*Aiming for an A in A-level Geography* Apr 30 2020 Exam board: AQA, Edexcel, OCR, WJEC, WJEC Eduqas Level: A-level Subject: Geography First teaching: September 2016 First exams: Summer 2018 Master the skills you need to set yourself apart and hit the highest grades. This year-round course companion develops the higher-order thinking skills that top-achieving students possess, providing step-by-step guidance, examples and tips for getting an A grade. Written by experienced author, teacher and lecturer Simon Oakes, *Aiming for an A in A-level Geography*: - Develops the 'A grade skills' of analysis, evaluation, creation and application, ensuring that you know how to apply these skills and approach each exam question as an A/A\* candidate - Takes you step by step through the specific skills you need to master in A-level Geography, including geographical reading, data analysis and skills for the Independent Investigation (NEA) - Clearly shows how to move up the grades with sample responses that have been annotated to highlight the key features of A/A\* answers - Puts the theory behind achieving an A grade into practice, providing in-class or homework activities and further reading tasks that stretch towards university-level study - Perfects exam technique through practical tips and examples of common pitfalls to avoid - Cultivates effective revision habits for success, with tips and strategies for producing and using revision resources - Supports the major exam boards, outlining the Assessment Objectives for

reaching the higher levels under the AQA, Edexcel, OCR and WJEC/Eduqas specifications

GCSE 9-1 Geography AQA Exam Practice: Grades 7-9 Oct 05 2020

This book provides write-in practice specially designed to support students aiming for Grades 7-9 at GCSE. It has been carefully written to build students' familiarity and confidence with the content and skills required for exam success. A step-by-step 'On your marks' approach hones students' ability to answer different types of exam questions effectively and provides scaffolded support for tricky threshold topics and concepts from the AQA specification. The book includes annotated sample answers and a full set of exam papers to practise exam technique and is suitable for both independent study and in-class exam preparation.

Written with reference to the 2019 examiner reports and latest AQA guidance, you can be confident that this book reflects a real understanding of what is required for success at GCSE level.

Includes answer guidance to all activities; mark schemes for exam papers will be provided online. Also available: Revision Guide, Fieldwork, Student Book, Kerboodle Resources and Assessment, Kerboodle Book (student access). Also available as printed book: 9781382009591; 4-6 version also available: 9781382009584

*Debates in Geography Education* May 12 2021 *Debates in Geography Education* encourages early career teachers, experienced teachers and teacher educators to engage with and reflect on key issues, concepts and debates. It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding. The second edition is fully updated in light of the latest research, policy and practice in the field, as well as key changes to the curriculum and examination specifications. Expert contributors provide a range of perspectives on international, historical and policy contexts in order to deepen our understanding of significant debates in geography education. Key debates include: geography's identity as an academic discipline; what constitutes knowledge in

geography; places and regional geography; what it means to think geographically; constructing the curriculum; how we link assessment to making progress in geography; the contribution of fieldwork and outdoor experiences; technology and the use of Geographical Information; school geography and employability; understanding the gap between school and university geography; evidence-based practice and research in geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, will help support and shape further research and writing. *Debates in Geography Education* is a key resource that is essential reading for all teachers and researchers who wish to extend their grasp of the place of geography in education. Mark Jones is Senior Lecturer in Education at the University of the West of England, Bristol, UK David Lambert is Professor of Geography Education at UCL Institute of Education, London, UK

In addition, guided answers and mark schemes will be provided online.

Geophysical Hazards Aug 15 2021 The International Year of Planet Earth (IYPE) was established as a means of raising worldwide public and political awareness of the vast, though frequently under-used, potential the Earth Sciences possess for improving the quality of life of the peoples of the world and safeguarding Earth's rich and diverse environments. The International Year project was jointly initiated in 2000 by the International Union of Geological Sciences (IUGS) and the Earth Science Division of the United Nations Educational, Scientific and Cultural Organisation (UNESCO). IUGS, which is a Non-Governmental Organisation, and UNESCO, an Inter-Governmental Organisation, already shared a long record of productive cooperation in the natural sciences and their application to societal problems, including the International Geoscience Programme (IGCP) now in its fourth decade. With its main goals of raising public awareness of, and enhancing research in the Earth sciences on a global scale in both the developed and less-developed countries of the world, two operational programmes were demanded. In 2002 and 2003, the Series Editors together with Dr. Ted Nield and Dr. Henk Schalke (all four being core members of the Management Team at that time) drew up outlines of a Science and an Outreach Programme.

In 2005, following the UN proclamation of 2008 as the United Nations International Year of Planet Earth, the “Year” grew into a triennium (2007-2009).

**Transport Systems, Policy and Planning** Oct 24 2019 Provides a unique review of the major spatial aspects of transport systems, a detailed analysis of transport problems in urban and rural areas, an evaluation of social and environmental impacts, and a planning and policy overview. Divided into four parts, each considering a different aspect of transport geography. The first part outlines the basic geography of transport and examines transport and spatial structures, focusing upon the varying contributions made by transport to industrial, agricultural and urban development. Part two moves to consider specific transport systems at both national and international scales, drawing on studies from industrialised and developing nations and discussing the effects upon transport of the political changes in the former USSR and Eastern Europe. The third part examines some of the many problems of transport and urban and rural areas using specific examples to illustrate the contrasting difficulties and evaluate current urban transportation planning methods.
