factoids and information about the items on the list, and each item is accompanied by a colorful spot illustration so that the hunter can easily identify what they are looking for.

I Know Numbers! Aug 10 2021 How do we love numbers? Let us count the ways: They're on street signs and bus stops, featured on phones, thermometers, chalkboards, and scales. They show the time and the date, and help us to measure distance, sizing, and so much more. This spirited picture book by beloved author-illustrator Taro Gomi will charm and inform the youngest of readers, offering them a unique—and useful—look at a key concept we count on. Plus, this is the fixed format version, which looks almost identical to the print edition.

Terrific Makerspace Projects Aug 30 2020
Terrific Makerspace Projects: A Practical Guide for Librarians features fifteen customizable projects that were designed as projects created by librarians/makerspace facilitators, rather than projects in which librarians guided others (makerspace users). These projects were showcased during library events with the goal of promoting the makerspace, as well as other library services, while using them to build connections both within and external to the library. This book outlines maker projects in detail and provides plenty of photos and

resources so readers can recreate, customize, and implement them. People at all skill levels in every type of makerspace will find something they can try, with projects that range from simple and low-tech to more complex and tech-heavy. Most projects are inexpensive, taking advantage of free online tools, upcycled or repurposed materials, and low cost electronics such as Arduinos. Each project can be approached as an offering for makerspace visitors or can be created by library employees themselves as tools to engage in outreach and promote the makerspace, library services, the institution, and more. Every project has been created and tested in a real library setting by the authors, who present lessons learned, possible variations, and different ideas on how to implement the projects to their fullest extent. Explore the idea of using the makerspace to highlight the value of other library services, or simply find new and fun ways to engage with your users. The book also offers suggestions on how to be a great maker, and tips on makerspace safety, finding low-cost materials, and more. Whether you're just beginning your makerspace or looking for fresh ideas for your established space, this book has

something to offer.
