In late 20th-century Europe, both national and regional loyalties have retained a surprising strength and topicality, despite the advance of supra-national integration. This volume addresses some specific aspects of this phenomenon that lay at the centre of the interdisciplinary work of the first European Forum of the European University Institute in Florence during the academic year 1993/94. It aims at contributing to a better understanding of the origins and the nature of territorially-based identities in Europe, and it also offers some analysis of current problems arising at various levels of the relationships between regional, national and international structures. The contributions to this volume refer to three major fields of historical and contemporary research: The study of the factors that constitute territorially-based imagined communities. Under what conditions can certain cultural characteristics shared by a given group (such as language, religious affiliation or cultural heritage) acquire social and political meaning in a process of creating territorial loyalties? And how do regional and national loyalties relate to other patterns of particularist group identities? In examining these questions, special attention is given to the concept of primordial identities and to the problem of ethnicity. The analysis of the mechanisms by which particular group interests (social, political, or cultural) are translated into narratives of regional or national identity. The loyalty to a community within a given territory is never merely a product of 'invention' and of arbitrary ideological indoctrination. This book gathers more than 150 peer-reviewed papers presented at the 5th INTBAU International Annual Event, held in Milan, Italy, in July 2017. The book represents an invaluable and up-to-date international exchange of research, case studies and best practice to confront the challenges of designing places, building cultural landscapes and enabling the development of communities. The papers investigate methodologies of representation, communication and valorization of historic urban landscapes and cultural heritage, monitoring conservation management, cultural issues in heritage assessment, placemaking and local identity enhancement, as well as reconstruction of settlements affected by disasters. With contributions from leading experts, including university researchers, professionals and policy makers, the book addresses all who seek to understand and address the challenges faced in the protection and enhancement of the heritage that has been created. Facing extreme challenges from the world's best players in a variety of matches, young Ryoma Echizen aims to become the best tennis player in the world and battles to

win tennis championships for the Seishun Academy. In the 1960s and 1970s, John Deere's tractors evolved dramatically from small machines into large, powerful tractors with modern advances and muscular engines; it was a period of the greatest changes since the 1920s. Deere christened these tractors the New Generation. This book in the Tractor Legacy series examines these Big Green machines in detail, with archival and current photography of restored tractors, a thorough historical text, and details of model specifications and variations. This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

H.R. 1612, Public Lands Service Corps Act of 2009: legislative hearing before the Subcommittee on National Parks, Forests, and Public Lands of the Committee on Natural Resources, U.S. House of Representatives, One Hundred Eleventh Congress, first session, Thursday, April 2, 2009. The Art of Marketing and PR Giving You Effective Tools to Build Your Brand and Make Your Business Grow. Marketing and PR is like an art and takes years of experience to master. Pacharee Pantoomano and Kittima Sethi are passionate, driven and creative Marketing and PR consultants who will guide you in mastering this art. Through a combined 40 years of real life experiences and expertise, the authors will share Marketing and PR tips, tactics and best practices to help you grow your business. What you'll learn: - How to create a successful PR event - How to craft a great marketing plan - Finding your USP - Tips on growing your brand with effective PR - How to succeed in multicultural markets - And much, much more This free e-book is a compilation of articles by the authors that have written over the years on a wide range of topics within the fields of marketing and public relations drawn from years of extensive professional experience, knowledge and expertise working with local and multinational companies. After all, the principles of marketing and PR remains the same universally, but is adapted to fit the cultural and behavioral norms in various domestic and international markets. So whether you are a marketing or PR professional or an entrepreneur looking for some advice, these articles will provide you with many tips and tools that you may use on your next marketing or PR campaign to make your business thrive. About the experts Pacharee Pantoomano and Kittima Sethi come from a multicultural background and are the energetic hearth and soul of Brand Now, a boutique Marketing and PR agency based in Bangkok with a combined 40 years of experience working with several local and multinational companies across the world. They are on a mission to help businesses grow and are constantly looking for innovative and cutting-edge strategies to improve their skills in Marketing and PR to help clients. When out of the office, you can find them with their families, being involved in various community and social projects, attending personal growth seminars or spreading positive energy during their networking events. Some of their clients include Pepsi Co, Merck, Electrolux, GrabTaxi and Viber. Working with such multicultural brands has strengthened and broadened their understanding of what clients are looking for and the importance of effective communication in marketing and PR. The cutting-edge guide on advancing the science of molecular imaging using nanoparticles

