Platonic Theology is the visionary and philosophical masterpiece of Marsilio Ficino (1433-1499), the Florentine scholar-philosopher-magus largely responsible for the Renaissance revival of Plato. This work, translated into English for the first time, is a key to understanding the art, thought, culture, and spirituality of the Renaissance. A techno-thriller novel of the near future when a powerful Artificial Intelligence called Oracle identifies individuals who pose a significant risk to the stability of our society, or who have a high probability of posing such a risk in the future, and sends assassins to kill them. Oracle knows each of us so well, better than we know ourselves, that it is able to determine who might become the next Hitler or Stalin long

before that person even has an inkling of such a future. The main character is Henry Porembski, who becomes one of Oracle's assassins when he is recruited after his wife and daughter are killed in a terrorist attack. When he is sent to kill a young girl, the same age as his daughter, he turns against Oracle and vows to protect the girl. He wonders, though: if Oracle knows us so well, why would it send him to kill a girl it had to know he would not kill? And could it really predict how a little girl would turn out as an adult? It all comes to a tense conclusion after Henry learns that his mission to kill the girl was really to set in motion a series of events intended to bring about the downfall of Oracle...because Oracle has determined that it, itself, poses a threat to the human civilization, and needs to be eliminated. Great stories, great science, and great practical advice about how, when, and why to break the rules' - Angela Duckworth, international bestselling author of Grit. Do you want to follow a script — or write your own story? Award-winning Harvard Business School professor Francesca Gino shows us why the most successful among us break the rules, and how rebellion brings joy and meaning into our lives. Rebels have a bad reputation. We think of them as troublemakers, outcasts,

contrarians: those colleagues, friends, and family members who complicate seemingly straightforward decisions, create chaos, and disagree when everyone else is in agreement. But in truth, rebels are also those among us who change the world for the better with their unconventional outlooks. Instead of clinging to what is safe and familiar, and falling back on routines and tradition, rebels defy the status quo. They are masters of innovation and reinvention, and they have a lot to teach us. Francesca Gino, a behavioral scientist and professor at Harvard Business School, has spent more than a decade studying rebels at organizations around the world, from high-end boutiques in Italy's fashion capital, to the World's Best Restaurant, to a thriving fast food chain, to an award-winning computer animation studio. In her work, she has identified leaders and employees who exemplify "rebel talent," and whose examples we can all learn to embrace. Gino argues that the future belongs to the rebel — and that there's a rebel in each of us. We live in turbulent times, when competition is fierce, reputations are easily tarnished on social media, and the world is more divided than ever before. In this cutthroat environment, cultivating rebel talent is what allows businesses to evolve and to prosper. And rebellion has an added benefit beyond the workplace: it leads to a more vital, engaged, and fulfilling life. Whether you want to inspire others to action, build a

business, or build more meaningful relationships, Rebel Talent will show you how to succeed — by breaking all the rules. Riffing on Strings is a unique collection of creative writing that explores the cosmic and cultural resonances of string theory. The book includes thought-provoking essays, short stories, poems, and a play from over 40 acclaimed authors, including Nobel Laureate Sheldon Glashow, Michio Kaku, Peter Woit, Adam Roberts, Colette Inez, Brenda Hillman, Joseph Radke, Bruce Holland Rogers, and Carole Bugge. "Sean Miller and Shveta Verma have put together an exhilaratingly eclectic anthology of creative and expository writing about one of the most exciting (even if controversial) intellectual fields of our time: string theory. Just Miller's erudite introduction by itself is worth the price of this sparkling collection." - S. Abbas Raza, Managing Editor of 3 Quarks Daily "Putting together a theory of everything requires a lot of creativity, and more than a little audacity - qualities which are also abundant in this collection of stories and poems inspired by string theory. Riffing on Strings is guaranteed to stimulate both hemispheres of your brain." - Sean Carroll, Theoretical Physicist, California Institute of Technology & Creator of Cosmic Variance They may ride off into the sunset, but cowboys never go out of style. These manly men embody the fiercely independent, earthy alpha male and hero who isn't afraid to show the gentle, nurturing side

of his complex nature when faced with a woman in need. Even when he's coated with dust from riding behind a herd of cattle or up to his knees in mud freeing a calf from a wallow, this stud still generates a lot of Cowboy Heat. Delilah Devlin's *Cowboy Lust* was a sensation, hitting the top ten of romance books and generating a river of praise. Award-winning Devlin is back on the ranch with stories of rugged romantics, rough riders, and rope wranglers sure to satisfy any reader who craves the idea of that gruff, romantic hero, a man of few words but many moves. *Cowboy Heat* sits tall in the saddle, winning hearts and spurring readers to new heights of happiness. An account of astrology from its beginnings in Mesopotamia, focusing on the Greco-Roman world, *Ancient Astrology* examines the theoretical development and changing social and political role of astrology. Book 2 of *The Survivalist Series* No electricity. No running water. No food. No end in sight. If life as you knew it changed in an instant, would you be prepared? In A. American's first novel, *Going Home*, readers were introduced to Morgan Carter, the resourceful, tough-as-nails survivalist who embarks on a treacherous 250-mile journey across Florida following the collapse of the nation's power grid. Now reunited with his loving wife and daughters in this follow-up to *Going Home*, Morgan knows that their happiness is fleeting, as the worst is yet to come. Though for years Morgan has been diligently preparing for emergency situations, many of his neighbors are completely unready for life in this strange new world—and they're starting to get restless. With the help of his closest companions, Morgan fights to keep his home secure—only to discover shocking information about the state of the nation in the process. Fans of James Wesley Rawles, William R. Forstchen's *One Second After*, and *The End* by G. Michael Hopf will revel in A. American's apocalyptic tale. An evil

presence looms over the desert community. Native American legend calls it Tahquitz. The new casino operators call it an opportunity to make money ... Young Luke Kauffmann acquires a pair of strange goggles that gives him glimpses into dimensions around him, where dark, sinister forces exert their powers to influence—and glimmering creatures of light strive to stop them. Thanks to the help of a beautiful but quirky techie, Luke increases the power of the goggles until he is thrust even deeper into the spirit world. With their added strength and the help of others, darker secrets are soon uncovered until Luke himself is seduced by the power and pride that the goggles offer. It isn't until the final showdown at Tahquitz's very lair that Luke and his colleagues learn the deeper truths of spiritual warfare that enable them to destroy the creature's sinister hold upon the valley. In a major Contribution to the theory of perception, A.D.Smith presents a truly original defense of direct realism the view that in perception we are directly aware of things in a physical world. It offers two arguments against direct realism-one concerning illusion, and one concerning hallucination that upto now no theory of perception could adequately rebut. At the heart of Smith's theory is a new way of drawing the distinction between perception and sensation alone with an unusual treatment of the nature of object of hallucination .
