**Food Service Sanitation Manual** Aug 11 2021 Foodborne illness is a major public health problem despite improvement of food protection

programs in the United States. Sound regulations and day-to-day compliance by food service operators are essential for effective food protection programs. The purpose of the program is to protect food against contamination, ensure food soundness, and meet consumer expectations. The food service program should cover public, semi-public and limited food service establishments. Requirements for temporary food service establishments should be modified concerning physical facilities. Recommendations for conducting an effective food sanitation program include staff competency and training; public relations; working with other agencies and groups; attending to administrative, industry, and financial considerations; program evaluation; and ensuring supportive facilities and equipment. In depth explanations of the FDA Food Service Sanitation Ordinance (1976 Recommendations) are given.
