Politics and the English Language Dec 03 2022 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Politics and the English Language*, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's *Politics and the English Language* is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

The Regulation of Services and Intellectual Property May 04 2020 International rules on trade in services and intellectual property are 'new' additions to the multilateral trading system, but both have played an important role in the system since their entry. Accompanied by a detailed introduction, this volume contains essays which cover not only the law and jurisprudence of these topics but also the underlying economics and politics behind their incorporation into the multilateral system and continued prominence. The volume provides readers with a comprehensive overview of the development of these controversial and increasingly important areas of international trade law.

Professional Discretion in Welfare Services Nov 09 2020 Discretion has re-emerged as an issue of central importance for welfare professionals over the last two decades in the face of an intensification of management culture across the public sector. This book presents an innovative framework for the analysis of discretion, offering three accounts of the managerial role - the domination model, the street level model and the author's alternative discursive perspective. These different regimes of discretion are examined through a case study within a social services department, comparing and contrasting social work discretion in an Older Persons Team and a Mental Health Team. This innovative, theoretical and empirical analysis will be of great interest to postgraduate students and researchers in social work and related disciplines including social policy, public administration and organizational studies, as well as professionals in social work, health and education.