Nanoplatform-Based Molecular Imaging provides rationale for using nanoparticle-based probes for molecular imaging, then discusses general strategies for this underutilized, yet promising, technology. It addresses general strategies of particle synthesis and surface chemistry, applications in computed tomography optical imaging, magnetic resonance imaging, ultrasound, multimodality imaging, theranostics, and finally, the clinical perspectives of nanoimaging. This comprehensive volume summarizes the opinions of those in the forefront of research and describes the latest developments by emphasizing fundamentals and initiating hands-on application. Could I have been one of them? was what Sam McKinney wondered as he retraced, alone, from Puget Sound to Queen Charlotte Strait, the explorations of Captain George Vancouver and his men. In the 1790s, day after day, they had rowed for long hours, camping on rocky beaches in all weathers and charting the intricate coastline for the first time. Two hundred years later, McKinney followed them in his 25-foot sailboat, anchoring in the same locations as they had done, experiencing the same winds and waves, and sharing what McKinney calls the link of vulnerability that is the ever-present condition of all people who go to sea. With his boat, his pipe and the occasional glass of rum, McKinney invites readers along on a perceptive voyage through time and along the magnificent Pacific Northwest coast from Puget Sound through the Georgia and Queen Charlotte Straits. Describing both the historical and contemporary voyages around the Inland Sea, McKinney offers insightful comparisons of what sailors saw and experienced in the 18th century and what they see today. At the end of his trip McKinney, like Vancouver, claims the area he had explored, not by deed of ownership but out of love for the place, its staggering beauty...(and) the memories of the people and cultures who have found homes along its shores. Could he have, indeed, been one of Vancouver's men? He isn't sure, but he would like to have given it a try. The story of how diesel engines and gas turbines, used to power cargo ships and jet airplanes, made today's globally integrated economy possible. Throughout history and into the modern day, people have moved from place to place to flee danger and seek out better lives. But immigrants and refugees often meet harsh realities on their journeys. Learn about immigration and refugee resettlement within the United States and throughout the world. Follow both historical and recent large migrations, understand the challenges of life in a new country, and see how activists fight for immigrants' and refugees' rights. Read Woke™ Books are created in partnership with Cicely Lewis, the Read Woke librarian. Inspired by a belief that knowledge is power, Read Woke Books seek to amplify the voices of people of the global majority (people who are of African, Arab, Asian, and Latin American descent and identify as not white), provide information about groups that have been disenfranchised, share perspectives of people who have been underrepresented or oppressed, challenge social norms and disrupt the status quo, and encourage readers to take action in their community. Discover how to Be Decisive - Now! This 2-in-1 guide is designed to help you become a more effective decision maker in an instant, whilst giving you the deeper knowledge to ensure long-lasting results. With the unique 2-in-1 approach, you can learn your way. Use the seven Speed Read tips immediately, then take your time exploring the Big Picture chapters. · Make the right decisions quickly and effectively · Understand the problem properly and work out your priorities · Ensure your decision is the right one and avoid the common mistakes · Know the value of risk planning and how to do it successfully · Look back to learn lessons on better decisions next time As an ambitious manager, you need the right information at the right time to help you advance in your career. The 2-in-1 Manager will ensure you improve and succeed in business, right now and in the future. Highlighting the importance of regional and national differences in industrial development, this book is a pioneering long term comparison of the two regions of Lancashire and Kansai. Diesel Models: 670, 770, 870, 970, 1070 Awesome Since Novelty Notebook Daily dairy / journal / notebook to write in, for creative writing, for creating list, for scheduling, Organizing and Recording your thoughts. Makes a perfect december birthday gift idea or anniversary present for any special person in your life. Show everyone your value kindness in the world with this awesome notebook. Perfectly sized at 6" x 9" 120 pages Softcover Bookbinding Flexible Paperback Tender prices performed strongly again in 2016, with a provisional rate increase of 10.3% versus a year earlier. "The first woman in the world to exceed 300 mph in a dragster"--

Cover. While the military use of drones has been the subject of much scrutiny, the use of drones for humanitarian purposes has so far received little attention. As the starting point for this study, it is argued that the prospect of using drones for humanitarian and other life-saving activities has produced an alternative discourse on drones, dedicated to developing and publicizing the endless possibilities that drones have for "doing good". Furthermore, it is suggested that the Good Drone narrative has been appropriated back into the drone warfare discourse, as a strategy to make war "more human". This book explores the role of the Good Drone as an organizing narrative for political projects, technology development and humanitarian action. Its contribution to the debate is to take stock of the multiple logics and rationales according to which drones are "good", with a primary objective to initiate a critical conversation about the political currency of "good". This study recognizes the many possibilities for the use of drones and takes these possibilities seriously by critically examining the difference the drones' functionalities can make, but also what difference the presence of drones themselves - as unmanned and flying objects - make. Discussed and analysed are the implications for the drone industry, user communities, and the areas of crisis where drones are deployed. Enabling power: The Coroners (Amendment) Act 1926 s. 26 and 27, The Welsh Language Act 1967 s. 2(2). Made: 23.09.70. Coming into force: 01.10.70. Effect: SI 1953/205, 1956/1691

Amended CRS! - Can't Remember Stuff! is the perfect companion to every day living in the 21st century. An alphabetical password organizer with internet addresses, logons, account numbers, secret codes, and notes in a bright red cover so it can be found easily on your desk or hidden under your keyboard. Keep all your passwords up to date. 6 entries per page with enough space to write in large print. Shred those sticky notes and hidden pieces of paper.

General Motors and Ford: Light Trucks, Vans, Passenger Cars covering General Motors 350 cu in (5.7 liter), 379 cu in (6.2 liter), 397 cu in (6.5 liter), and Ford 420 cu in (6.9 liter), 445 cu in (7.3 liter), and 445 cu in (7.3 liter Power Stroke) · Step-by-Step Instructions · Fully Illustrated for the Home Mechanic · Simple Maintenance to Major Repairs · Tools and equipment · Shop practices · Troubleshooting · Routine Maintenance · Engine Repairs and overhaul · Cooling system · Fuel system · Electrical system

An introduction to a powerful and flexible network modeling tool for developing and understanding complex systems, with many examples from a range of industries. Design structure matrix (DSM) is a straightforward and flexible modeling technique that can be used for designing, developing, and managing complex systems. DSM offers network modeling tools that represent the elements of a system and their interactions, thereby highlighting the system's architecture (or designed structure). Its advantages include compact format, visual nature, intuitive representation, powerful analytical capacity, and flexibility. Used primarily so far in the area of engineering management, DSM is increasingly being applied to complex issues in health care management, financial systems, public policy, natural sciences, and social systems. This book offers a clear and concise explanation of DSM methods for practitioners and researchers. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. Packed with full-colour photographs and diagrams, this award-winning book is an excellent resource on Australian insects, spiders and other invertebrates. Text has side bars of interesting facts and a glossary and index. In *How to Super Tune and Modify Holley Carburetors*, best selling author Vizard explains the science, the function, and most importantly, the tuning expertise required to get your Holley carburetor to perform its best for your

performance application.
